

Climate Change Information Portal

Introduction:

The State of California has a long and involved history concerning approaches to address global climate change. Governor Arnold Schwarzenegger set the stage for the current regulatory approach to address climate change when he signed Executive Order (S-3-05) on June 1, 2005. This act established California's path to reduce greenhouse gas emissions to 1990 levels by 2020, and to further reduce emissions to 80 percent below 1990 levels by 2050.

(Link to Executive Order S-3-05: <http://gov.ca.gov/index.php?/executive-order/1861/>)

This Executive Order has been followed by a flood of legislation to achieve these lofty goals.

The Global Warming Solutions Act of 2006 (AB32) and its associated Scoping Plan created the roadmap to guide California toward its greenhouse gas emission goals. AB32 was followed by the adoption of SB375 which presented the framework of how regional transportation planning processes, coordinating regional housing needs, and providing California Environmental Quality Act (CEQA) incentives will achieve reductions in greenhouse gas emissions consistent with AB32's goals.

The Council of Fresno County Governments is committed to assist our local governments wade through the maze of legislation and requirements in order to fully comply with all the new and complex issues that the legislation presents.

In order to serve the diverse information needs of Fresno County, Fresno COG has established this Climate Change Information Portal. While there is a never ending wealth of information being produced daily on Climate Change, and this Portal in no way can list every possible link, it is meant to provide a good starting point for information related to Climate Change.

The Pew Center on Global Climate Change has updated a series of brief reports on climate change. Topics covered by the series include

- *Understanding and responding to climate change*
- *Science and impacts*
- *Cap-and-trade*
- *Technological solutions*
- *Business solutions*
- *Adaptation*
- *International action*
- *State action*
- *Local action*
- *An overview of all the other reports*

The reports are available at:

ENVIRONMENTAL EDUCATION:

Study Finds Environmental Education Programs Lead to Cleaner Air

"This study shows a valuable connection between better environmental education and cleaner air in our communities," said EPA Administrator Lisa P. Jackson. "With the right information, people can make a real difference in the places where they live, work, play and learn."
