Summary of comments received, per scenario

Positive Comments regarding why scenarios were preferred:

Scenario A - Theme of comments: Balance

Combination of everything, range of options, accounts for all lifestyles, active transportation, air quality improvement, already ridesharing, balance, focuses on all areas, includes large cities and small areas, equitable, less traffic, more public transportation and less contamination, bicycles, carpool, does not consume so many acres, fix existing roads but get more healthy commuting options, maintain and repair existing roads, more sidewalks, people have choices or can walk

Scenario B - Theme of comments: Healthier

Active, healthy communities, air quality, 21 premature deaths prevented and 14.21 GHG reduction, sidewalks and bike paths, benefits populated areas, best statistics overall, better development, bike lanes, clean air, less land use, connections between transportation options, everyone would benefit, less urban sprawl, improve sidewalks, increased access for lower income, family oriented, stable, more trails and non-driving options, jobs closer to home, keep small towns small, infill, less traffic after work, more to do, more convenient.

Scenario C - Theme of comments: Repair and invest

Helps small cities, improves communities, better roads, children/teens need more activities, more stores, diversity, farmland is important, helps lower income areas, like the air quality, roads would be better, improved transit in small cities, fix roads!, investment, mixed use, more services, protects the rural community, repair roads, many towns with so much poverty, better housing

Scenario D - Theme of comments: Roads

Better roads, repairs, efficient system, easier travel, expansion, farmland conservation, fix roads, less land taken from farmers, widening, improve existing roads, lowest residential density, relieve congestion, safety, fewer delays and potholes
