INTRODUCTION

INTRODUCTION

FRESNO COUNTY - PART OF THE SAN JOAQUIN VALLEY

The San Joaquin Valley comprises San Joaquin, Stanislaus, Merced, Madera, Fresno, Tulare, Kings, and Kern counties (*Exhibits 1 and 2*). These eight counties share an air quality basin that does not meet the air quality standards set forth in the Federal Clean Air Act or the California Clean Air Act. The eight Valley transportation planning agencies and the San Joaquin Valley Unified Air Pollution Control District have a memorandum of understanding (MOU) in place to ensure a coordinated transportation/air quality planning approach. The MOU defines a cooperative process designed to achieve compliance with air quality conformity provisions of current legislation. A second MOU among the eight agencies ensures a coordinated, cooperative transportation planning process on issues of mutual concern. The federally required Federal Transportation Improvement Program (FTIP) is one of the planning/programming efforts in that cooperative effort.

Fresno County is the second largest county in the San Joaquin Valley, encompassing approximately 6,000 square miles. As the nation's No. 2 farm county, Fresno County has achieved over seven billion dollars a year in commercial crop production. There are fifteen incorporated cities, and the county contains a federally recognized urbanized area, known as the Fresno-Clovis Metropolitan Area, with a population in excess of 1,000,000 residents (*Exhibit 3*).

FEDERAL TRANSPORTATION IMPROVEMENT PROGRAM PRESENTATION

The eight Valley transportation planning agencies formed a committee under its MOU to coordinate the FTIP format. Reviewing agencies are able to see a consistent presentation with common sections among the eight agencies, as well as certain map exhibits. This should provide for a more efficient and expedient review process for the San Joaquin Valley.

The FTIP is available for public review at fresnocog.org, which also allows the agency to present individual project listings in greater detail. This web-based, user interface additionally provides a direct link between projects listed in the FTIP and Fresno County's Regional Transportation Plan (RTP).

THE FEDERAL TRANSPORTATION IMPROVEMENT PROGRAM PROCESS AND DEVELOPMENT

ABOUT THE FTIP

The FTIP is a federal requirement established in 1991 for metropolitan planning organizations (MPOs) under the Intermodal Surface Transportation Efficiency Act (ISTEA). The most recent transportation act, the Infrastructure Investments and Jobs Act (IIJA) or Bipartisan Infrastructure Law (BIL) continues that requirement. The MPO develops the FTIP in conjunction with its member jurisdiction as a financially constrained, multimodal transportation planning program, and in cooperation with state and federal agencies. **The basic premise behind a FTIP is that it is the incremental implementation (four years) of the long-range RTP (24 years). The FTIP serves to present to federal funding agencies manageable components of funding the long-range plan.**

The FTIP is a compilation of project lists from the State Transportation Improvement Program (STIP), urbanized and non-urbanized areas, and other programs using federal funding (*Exhibit 4*). The FTIP is comprised of two parts. The first is a priority list of projects and project segments to be conducted in a four-year period. The second is a financial plan that demonstrates how the FTIP can be implemented. The financial plan is also required to indicate all public and private resources and financing techniques that are expected to be used to carry out the program. Federal legislation has further defined the FTIP process, focusing on enhanced public and public agency participation.

FTIP PROCESS AND DEVELOPMENT

Fresno COG prepares the FTIP in partnership with its member agencies and transit operators, state, and federal agencies, and with public involvement. As the federal funding programs under MPO control are developed, notifications are distributed to eligible agencies and the public, informing them of the appropriate manner in which projects may be considered. The state is also required to conduct a public participation process during the development and adoption of its programs. The state's programs, upon adoption, are then submitted for inclusion in the appropriate MPO FTIP.

In addition to the general notifications, Fresno COG has an enhanced participation process where individuals and individuals can seek membership on appropriate committees. An extensive mailing list includes interested parties who can review the available agendas and determine if there are any issues they wish to address with the agency. Additionally, there are the required public hearings prior to FTIP adoption in which the public can participate.

Environmental Justice Analysis

In response to Title VI and environmental justice requirements, the Federal government has placed an increased emphasis on outreaching to and soliciting input from historically underserved populations (i.e., low-income, minority, native American tribes, elderly, and disabled people). In 2020, the Fresno COG Policy Board adopted an updated version of its *Public Participation Plan (PPP)*, which includes enhanced approaches to outreach to environmental justice populations. The goal is to eliminate participation barriers and encourage minority and low-income populations to take an active part in transportation decision-making. This process is consistent with State and Federal guidelines. Outreach and consultation practices with the native American tribes in Fresno County include providing notice of agency actions and proposals. Tribal governments are given the same courtesies and opportunities for participation and review as other governmental entities. Public participation and outreach for development of the 2025 FTIP is consistent with the requirements of the IIJA and the PPP.

The process outlined allows for proper consultation of all affected agencies and for appropriate public input, thereby meeting the IJA requirements for an appropriate project selection process.

Executive Order 12898 requires that each Federal agency or agencies that receive Federal dollars shall, to the greatest extent possible, administer and implement its programs, policies, and activities that affect human health or the environment so as to avoid disproportionately high and adverse effects on minority and low-income populations. Fresno COG updated its 2022 Environmental Justice Analysis in 2022, which was included in the 2022 RTP in Chapter 7 and is incorporated as Appendix L of this 2025 FTIP.

These and other federal and state mandated FTIP requirements are described in the sections that follow as well as the consistency with other documents.

Consultation with Federal Land Management Agencies

The FTIP defines project budgets, schedules and phasing for programs and projects that are already part of the RTP/SCS. Starting at the RTP/SCS development stage, Fresno COG staff concurrently consults with appropriate agencies regarding the FTIP. This consultation includes the following:

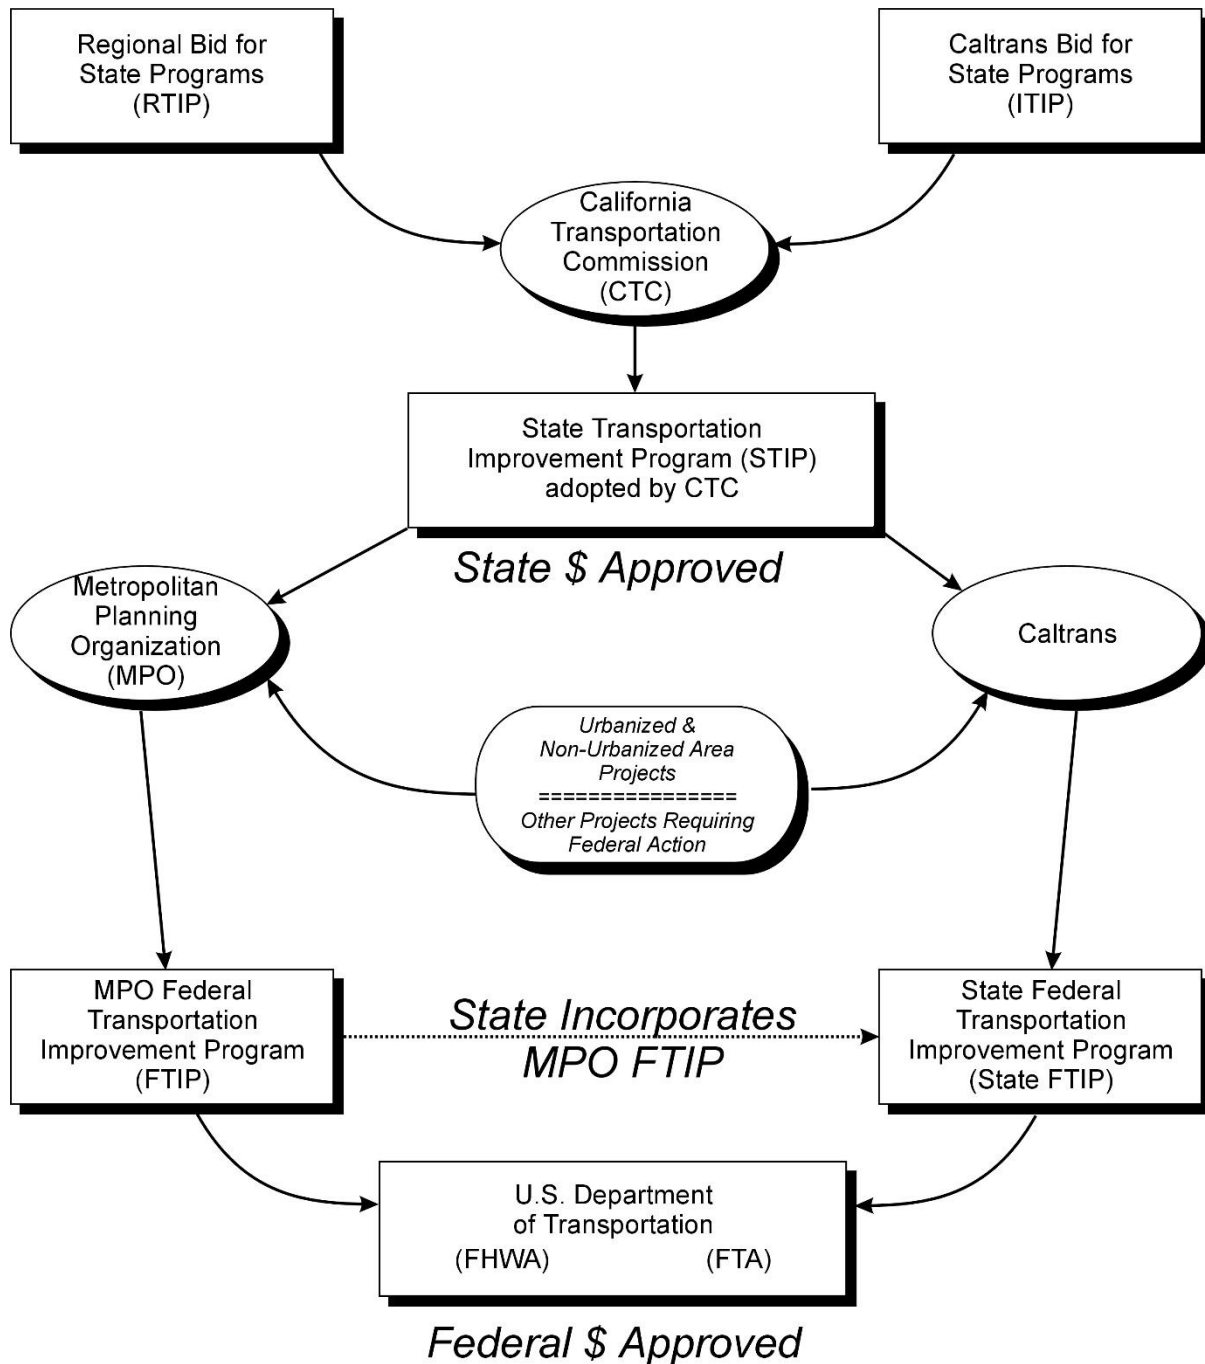

- Communication of the schedule of upcoming amendments and FTIP adoption;
- Special workshops;
- Agency coordination reviewing preliminary draft documents before releasing them for public review;
- Presentations on the draft formal amendments to standing committees and the Policy Board

During the 2025 FTIP development Fresno COG staff reached out to FHWA Federal Lands Management staff to coordinate the connections between major state and county routes in Fresno County that access federal lands. Fresno COG is aware that as demand for open space access continues to grow, planning the access to Federal Lands and publicly owned land will require an ever-increasing amount of interagency coordination and collaboration.

Managers of public lands at every level of government (federal, state, and local) are confronted with seasonal overcrowding in popular locations with a lack of infrastructural capacity which may lead to degraded visitor experience and resource conditions caused by congestion, undesignated parking, and trail crowding. Using the established forums and other engagement opportunities built into Fresno COG's transportation process, Fresno COG partners with FHWA, Caltrans and federal lands managers to incorporate Federal Land Management Agencies (FLMA) project needs and FLTP and FLAP eligible routes into the state and local planning processes.

EXHIBIT 4

FTIP DEVELOPMENT PROCESS

CONSISTENCY WITH OTHER DOCUMENTS

Fresno COG's 2025 FTIP is consistent with the following documents:

- The 2022 RTP, which the Fresno COG Policy Board adopted on July 28, 2022
- The 2024 STIP
- The existing State Implementation Plan (SIP) for air quality for the Fresno County area

The 2025 FTIP is also consistent with county share information as provided within the 2024 STIP fund estimate and also with Federal fund estimates resulting from the passage of IIJA.

AIR QUALITY CONFORMITY ASSESMENT

Fresno County is a designated non-attainment area for ozone and PM2.5, and a maintenance area for PM10 and carbon monoxide. As such, it must satisfy federal requirements to consider transportation control measures to reduce emissions adequate to demonstrate conformity with the SIP for Air Quality. These control measures are set forth in plans, which in cumulative effect with other areas in California make up the SIP.

In nonattainment and maintenance areas, the Federal Highway Administration (FHWA) and Federal Transit Administration (FTA) must be able to find that the FTIP conforms to the adopted SIP and that priority has been given to timely implementation of the transportation control measures found in the SIP. The projects in the FTIP should also not further exacerbate existing air quality problems.

Fresno COG provides a conformity determination documenting that local air quality planning issues and programs are sufficient to demonstrate that transportation control measures have been identified through a legitimate planning process; that these measures have received necessary Federal, State and local commitments to ensure implementation, and; that these commitments are being maintained in the Fresno County RTP and the necessary fund programming in the FTIP.

The Conformity determination is referenced in Appendix G. In brief, the 2025 FTIP has been found to be in conformance with the current applicable SIP for air quality.

TRANSPORTATION PERFORMANCE MANAGEMENT

The current Federal transportation bill, the Infrastructure Investments and Jobs Act (IIJA) requires MPOs to conduct performance-based planning and focus on achieving performance outcomes. FHWA defines transportation performance management (TPM) as a strategic approach that uses system information to make investment and policy decisions to achieve national performance goals. The RTP shall include performance measures and targets, as well as a description of progress made towards the targets. In addition, the FTIP shall provide a description of how its investments will contribute toward achieving transportation performance targets set in the RTP. A detailed analysis on how the FTIP addresses federal requirements for performance measures is included as Appendix N of the 2025 FTIP.

FINANCIAL PLAN

THE FINANCIAL PLAN AND FINANCIAL CONSTRAINT

The FTIP, by law, must be financially constrained and include a financial plan demonstrating how the projects can be implemented while the existing transportation system is being adequately operated and maintained. Only projects for which construction and operation funds can reasonably be expected to be available may be included.

The charts of revenues on the following pages are intended to show available revenues to finance the projects contained within the FTIP, a demonstration of financial constraint. The Federal and State revenue projections are based on the best available data as provided through the California Department of Transportation (Caltrans).

The programs the State adopted in the State Transportation Improvement Program (Regional Choice, Interregional, etc.) are to be in line with the State's available revenue estimates, and the Fresno County FTIP is a reflection of the State's assumptions.

Similarly, Caltrans provides revenue estimates for Federal IJA funds that are made available to the MPO, such as the Surface Transportation Block Grant (STBG) and Congestion Mitigation Air Quality (CMAQ) Improvement programs. Fresno COG has used those estimates for this document.

The local fund commitments are reflected in each entity's local capital improvement program, which is adopted annually by local resolution.

The Measure C funds reflected in the FTIP are drawn from the Measure C Expenditure Plan, which is a financially constrained document adopted by the Fresno County Transportation Authority. The Authority provides and updates any changes associated with incoming tax revenues. Adjustments are being carefully monitored to be representative of the current economy.

For the transit agencies, a financial capacity report is required to assure the continued ability to operate, with assessment certification provided pursuant to the Federal Transit Administration's Circular 7008.1. Because these grants are on an annualized grant cycle, projects shown beyond 2023-24 are "projections". As granting agencies certify funding amounts each new year, these years are formally amended into the FTIP consistent with the actual grants.

Chapter 6 of the 2022 Fresno County RTP provides a more detailed discussion of financial constraint and planning, and that analysis provides the basis for forecasts and assumptions contained in this document. Fresno COG's FTIP is required to be consistent with its long-range plan, the RTP.

PROJECT PRIORITY

In accordance with Federal transportation legislation, Fresno COG establishes the following priority:

1. All project phases shown in the first year of the four-year element (2024-25) must be obligated by June or considered for reprogramming. This group shall have first priority.
2. All projects' phases shown in the second year of the four-year element (2025-26) shall have second priority.

3. All project phases shown in the third year of the four-year element (2026-27) shall have third priority.
4. All project phases shown in the fourth year of the four-year element (2027-28) shall have fourth priority.
5. All projects shown outside the four-year element may be advanced, via an approved FTIP amendment, into the four-year element as long as financial constraint is still maintained.

As a nonattainment area, transportation control measure (TCM) projects for each year, consistent with the approved SIP, will be implemented in a timely fashion. A list of TCM projects can be found in Appendix K.

The prioritization of projects in the FTIP takes into consideration the planning factors identified in the IJJA as well as the application of asset management principles and techniques.

Federal law requires Fresno COG to publish for public review an annual listing of projects for which Federal funds have been obligated in the preceding year, as a record of project delivery and a progress report for public information and disclosure. Obligation refers to the Federal government's commitment to pay or reimburse the lead agency for the federal share of a project's cost. Obligation does not indicate expenditure or project completion; only that the project has been approved for Federal reimbursement. Appendix M includes a detailed annual listing report of projects that are divided into the funding types that FHWA and FTA administer. This report indicates that approximately \$141 million in federal funds were obligated for transportation projects in the region between October 1, 2022, and September 30, 2023. The report also includes investments in pedestrian walkways and bicycle transportation facilities, for which federal funds have been obligated.

TOTAL PROJECT COST

Per CFR 450.324(e) (2), Fresno COG has programmed all phases, and all costs, including (information only) years outside of the quadrennial period. This is done to show total project cost for every project. Unless otherwise noted in a "Comments" field, it can be assumed that the "Total Project Cost" field represents this total project cost amount.

YEAR OF EXPENDITURE

Per Title 23, Section 450.324(h), project costs in the Financial Summary are shown in year of expenditure dollars, meaning that a project shown as \$1 million in 2025 is expected to cost \$1 million in that year, in inflated dollars. If a project's cost increases when obligated, the agencies that control funding decisions must take further action to approve increased funding amounts.

Fresno COG manages CMAQ and STBG program funds. Applicants applying for these funds are required to account for an inflation rate in their delivery schedules that is consistent with both the five-year California Consumer Price Index and the historical inflation rate of projects within District 6 delivered over the past 20 years as part of the Measure C program. Projects funded by local agencies and Measure C projects are also required to assume an appropriate inflation rate. For projects Caltrans implements and oversees, Fresno COG relies on State methodology.

Expenditure rates for all transit-related projects are fully described in the Fresno-Clovis Urbanized Area Short-Range Transit Plan and Short-Range Transit Plan for the Rural Fresno County Area.

SYSTEM PRESERVATION, OPERATION, AND MAINTENANCE COSTS

Per CFR 450.324(h), the financial plan must contain estimates of costs and revenue sources that are reasonably expected to be available to adequately operate and maintain Federal-aid highways and public transportation. The FTIP includes projects that address system operations and maintenance.

Appendix H provides a listing of anticipated expenditures and revenues as derived from the California State Controller's Office Local Government Financial Data website at <https://bythenumbers.sco.ca.gov>: Streets and Roads Revenues and Expenditures links using a three-year average of FY 2021/2022 data. An estimated \$788,283,908 will be collected and spent on maintenance in the Fresno County region between FFY 24/25 and FFY 27/28. Within the 2025 FTIP, the SHOPP program dedicates \$261,931,000 to address maintenance on State-managed roadways.

Transit operations and maintenance costs are projected in the regional short-range transit plans. The three transit agencies project collectively receiving \$552,994,050 and expending \$492,973,280 on operations over the next four years. In the event of revenue shortfalls, sources such as STBG, CMAQ and toll credits can help with any funding gaps. STBG and CMAQ funding apportionments, later described in this FTIP document, are programmed to system preservation, operation, improvement, and maintenance projects. Fresno County's local transportation measure (Measure C) can also help alleviate any potential funding gaps.

RESOLUTION NO. 2024-12**

**RESOLUTION ADOPTING THE FRESNO COUNCIL OF GOVERNMENTS
2025 FTIP, 2022 RTP AMENDMENT No. 4
AND CORRESPONDING CONFORMITY ANALYSIS**

WHEREAS, the [Fresno Council of Governments] is a Regional Transportation Planning Agency and a Metropolitan Planning Organization, pursuant to State and Federal designation; and

WHEREAS, federal planning regulations require Metropolitan Planning Organizations to prepare and adopt a long range Regional Transportation Plan (RTP) for their region; and

WHEREAS, a 2022 Regional Transportation Plan Amendment No. 4 (2022 RTP Amendment No. 4) has been prepared in full compliance with federal guidance; and

WHEREAS, a 2022 Regional Transportation Plan Amendment No. 4 has been prepared in accordance with state guidelines adopted by the California Transportation Commission; and

WHEREAS, federal planning regulations require that Metropolitan Planning Organizations prepare and adopt a short range Federal Transportation Improvement Program (FTIP) for their region; and

WHEREAS, the 2025 Federal Transportation Improvement Program (2025 FTIP) has been prepared to comply with Federal and State requirements for local projects and through a cooperative process between the Federal Highway Administration (FHWA), the Federal Transit Administration (FTA), the State Department of Transportation (Caltrans), principal elected officials of general purpose local governments and their staffs, and public owner operators of mass transportation services acting through the Fresno Council of Governments forum and general public involvement; and

WHEREAS, the 2025 FTIP program listing is consistent with: 1) the 2022 Regional Transportation Plan Amendment No. 4; 2) the 2022 State Transportation Improvement Program; and 3) the corresponding Conformity Analysis; and

WHEREAS, the 2025 FTIP contains the MPO's certification of the transportation planning process assuring that all federal requirements have been fulfilled; and

WHEREAS, the 2025 FTIP and 2022 RTP Amendment No. 4 meet all applicable transportation planning requirements per 23 CFR Part 450; and

WHEREAS, Fresno Council of Governments has integrated into its metropolitan transportation planning process, directly or by reference, the goals, objectives, performance measures, and targets described in other State transportation plans and transportation processes, as well as any plans developed under 49 U.S.C. Chapter 53 by providers of public transportation, required as part of a performance-based program; and

WHEREAS, projects submitted in the 2025 FTIP and 2022 RTP Amendment No. 4 must be financially constrained and the financial plan affirms that funding is available; and

WHEREAS, the MPO must demonstrate conformity per 40 CFR Part 93 for the RTP and FTIP; and

WHEREAS, the Corresponding Conformity Analysis supports a finding that the 2025 FTIP and 2022 RTP Amendment No. 4 meet the air quality conformity requirements for ozone and particulate matter; and

WHEREAS, the 2025 FTIP and 2022 RTP Amendment No. 4 do not interfere with the timely implementation of the Transportation Control Measures; and

WHEREAS, the 2025 FTIP and 2022 RTP Amendment No. 4 conform to the applicable SIPs; and

WHEREAS, the documents have been widely circulated and reviewed by Fresno Council of Governments advisory committees representing the technical and management staffs of the member agencies; representatives of other governmental agencies, including State and Federal; representatives of special interest groups; representatives of the private business sector; and residents of Fresno County consistent with public participation process adopted by Fresno Council of Governments; and

WHEREAS, a public hearing was conducted on June 12, 2024, to hear and consider comments on the 2025 FTIP, 2022 RTP Amendment No. 4, and corresponding Conformity Analysis;

NOW, THEREFORE, BE IT RESOLVED, that Fresno Council of Governments adopts the 2025 FTIP, 2022 RTP Amendment No. 4, and the corresponding Conformity Analysis.

BE IT FURTHER RESOLVED, that the Fresno Council of Governments finds that 2025 FTIP and 2022 RTP Amendment No. 4 are in conformity with the requirements of the Federal Clean Air Act Amendments and applicable State Implementation Plans for air quality.

THE FOREGOING RESOLUTION was passed and adopted by Fresno Council of Governments this 25th day of July 2024.

AYES: Clovis, Coalinga, Firebaugh, Fresno City, Huron, Kerman, Kingsburg,
Orange Cove, Parlier, Reedley, Sanger, San Joaquín, Selma, Fresno County.

NOES: None.

ABSTAIN: None.

ABSENT: Mendota, Fowler.

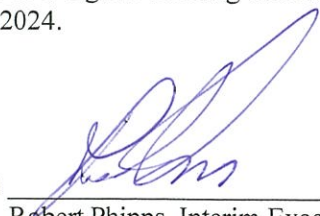

ATTEST:

Signed:

Alma Beltran, Chairman

I hereby certify that the foregoing is a true copy of a resolution of the Fresno Council of Governments duly adopted at a regular meeting thereof held on the 25th day of July 2024.

Signed:

Robert Phipps, Interim Executive Director

Financial Capacity Assessment Certification Statement

The Fresno Council of Governments, acting as Fresno County's designated Metropolitan Planning Organization, hereby certifies that Fresno Area Express has performed a financial capacity assessment and that financial capacity exists to undertake the programmed projects within the Federal Transportation Improvement Program. For further information regarding financial capacity of Fresno Area Express, reference is made to the FY2024-2028 Fresno Area Express Capital Improvement Program.

This certification is in conformance with FTA Circular 7008.1

Robert Phipps

1.00 SAFETY PROGRAMS

- 1.01 Railroad/highway crossing
- 1.02 Hazard Elimination Program
- 1.03 Safer non-Federal-aid system roads
- 1.04 Shoulder improvements
- 1.05 Increasing sight distance
- 1.06 Safety Improvement Program
- 1.07 Traffic control devices and operating assistance other than signalization projects
- 1.08 Railroad/highway crossing warning devices
- 1.09 Guardrails, median barriers, crash cushions
- 1.10 Pavement resurfacing and/or rehabilitation
- 1.11 Pavement marking demonstration
- 1.12 Emergency Relief (23 U.S.C. 125)
- 1.13 Fencing
- 1.14 Skid treatments
- 1.15 Safety roadside rest areas
- 1.16 Adding medians
- 1.17 Truck climbing lanes outside the urbanized area
- 1.18 Lighting improvements
- 1.19 Widening narrow pavements or reconstructing bridges (no additional travel lanes)
- 1.20 Emergency truck pullovers

2.00 MASS TRANSIT

- 2.01 Operating assistance to transit agencies
- 2.02 Purchase of support vehicles
- 2.03 Rehabilitation of transit vehicles
- 2.04 Purchase of office, shop, and operating equipment for existing facilities
- 2.05 Purchase of operating equipment for vehicles (e.g. radios, fareboxes, lifts, etc.)
- 2.06 Construction or renovation of power, signal, and communications systems
- 2.07 Construction of small passenger shelters and information kiosks
- 2.08 Reconstruction or renovation of transit buildings and structures
- 2.09 Rehabilitation or reconstruction of track structures, track, and trackbed in existing right-of-way
- 2.10 Purchase of new buses and rail cars to replace existing vehicles or for minor expansions of fleet
- 2.11 Construction of new bus, rail storage/maintenance facilities categorically excluded (23 CFR 771)

3.00 AIR QUALITY

- 3.01 Continuation of ride-sharing and van-pooling promotion activities at current levels
- 3.02 Bicycle and pedestrian facilities

4.00 LANDSCAPING/SIGNS

- 4.01 Specific activities which do not involve or lead directly to construction
- 4.02 Grants for training and research

- 4.03 Planning activities conducted pursuant to titles 23 and 49 U.S.C.
- 4.04 Federal Aid systems revisions
- 4.05 Engineering to assess social, economic, and environmental effects of the proposed action or alternatives to that action
- 4.06 Noise attenuation
- 4.07 Emergency or hardship advance land acquisitions [23 CFR 712.204(d)]
- 4.08 Acquisition of scenic easements
- 4.09 Plantings, landscape, etc.
- 4.10 Sign removal
- 4.11 Directional and informational signs
- 4.12 Transportation enhancement activities (excepting rehabilitation and operation of historic transportation buildings, structures, or facilities)
- 4.13 Repair of damage caused by natural disasters, civil unrest, or terrorist acts, except projects involving substantial functional, locational or capacity

- 5.00 OTHER**
- 5.01 Intersection channelization projects
- 5.02 Intersection signalization projects and individual intersections
- 5.03 Changes in vertical and horizontal alignment
- 5.04 Interchange reconfiguration projects
- 5.05 Truck size and weight inspection stations
- 5.06 Bus terminals and transfer points
- 5.07 Traffic signal synchronization projects

FEDERAL PROGRAMS

Active Transportation Infrastructure Investment Program (ATIIP)

The Active Transportation Infrastructure Investment Program (ATIIP) is a new competitive grant program created by the Bipartisan Infrastructure Law to construct projects to provide safe and connected active transportation facilities in active transportation networks or active transportation spines.

ATIIP projects will help improve the safety, efficiency, and reliability of active transportation networks and communities; improve connectivity between active transportation modes and public transportation; enhance the resiliency of on- and off-road active transportation infrastructure; help protect the environment; and improve quality of life in disadvantaged communities through the delivery of connected active transportation networks and expanded mobility opportunities.

Carbon Reduction Program

The Carbon Reduction Program (CRP) provides funds for projects designed to reduce transportation emissions and is defined as carbon dioxide (CO₂) emissions from on-road highway sources. CRP funds may be obligated for projects that support the reduction of transportation emissions. Eligible project types include:

- traffic monitoring, management, and control facility or program, including advanced truck stop.
- Replacement of street lighting and traffic control devices with energy-efficient alternatives
- acquisition, installation, or operation of publicly accessible electric vehicle charging infrastructure or hydrogen, natural gas, or propane vehicle fueling infrastructure.
- purchase or lease of zero-emission construction equipment and vehicles, including the acquisition, construction, or leasing of required supporting facilities.

Congestion Mitigation and Air Quality

The Congestion Mitigation and Air Quality (CMAQ) Improvement Program provides a flexible funding source to state and local governments for transportation projects and programs to help meet the requirements of the Federal Clean Air Act. Funding is available for areas that do not meet the National Ambient Air Quality Standards (non-attainment areas), as well as former non-attainment areas that are now in compliance (maintenance areas). Funds are distributed to states based on a formula that considers an area's population by county and the severity of its air quality problems within the non-attainment or maintenance area.

Under MAP-21, projects or programs eligible for CMAQ funding were those which would contribute to attainment of National Ambient Air Quality Standards for ozone and carbon monoxide. Under the FAST Act, this was expanded to allow CMAQ funding to be expended in fine particulate matter (PM_{2.5}) non-attainment and maintenance areas. In fact, PM_{2.5} nonattainment or maintenance areas must use a portion of its funds to address PM_{2.5} emissions in such areas. The FAST Act highlighted diesel retrofits and port related equipment and vehicles as eligible projects to mitigate PM_{2.5}. Typical projects include:

- Public transit improvements
- High Occupancy Vehicle (HOV) lanes
- Employer-based transportation management plans and incentives
- Traffic flow improvement programs (signal coordination)
- Fringe parking facilities serving multiple occupancy vehicles

- Shared ride services
- Bicycle and pedestrian facilities
- Flexible work-hour programs
- Alternative fuel vehicles

Community Project Funding/ Congressionally Directed Spending (CPFCDs)

CPFCDs is appropriated and allocated from the General Fund for Transit Infrastructure Grants only on an annual basis and at the discretion of Congress. The total funding amounts are specified in the Consolidated Appropriations Act corresponding with each fiscal year, if applicable. Expenses for these projects that are eligible under FTA's authorizing language in federal law (Chapter 53 of Title 49, United States Code) are eligible for reimbursement.

Coronavirus Response and Relief Supplemental Appropriations Act of 2021 (CRRSAA)

Under this Act, COVID Relief Funds may be used for a broad range of surface transportation purposes listed in Section 113(b) of Title 23 of the U.S. Code and are meant to "prevent, prepare for, and respond to coronavirus." Specifically, the Act allows states to cover revenue losses and allows COVID Relief Funds to be used on new or existing projects, and for preventive and routine maintenance; operations; personnel; salaries; contracts; debt service payments; and availability payments; as well as transfers to public tolling agencies. Eligible project types include:

- Projects that are eligible under the Surface Transportation Block Grant Program (new and existing)
- Routine maintenance/rehabilitation projects (new and existing)
- Projects funding operations
- Projects funding personnel - including salaries of employees or contractors.
- Debt service payments; availability payments and coverage for other revenue losses

Earmark Repurposing

On April 29, 2021, FHWA issued guidance on the implementation of Earmark repurposing provisions contained in the Department of Transportation Appropriations Act, 2021.

The 2021 Appropriations Act allows States to repurpose any earmark that was designated anytime and is Less than 10 percent obligated or final vouchered and closed.

The repurposed funds may be obligated on a new or existing project in the State within 25 miles of the earmark designation. The project must be an eligible project under the Surface Transportation Block Grant Program (STBG).

Federal Transit Administration Section 5307 (Urbanized Area Formula Program)

This program provides financial operating and capital purchase assistance to operators of urban public transportation services. Funds are apportioned to urbanized areas with populations over 50,000 based on a formula using population and population density. Pursuant to the FAST Act, job access and reverse commute projects that are located in urbanized areas are now eligible for funding under this program.

Federal Transit Administration Section 5309 (Capital Investment Grants)

Under SAFETEA-LU, FTA New Starts Funds Capital Investment Program Section 5309 provided capital funding for new and replacement buses and facilities, modernization of existing rail systems, and new fixed guideway systems. Under the FAST Act, new and replacement buses and

facilities are eligible under the new Section 5339 program. However, FAST Act's 5309 grant program still provides funding for new fixed guideways or extensions to fixed-guideways (projects that operate on a separate right-of-way exclusively for public transportation, bus rapid transit projects, and projects that improve capacity on an existing fixed-guideway system). These programs are allocated on a discretionary basis.

Federal Transit Administration Section 5310 (Enhanced Mobility of Seniors and Individuals with Disabilities)

This program provides funding to private non-profit corporations for capital expenses to support the provision of transportation services to meet the needs of elderly and disabled persons. Capital assistance is provided for up to 88.53% of the net project cost. Under the FAST Act, projects that were formerly eligible for funding under SAFETEA-LU's New Freedom, Section 5317 grant program are now eligible for Section 5310 funds.

Federal Transit Administration Section 5311 (Formula Grants for Rural Areas)

This program provides formula-based funding through the State to urban areas with a population fewer than 50,000. The funds are for capital and/or operating assistance. Job access and reverse commute projects, which are located in non-urbanized areas, are now eligible for these funds under the FAST Act.

Capital assistance is provided for up to 88.53% of the net project cost. Operational assistance has a 50% federal participation ceiling.

Federal Transit Administration Section 5339 (Bus and Bus Facilities Program)

This program provides capital funding to replace, rehabilitate and purchase buses and related equipment and to construct bus-related facilities. Created under the FAST Act, this program replaces components of SAFETEA-LU's former Section 5309 Bus and Bus Facilities program.

High Priority Projects Program

A demonstration (demo) project is specifically established and funded by Congress through Federal law. Demo projects are generally provided as part of the periodic transportation authorization acts or the annual transportation appropriations acts. The designated funding can only be used for projects as described in the law; however, demo projects may be any type of transportation project depending on the particular emphasis put forth in the solicitation for projects.

Highway Bridge Program

The purpose of the Highway Bridge Program (HBP) is to replace or rehabilitate public highway bridges over waterways, other topographical barriers, other highways, or railroads when the State and the Federal Highway Administration determine that a bridge is significantly important and is unsafe because of structural deficiencies, physical deterioration, or functional obsolescence. Eligible bridge projects include replacement, rehabilitation, painting, scour countermeasure, bridge approach barrier and railing replacement, low water crossing replacement, and ferry service replacement.

Highway Infrastructure Program

HIP was created in Section 122 in Division A of the 2010 Consolidated Appropriations Act, with the intent to specifically fund the “restoration, repair, construction, of federal aid eligible roads, bridges, and tunnels.”

On March 23, 2018, Congress passed the Consolidated Appropriations Act of 2018, which was subsequently signed into law. This omnibus 2018 FFY spending bill to fund the US federal government included the Department of Transportation Appropriations Act, which again funded the HIP to construct highways and bridges. Additional HIP funding was added in 2019 and the eligible expenses were expanded to allow for the “elimination of hazards and the installation of protective devices at railway-highway crossings.” The program was again expanded in 2020 to projects providing “necessary charging infrastructure along corridor-ready or corridor-pending alternative fuel corridors.” The final 2021 expansion provided for projects/activities eligible under section 133(b) of title 23, U.S.C, and to provide necessary charging infrastructure along corridor-ready or corridor-pending alternative fuel corridors.

Highway Safety Improvement Program

The FAST Act continues the Highway Safety Improvement Program (HSIP) to achieve a significant reduction in traffic fatalities and serious injuries on all public roads, including non-State-owned public roads and roads on tribal lands. The HSIP requires a data-driven, strategic approach to improving highway safety on all public roads that focuses on performance.

A highway safety improvement project is any strategy, activity or project on a public road that is consistent with the data-driven State Strategic Highway Safety Plan (SHSP) and corrects or improves a hazardous road location or feature or addresses a highway safety problem. HSIP funds are eligible for work on any public road or publicly owned bicycle or pedestrian pathway or trail, or on tribal lands for general use of tribal members, that corrects or improves the safety for its users. The twenty-four project categories are broad in nature and are listed under 23 U.S.C. §148(a) (4) (B). Workforce development, training, and education activities are also an eligible use of HSIP funds.

National Highway Performance Program

The National Highway Performance Program (NHPP) provides support for the condition and performance of the National Highway System (NHS), for the construction of new facilities on the NHS, and to ensure that investments of Federal-aid funds in highway construction are directed to support progress toward the achievement of performance targets established in a State's asset management plan for the NHS. NHPP projects must be on an eligible facility and support progress toward achievement of national performance goals for improving infrastructure condition, safety, mobility, or freight movement on the NHS, and be consistent with Metropolitan and Statewide planning requirements.

Rebuilding American Infrastructure with Sustainability and Equity (Previously BUILD & TIGER)

The Rebuilding American Infrastructure with Sustainability and Equity, or RAISE Discretionary Grant program, provides a unique opportunity for the DOT to invest in road, rail, transit, and port projects that promise to achieve national objectives. Previously known as the Better Utilizing Investments to Leverage Development (BUILD) and Transportation Investment Generating Economic Recovery (TIGER) Discretionary Grants, Congress has dedicated nearly \$14.3 billion for fifteen rounds of National Infrastructure Investments to fund projects that have a significant local or regional impact. In each competition, DOT receives hundreds of applications to build and repair critical

pieces of our freight and passenger transportation networks. The RAISE program enables DOT to examine these projects on their merits to help ensure that taxpayers are getting the highest value for every dollar invested.

The eligibility requirements of RAISE allow project sponsors at the State and local levels to obtain funding for multi-modal, multi-jurisdictional projects that are more difficult to support through traditional DOT programs. RAISE can provide funding directly to any public entity, including municipalities, counties, port authorities, tribal governments, MPOs, or others in contrast to traditional Federal programs which provide funding to very specific groups of applicants (mostly State DOTs and transit agencies). This flexibility allows RAISE and our traditional partners at the State and local levels to work directly with a host of entities that own, operate, and maintain much of our transportation infrastructure, but otherwise cannot turn to the Federal government for support.

Surface Transportation Program/Surface Transportation Block Grant Program

The Surface Transportation Program (STP) was established by the 1991 Federal Intermodal Surface Transportation Efficiency Act (ISTEA) and is continued by the FAST Act. However, under the FAST Act, STP was renamed the Surface Transportation Block Grant Program (STBGP). These funds may be used by states and localities for projects on any federal-aid highway, including the National Highway System (NHS), bridge projects on any public road, transit capital projects, and public bus terminals and facilities. Funds are distributed among the states based on lane miles of Federal-aid highways, (including on the NHS), total vehicle-miles traveled on those Federal-aid highways, and estimated contributions to the Highway Account of the Highway Trust Fund. The State sub-allocates the funds to the regions based on population and serves as Fresno COG's Regional Surface Transportation Program (RSTP). Eighty percent of the apportionment is distributed among the urbanized and non-urbanized areas of the State through Metropolitan Planning Organizations (MPOs) and Regional Transportation Planning Agencies (RTPAs). Eligible projects include but are not limited to:

- Highway projects
- Bridges (including construction, reconstruction, seismic retrofit and painting) on all public roads
- Transit capital improvements
- Carpool, bicycle and pedestrian facilities
- Safety improvements and hazard elimination
- Research and traffic management systems
- Planning
- Transportation enhancement activities and control measures
- Safety improvements and bridge replacement projects on local roads and rural minor collectors

STATE PROGRAMS

Active Transportation Program

The California Active Transportation Program (ATP) was created by Senate Bill 99 (Chapter 359, Statutes 2013) and Assembly Bill 101 (Chapter 354, Statutes 2013), to encourage increased use of active modes of transportation, such as biking and walking, as well as to ensure compliance with the federal transportation authorization. The goals of the ATP are to: increase the proportion of trips accomplished by biking and walking, increase the safety and mobility of non-motorized users,

advance the active transportation efforts of regional agencies to achieve greenhouse gas reduction goals, enhance public health, ensure that disadvantaged communities fully share in the benefits of the program, and provide a broad spectrum of projects to benefit many types of active transportation users. The ATP is funded from Federal Transportation Alternative Programs, Federal Highway Safety Improvement Program, and State Highway Account.

Local Transportation Funds

Local Transportation Funds (LTF) are derived from 1/4 cent of the statewide sales tax. LTF revenue is returned to local governments for transportation purposes with public transportation being the primary focus. This money comes back to local governments for funding of bicycle and pedestrian facilities, public transportation, or streets and roads. The LTF is distributed to each city and unincorporated area based on population.

In the San Joaquin Valley, LTF funds may be used for both transit and streets and roads purposes as long as all reasonable transit needs are addressed. The City of Fresno currently uses all of its LTF funds for public transit, although Fresno County and the remaining cities in the county use some LTF funds for roads. LTF is one of the principle sources of public subsidies for Fresno Area Express (FAX).

Low Carbon Transit Operations Program (LCTOP)

The Low Carbon Transit Operations Program (LCTOP) is one of several programs that are part of the Transit, Affordable Housing, and Sustainable Communities Program established by the California Legislature in 2014 by Senate Bill 862.

The LCTOP was created to provide operating and capital assistance for transit agencies to reduce greenhouse gas emission and improve mobility, with a priority on serving disadvantaged communities. Approved projects in LCTOP will support new or expanded bus or rail services, expand intermodal transit facilities, and may include equipment acquisition, fueling, maintenance and other costs to operate those services or facilities, with each project reducing greenhouse gas emissions. For agencies whose service area includes disadvantaged communities, at least 50 percent of the total moneys received shall be expended on projects that will benefit disadvantaged communities.

Public Transportation Modernization, Improvement, and Service Enhancement Account (PTMISEA)

PTMISEA was created by Proposition 1B, the Highway Safety, Traffic Reduction, Air Quality, and Port Security Bond Act of 2006. PTMISEA funds may be used for transit rehabilitation, safety or modernization improvements, capital service enhancements or expansions, new capital projects, bus rapid transit improvements, or rolling stock (buses and rail cars) procurement, rehabilitation or replacement.

Senate Bill 1 – Road Repair and Accountability Act of 2017

Senate Bill 1, the Road Repair and Accountability Act of 2017, was signed into law on April 28, 2017. This legislative package invests \$54 billion over a decade to fix roads, freeways and bridges in communities across California and puts more dollars toward transit and safety. These funds are split equally between state and local investments that include maintenance and rehabilitation of the State Highway System, new funding for transit agencies, Maintaining and Repairing the State's Bridges and Culverts, a Trade Corridor Enhancement Program, repairs to local streets and roads, Solutions for Congested Corridors Program, matching funds for local agencies, local planning grants, bike and pedestrian projects, freeway service patrol, workforce training programs, and transportation-related research at state universities.

As approved by the voters in the November 2006 general elections, Proposition 1B enacts the Highway Safety, Traffic Reduction, Air Quality, and Port Security Bond Act of 2006 to authorize \$19.925 billion of state general obligation bonds for specified purposes, including high-priority transportation corridor improvements, State Route 99 corridor enhancements, school bus retrofit and replacement purposes, state transportation improvement program augmentation, transit and passenger rail improvements, state-local partnership transportation projects, transit security projects, local bridge seismic retrofit projects, highway-railroad grade separation and crossing improvement projects, state highway safety and rehabilitation projects, and local street and road improvement, congestion relief, and traffic safety.

It is important to note that this 5-year program is now coming to an end; the funds have all been allocated and fund recipients are closing out all Prop 1B projects.

State and Local Partnership Program (SB-1))

Senate Bill 1 created the Local Partnership Program and continuously appropriates \$200 million annually from the Road Maintenance and Rehabilitation Account to local and regional transportation agencies that have sought and received voter approval of taxes or that have imposed fees, which taxes or fees are dedicated solely for transportation improvements. The Local Partnership Program provides funding to local and regional agencies to improve aging infrastructure, road conditions, active transportation, transit and rail, and health and safety benefits. The Local Partnership Program funds are distributed through a 40% statewide competitive component and a 60% formulaic component.

Trade Corridor Enhancement Program (TCEP):

\$300 million has been slated annually from a new fund for projects related to the routes and transportation infrastructure vital to California's trade and freight economy. The Trade Corridor Enhancement Program (TCEP) will focus on projects nominated by local agencies and the state that will make improvements to highways so they can more efficiently handle and move freight, freight rail system improvements, enhancements to the capacity and efficiency of ports, truck corridor improvements (such as dedicated truck facilities or truck toll facilities), border access improvements, and surface transportation, local roads and connector road improvements to help move goods from California's ports.

Solutions for Congested Corridors Program (SCCP):

SB 1 created the Solutions for Congested Corridors Program (SCCP), providing \$250 million annually to multimodal corridor plans that make performance improvements along the state's busiest highways. SB 1 also provides funding for additional programs that help address congestion through their investments.

State of Good Repair (SGR):

SB 1 created The State of Good Repair program (SGR), to provide additional revenues for transit infrastructure repair and service improvements. Funding is made available for eligible transit maintenance, rehabilitation and capital projects.

State Highway Operation and Protection Program

The purpose of the State Highway Operation and Protection Program (SHOPP) is to maintain the operational integrity and safety of the State highway system. It includes State highway safety and rehabilitation projects, seismic retrofit projects, land and building projects, landscaping, some operational improvements, bridge replacement, and the Minor Program - generally those types of projects that Caltrans as the owner-operator of the system must do to maintain the integrity of the

system. Unlike STIP projects, SHOPP projects may not increase roadway capacity. There is no formula for allocating SHOPP revenues, which presents a degree of uncertainty. The Fresno County region could receive a large share of revenues in one cycle, then much less in future cycles.

SHOPP projects are provided to Fresno COG by Caltrans and are selected in accordance with Government Code Section 14526.5, Streets and Highways Code Section 164.6, and the strategies outlined in the Department's Policy for Management of the SHOPP. Projects are also funded through competitive grant programs, which are specifically identified in legislation. These projects are programmed consistent with the information contained within the official notification of funding award received by Fresno COG.

State Transportation Improvement Program

The State Transportation Improvement Program (STIP) is split into two programs: the Regional Transportation Improvement Program (RTIP) and the Interregional Improvement Program (IIP). Pursuant to SB-45, 75% of the overall STIP funding goes to regional authorities to pay for accepted RTIP projects, and the remaining 25% of the overall STIP funding is used to pay for IIP projects, as determined by Caltrans. Once the Fresno County region has selected the projects for the RTIPs, the California Transportation Commission (CTC) must allocate funds for the projects based on estimated construction costs. The funds are programmed by in the Federal Transportation Improvement Programs (FTIP) for inclusion in the State Transportation Improvement Program (STIP). Pursuant to SB-45, allocations of Regional Choice funds are known as "County Shares" and replace the previous "County Minimums." Eligible projects include:

- Local streets and roads
- Public transit and Intercity transit
- Pedestrian and bikeway facilities
- State highway improvements
- Grade separations
- Intermodal facilities
- Safety projects
- Transportation System Management projects
- Sound walls

Interregional Improvement Program (see above)

Interregional Improvement Program (IIP) funds represent 25% of available State Highway Account funding. The funds are programmed by Caltrans on a statewide priority basis, for use primarily on the State highway system (outside urbanized areas). Regional agencies may also nominate projects that generate economic development (may be inside metropolitan areas). Regional agencies may nominate projects if they can show better cost-effective use of funds. Eligible projects include:

- Interregional roads (outside of metropolitan areas)
- Interstate 5
- State Highways 41, 99, 168, 198 and 180 east
- Intercity rail
- "Flex" projects which promote economic development

State Transit Assistance Fund

The State Transit Assistance fund (STA) is derived from a portion of the Motor Vehicle Fuel Tax. The STA supports public transportation services, and is apportioned through the RTPA to their member

agencies on a population basis, although some funds are apportioned directly to transit operators based on their fare box revenues. STA funds may be used for mass transit (capital or operating expenses) or transportation planning. Passage of Proposition 116 disallows use of STA funds for streets and roads.

Transit and Intercity Rail Capital Program (TIRCP)

TIRCP was created by Senate Bill (SB) 862 to provide grants from the Greenhouse Gas Reduction Fund (GGRF) to fund transformative capital improvements that will modernize California's intercity, commuter, and urban rail systems, and bus and ferry transit systems to significantly reduce emissions of greenhouse gases, vehicle miles traveled, and congestion. Assembly Bill 398 extended the Cap and Trade Program that supports the TIRCP from 2020 through 2030. SB 1 continues to provide a historic funding increase for transportation with funds directed to the TIRCP from the Public Transportation Account for new programming to achieve the following objectives:

- Reduction in greenhouse gas emissions;
- Expand and improve transit service to increase ridership;
- Integrate the rail service of the state's various rail operations, including integration with the high-speed rail system
- Improve transit safety

LOCAL PROGRAMS

Local Funds (Agency Funds, City Funds, County Funds, Developer Fees, and Private Funds)

There are a number of local transportation funding sources which have their origins in city or county sources. These include general fund revenues used for street purposes, revenues derived from use of gas tax, proceeds from bond sales for street purposes, street assessment levies and traffic safety fund revenues used for street purposes.

Fresno County Local Sales Tax— (Measure "C" Funds)

In 2006 voters of Fresno County approved a 20-year extension of a 1/2 percent local sales tax (Measure "C") for transportation purposes. The twenty-year tax is projected to generate approximately \$1.7 billion in funding to be expended through the Fresno County Transportation Authority (FCTA). As the designated RTPA for Fresno County, Fresno COG is legislatively responsible for preparing an expenditure plan for use of the highway revenues.

Of the approximately \$1.4 billion total to be collected over 20 years at least 34.6% of the tax will be allocated to local agencies for a wide variety of transportation programs and projects on their respective local transportation networks. The FCTA's oversight of these funds involves identifying the amount of funding to be made available to the local agencies, managing the claims process, and annually auditing to insure that the funds were used for eligible transportation purposes.

"Measure C-Local" funds are distributed to Fresno COG's member agencies based on their respective population. "Measure C-Regional" funds are used for projects that are voted on by the public and subsequently prioritized.

Regional Transportation Mitigation Fee

The Regional Transportation Mitigation Fee (RTMF) is an important part of the Measure "C" Extension approved by Fresno County voters in 2006. The RTMF is intended to ensure that future development contributes to its fair share towards the cost of infrastructure to mitigate the cumulative, indirect regional transportation impacts of new growth in a manner consistent with the provisions of the State

of California Mitigation Fee Act. The fees will help fund improvements needed to maintain the target level of service in the face of higher traffic volumes brought on by new developments.

APPENDIX C

FTIP AMENDMENT PROCEDURES

FTIP AMENDMENT PROCEDURES

The Fresno Council of Governments (Fresno COG) as a federally designated Metropolitan Planning Organization (MPO) adopts a Federal Transportation Improvement Program (FTIP) that includes projects and sets priorities for federal transportation funding. Federal regulations require fairly strict adherence to the projects and priorities (schedules) contained within the adopted FTIP. FTIP amendments are used to make any necessary changes to the document or to projects within the document.

Federal regulations [Title Code 23 of Federal Regulations Part 450.332-c] provide MPOs the ability to adjust FTIP project schedules and make minor changes without the need for an amendment. Under current circumstances, FTIP change approvals have been delegated by Caltrans to the Fresno COG Executive Director and can be approved without formal Policy Board review. The Fresno COG Policy Board has adopted “Amendment-Director Delegation” and “Administrative Modification” procedures providing this flexibility. Also, on May 10, 2012, with the acknowledgment of the Fresno COG Policy Board, the California Department of Transportation (Caltrans) delegated to the Fresno COG Executive Director the authority to approve Administrative Modifications to the Federal Statewide Transportation Improvement Program (FSTIP)/ FTIP. This delegated authority is in accordance with the revised FSTIP/FTIP Amendment and Administrative Modification procedures. Fresno COG’s amendment procedures are as follows.

Amendment Type 1

Administrative Modifications

Administrative modifications include minor changes to project cost, schedule, or funding sources. Administrative modifications only require approval by Fresno COG. State and Federal agencies are notified, but do not take approval action on Administrative Modifications. They are posted on Fresno COG’s website at the time of action and are later posted on Caltrans’ website.

Amendment Type 2

Amendment – Funding Changes

Type 2 amendments primarily include project cost changes that are greater than minor changes identified under Administrative Modification procedures. Type 2 amendments require approval by Fresno COG, Caltrans, and FHWA. A publicly accessible notification of a Type 2 amendment is posted on Fresno COG’s website at least seven days prior to action and distributed to local agency partners through Fresno COG’s standing committees. Fresno COG will consider public comments on the amendment prior to approval action.

Amendment Type 3

Amendment – Exempt Projects

Type 3 amendments primarily include adding or deleting projects that are exempt from regional air quality emissions analyses. These amendments typically include transit or safety projects. Type 3 amendments require approval by Fresno COG, Caltrans, and FHWA. Public notification of a Type 3 amendment is posted on Fresno COG’s website at least seven days prior to action and distributed to local agency partners through Fresno COG’s standing committees. Fresno COG will consider public comments on the amendment prior to approval action.

Amendment Type 4

Amendment – Conformity Determination that Relies on a Previous Regional Emissions Analysis

Type 4 amendments primarily include adding or deleting projects that have already been appropriately modeled for air quality purposes as part of the RTP. In this case, the federal approving agencies can use a previous analysis of the project's impact on air quality for approval purposes. Type 4 amendments may be accompanied by an RTP amendment to maintain consistency. The FTIP amendment and RTP Amendment (if applicable) follow the same public process. Type 4 amendments require approval by Fresno COG, Caltrans, and FHWA. Public notification of a Type 4 formal amendment includes the following:

- Legally noticed 30-day public comment period
- Legally noticed public meeting
- Posting of amendment information on Fresno COG's website during public comment period
- Publishing amendment information as part of the following publicly available Fresno COG agendas: Transportation Technical Committee, Policy Advisory Committee and Fresno COG Policy Board
- Consideration and response to public comments received during comment period

Amendment Type 5

Amendment – Conformity Determination and New Regional Emissions Analysis

Type 5 amendments are the highest-level amendment and primarily involve adding or deleting new projects that must be modeled for their air quality impacts, or significantly changing the design concept, scope, or schedule of an existing project. Type 5 amendments are accompanied by a new Air Quality Conformity Document that demonstrates conformity with applicable air quality requirements, and if applicable, an RTP amendment to maintain consistency. The FTIP amendment, Air Quality Conformity Document, and RTP Amendment (if applicable) follow the same public process. Type 5 amendments require approval action by Fresno COG, Caltrans, and FHWA. Public notification of a Type 5 amendment includes:

- Legally noticed 30-day public comment period
- Legally noticed public meeting
- Posting of amendment information on Fresno COG's website during public comment period
- Publishing amendment information as part of the following publicly available Fresno COG agendas: Transportation Technical Committee, Policy Advisory Committee, and Fresno COG Policy Board
- Consideration and response to public comments received during comment period

Technical Correction

A technical correction to an FTIP project by staff does not require public review or approval of any kind.

Grouped Project Listings

Federal rules allow MPOs to group or combine projects that are not considered to be of appropriate scale for individual listing. Such grouped projects are often referred to as "Lump Sum Project Listings." Fresno COG uses this ability to program grouped projects within the FTIP. Such projects may be grouped by function (e.g., bike lanes), work type (e.g., maintenance), or geographical area. Once grouped, the MPO is required to maintain, outside of the FTIP, a detailed list of the projects contained in each group. Modifications to the projects or costs within

the listings are conducted on an as-needed basis and do not require a formal public participation process; however, any changes to the overall grouped project cost or scope are done in accordance with the amendment types above. Grouped project listings are made available through the Fresno COG website at <http://www.fresnocog.org/ftip>, and are distributed to Caltrans and FHWA.

Fresno COG, in cooperation with the FHWA and Caltrans, has entered into an agreement to regulate the number of FTIP Amendment Cycles in order to help federal and state agencies ensure a more expeditious review of Regional FTIP Amendments. As part of the arrangement, Fresno COG works to limit the number of FTIP Amendment Cycles to one per two-month period, with exceptions as needed for safety or emergency reasons. Fresno COG is responsible for verifying that urgent requests for amendments meet the criteria for exceptions. FHWA and Caltrans, likewise, have agreed to provide expeditious review of Fresno COG FTIP Amendments. Future consideration will include limiting amendments to one per three-month period.

A major part of the FTIP is the four-year “Element”. Federal guidance requires that the FTIP be delivered in the following manner:

- All projects (as a group) shown in the first year of the Element shall have first priority;
- All projects (as a group) shown in the second year of the Element shall have second priority;
- All projects (as a group) shown in the third year of the Element shall have third priority; and
- All projects (as a group) shown in the fourth year of the Element shall have fourth priority.

The significance of this method is that the federal government expects Fresno COG to make every effort to complete first-year projects before second-year projects, second-year projects before third-year projects, and so on. In theory, failure to do so could throw the entire program into chaos, with second-, third-, or fourth-year projects being held up due to a single first-year project’s inability to proceed. In practice, the federal reviewing agencies have generally been satisfied if significant progress is being made to implement all first-year projects, even if one or more projects happen to slip into the next year; however, if a project is stalled or is no longer going to be implemented, Fresno COG is required to recognize this and adjust the FTIP.

Different restrictions apply to projects that qualify as Transportation Control Measures (TCMs). In accordance with federal air quality regulations, Fresno COG is required to expeditiously implement all TCMs. If programmed TCM projects are unavoidably delayed, other TCMs must be advanced or risk jeopardizing the entire program.

FTIP “Expedited Project Selection Procedures”

The State, Fresno COG, and transit operators have instituted a project selection process for its FTIP as required by Federal Regulations 23 Code of Federal Regulations (CFR) Part 450 and Title 23 United States Code (USC). Projects from the first four years of the 2023 FTIP have been selected using the approved project selection procedures as outlined on the following table. Fresno COG’s member agencies, Caltrans, and the transit operators agree per 23 CFR 450.332, that the projects within the first four years of the FTIP may be advanced or delayed within the Four-Year Element of the FSTIP, subject to the conditions of the Expedited Project Selection Procedures outlined below. For FTA-administered funds, projects may be moved within the period of the FSTIP at the agency’s request, as long as funding is available and the change does not negatively impact delivery or fund availability for other projects ready for obligation.

The projects within the State Transportation Improvement Program (STIP) may be advanced subject to California Transportation Commission (CTC)-approved STIP amendments.

The projects funded within the Surface Transportation Block Grant (STBG) and Congestion Mitigation and Air Quality (CMAQ) programs may be moved subject to the Fresno COG Expedited Projects Selection Process (attached).

Fresno COG and Caltrans agree that the Caltrans Program Managers for the following programs may implement projects within the four-year FSTIP element without amending the FTIP/FSTIP.

State Highway Operation and Protection Program (SHOPP)

Highway Bridge Program (HBP)

High Risk Rural Roads Program (HRRR)

Section 130 - STP Railroad Program

Highway Safety Improvement Program (HSIP)

Fresno Council of Governments designates Interim Executive Director Robert Phipps to sign below acknowledging that advancing of projects under such agreement does not invalidate the financial constraint of its FTIP.

Robert Phipps, Interim Executive Director

09/10/2024
Date

Project Selection Procedures - Consultation and Cooperation Requirements

Region	Project Type	Selecting Agency	Selection Procedure	Consulted/ cooperating Agency
TMA MPO	Projects funded with title 23 and Federal Transit Act funds-except: projects on the, NHS, HBP, IM and FLHP funded projects	MPO	Consultation	State and Transit Operator
	Projects on the Highway-Railroad Grade Separation, NHS, and projects funded under the HBP and IM programs	State	Cooperation	MPO
	Projects funded with Federal Lands Highway Program (FLHP) funds	Selected in accordance with 23 U.S.C. 204		

These changes should be accounted for through subsequent amendments or modifications to the FSTIP/FTIP.

Fresno COG Expedited Project Selection Process

The Fresno COG Policy Board hereby establishes guidelines for programming the STBG, CMAQ, and the Active Transportation Program (ATP) to ensure timely project delivery within federal and state funding deadlines.

It is the implementing agency's responsibility at the time of programming to understand the requirements and procedures for authorizing a project through Caltrans Local Programs and ensure the deadlines and provisions of project delivery can be met.

COG staff will actively monitor all STBG, CMAQ and ATP projects regarding the funding authorization, implementation schedule, and obligation status to identify delivery issues as they arise and make determinations on project placement in the FTIP based on this policy. Appeals to this decision process must be taken through the Fresno COG committee process to the Policy Board.

Projects Eligible for Programming

To be eligible for programming in the FTIP a project must be included in a list of Regional Bid projects authorized by the Fresno COG Policy Board. Fresno COG staff will endeavor to provide targets for Regional Bid programs based on estimated apportionments during the life of the federal-aid appropriation.

Regional Bid projects are selected in cycles by a "Call for Projects" process. The selection and scoring criteria to identify these projects has been adopted by Fresno COG's Policy Board through an extensive regional consensus process in conformance with 23 CFR 450.332 and financially constrained with the amount of available funding for the cycle. Once selected on regional merits, a Regional Bid project should be delivered following regional project delivery policies and procedures. Fresno COG will also adopt a list of contingency projects, ranked in priority order based on the project's evaluation score. Fresno COG intends to fund projects on the contingency list should there be additional funding available. This contingency list will be in effect only until the adoption of the next programming cycle. If a project sponsor elects to cancel a project, the funding will go towards the regional apportionment that may be used for projects on the current contingency list, post-programming adjustment requests, EPSP, or retain the funding for future programming cycles.

Programming the FTIP

Working through the Fresno COG regional consensus process, staff will program the authorized list of eligible Regional Bid projects in the FTIP Element until all available programming capacity has been consumed. The remaining projects are then programmed in the "out years" of the FTIP. As additional programming capacity becomes available, the out-year projects provide a pool of authorized projects to move into the Element. To move out-year projects into the Element requires an FTIP amendment, including a finding of financial constraint on the entire FTIP.

When determining the split between projects in the Element and out years, various factors may be considered:

- The status of the Regional Bid project
- The priority assigned the project on the call-for-projects list.
- The phasing and deliverability schedule of the project or project phase.
- The status of previously programmed project phases.
- The status of the project as a capital procurement or transit operations (CMAQ).
- The track record of the project sponsor in delivering projects on schedule.
- The status of the project as having been previously programmed in the Element or out years.

Placement in the Four-Year Element

To be considered for placement in the Four-Year Element of the FTIP, a project sponsor must submit an implementation schedule, by year, showing a logical, planned obligation of the various phases (Preliminary Engineering-PE, Right of-Way-ROW, Construction-CON). Failure to adhere to this schedule may result in the project being rescheduled. Criteria for this implementation schedule should include but not be limited to:

- Securing political commitments and local board authorization
- Securing required matching funds
- Fulfilling Caltrans Local Programs' requirements
- Securing required permits, certifications, and waivers
- Completing PE and design studies
- ROW certification
- Completing final design
- Construction bid readiness

Depending on the project requirements, the implementation schedule may be simple or complex. COG staff will schedule projects in the Element based on this implementation schedule subject to programming capacity.

Projects with multiple phases (PE, ROW, CON) must have a reasonable expectation that the preliminary phases can be completed prior to programming subsequent phases in the current Element. Project Sponsors must be cognizant of Local Programs' requirements affecting project phasing. For instance, a project cannot proceed to final design, ROW acquisition, or CON until a Preliminary Environmental Study (PES) identifies the environmental condition of the project area and proposes mitigation, if required. Furthermore, final CON cannot begin until Caltrans issues an environmental certification (if required), the local agency has certified ROW (if included) and final plans and specs have been submitted to Caltrans along with a PSE checklist. It follows that any project with significant environmental mitigation requirements identified on the PES, unresolved ROW issues, or issues with final design cannot be obligated for the affected project phase until those issues are resolved. Project sponsors must identify those issues that can delay their project and document a reasonable expectation, schedule, and commitment to complete required preliminary phases before requesting subsequent project phases be placed in the current Element year.

Grouped projects programmed in the Element must be accompanied by a detailed list identifying the specific deliverable project phases of the grouped project. Grouped project sponsors must be able to demonstrate deliverability of the individual projects and project phases.

This “Expedited Project Selection” process provides Fresno COG’s Policy Board the flexibility to alter the order of projects within the Element of the FTIP to fit the priorities and needs of the transportation program in Fresno County without “Formal” or “Administrative” amendments to the approved FTIP.

Failure to Deliver

Projects that are programmed in the current Element year that fail to obligate on schedule represent a potential loss of apportionment to the region unless another project advances to use the available apportionment. For this reason, if a project falls behind in schedule it may be necessary to replace it with another project that has a reasonable chance of obligating. Depending on the apparent demonstrated commitment of the project sponsor to deliver the project, the nature of the delay, and available programming capacity in the four-year Element, the project may be rescheduled to the second, third, or fourth year of the Element or to the out years.

The FTIP is completely revised every four years. At the end of the first year, projects in the first year of the Element that did not obligate or move back are considered “prior year” projects. In order to obligate those projects in a subsequent year, an administrative amendment must be processed transferring the projects back into the new, current Element year. However, at the end of the fourth year when the FTIP is revised, all prior year projects must be reprogrammed in the Element or they become out-year projects.

Loss of Funds through AB 1012 or decreased apportionment

AB 1012 is apportionment specific. The MPO has three years, including the year of apportionment, to obligate each apportionment (e.g. the 2024/25 apportionment expires at the end of the 2027/28 fiscal year). The estimated available apportionments are calculated when setting the Regional Bid targets. Should actual apportionments come in significantly lower than those estimates or should delayed project delivery cause a loss of apportionments via AB 1012, staff will re-estimate the capacity to deliver the program using remaining apportionments. If this results in removing projects from the pool of Regional Bid project lists, staff will identify candidate projects for the COG Policy Board to consider for removal. Factors to be considered when identifying projects for removal will include the age of the project and failure to meet committed scheduling.

Project Obligation, Implementation and Close Out

Projects have seven years (state requirement) from the first obligation to proceed to completion and close out. A one-time, one-year extension may be requested. Projects that lapse unclosed may be subject to repayment by the local sponsoring agency of federal funds to the funding agency.

APPENDIX D
PUBLIC PARTICIPATION
PROCESS FOR FTIP
DEVELOPMENT

2025 FTIP PUBLIC PARTICIPATION PROCESS

As part of the 2025 Federal Transportation Improvement Program (2025 FTIP) development process, Fresno COG has performed the following activities per the Public Participation Plan that is available on Fresno COG's website at: <http://www.fresnocog.org/get-involved>.

Public Participation for the development of the 2025 FTIP includes:

- Fresno COG legally noticed and sponsored a public hearing and a 30-day public comment period to receive comments on the Draft 2025 FTIP and the corresponding Draft Air Quality Conformity Analysis for the 2025 FTIP.
 - ❖ A 30-day public comment period was held from May 31, 2024, to June 30, 2024
 - ❖ A public hearing to receive comments on these documents was held on June 12, 2024, at 5:30 p.m. The public hearing will be held in-person and virtual webinar. Details for how to participate will be published in the meeting agenda at <https://agendas.fresnocog.org/>, available a week prior to the meeting dates
 - ❖ Public comments received during the 30-day public comment period and public hearings will be considered and responded to via email or phone call and formally as part of Appendix J (Comments and Responses) in the Final 2025 FTIP
- The release of the draft document and notice of the 30-day public comment period, public hearing, and Policy Board meeting to adopt the Final 2025 FTIP was publicized through:
 - ❖ The Fresno Bee newspaper
 - ❖ Fresno COG's bulletin board; located in the lobby of the Fresno COG office
 - ❖ Links to the draft documents posted on the Fresno COG website were sent to all standing committees (TTC and PAC), Board Members, Caltrans, FHWA, and any interested parties or members of the general public; Hard copies were also available at regularly-scheduled public meetings and by request
 - ❖ The notice and draft documents were posted on Fresno COG's website www.fresnocog.org soliciting comments from the document
 - ❖ Solicited responses through email, collaborating and coordinating with FHWA, FTA, Caltrans, the Air District, state and federal resource agencies, our local jurisdictions, the other seven counties in the San Joaquin Valley and the general public; Fresno COG also solicited input from the Indian Tribal governments and community organizations
 - ❖ Emailed updates through Fresno COG's monthly email newsletter, "Coming Up at Fresno COG", to 3,200+ people on Fresno COG's current email database
- Fresno COG published the Final Draft 2025 FTIP as part of the following publicly available Fresno COG agendas: Transportation Technical Committee, Policy Advisory Committee, and Fresno COG Policy Board, and on the Fresno COG website
 - ❖ Staff presented the Final 2025 FTIP at the Transportation Technical Committee and the Policy Advisory Committee meetings on July 12, 2024, for approval
 - ❖ Staff presented the Final 2025 FTIP at the Fresno COG Policy Board meeting on July 25, 2024, for approval

CONFORMITY FINDING FOR AIR QUALITY

Documentation has been provided under a separate cover. The public comment period for the Air Quality Conformity Analysis will be held from May 31, 2024, to June 30, 2024. A public hearing will be held on June 12, 2024, at 5:30 p.m. This public hearing will be held in-person and via Zoom Webinar. Details for how to participate will be published in the meeting agenda at <https://agendas.fresnocog.org>.

At their July 25, 2024 regular meeting, The Policy Board will consider adoption of the 2025 FTIP, via resolution, upon the close of the public comment period. This document may be reviewed at the Fresno COG website at <https://www.fresnocog.org/project/conformity/>.

APPENDIX I

PROOF OF PUBLICATION

**NOTICE OF PUBLIC HEARING ON
DRAFT 2025 FEDERAL TRANSPORTATION IMPROVEMENT PROGRAM,
DRAFT 2022 REGIONAL TRANSPORTATION PLAN AMENDMENT No. 4,
AND DRAFT CORRESPONDING CONFORMITY ANALYSIS**

NOTICE IS HEREBY GIVEN that the Fresno Council of Governments will hold a public hearing on June 12, 2024, at 5:30 p.m. in person at the Fresno COG Sequoia Room 2035 Tulare Street, Suite 201, Fresno, CA 93721 and via Zoom Webinar (link available at www.fresnocog.org), regarding the Draft 2025 Federal Transportation Improvement Program (2025 FTIP), the Draft 2022 Regional Transportation Plan Amendment No. 4 (2022 RTP Amendment No. 4), and the Draft Corresponding Conformity Analysis. The purpose of this public hearing is to receive public comments on these documents.

- The 2025 FTIP is a near-term listing of capital improvement and operational expenditures utilizing federal and state monies for transportation projects in Fresno County during the next four years.
- The 2022 RTP is a long-term strategy to meet Fresno County transportation needs out to the year 2046. Amendment No. 4 is necessary to reflect funding, open to traffic date, and scope changes to regionally significant, capacity increasing projects.
- The Corresponding Conformity Analysis contains the documentation to support a finding that the 2025 FTIP and 2022 RTP Amendment No. 4 meet the air quality conformity requirements for ozone and particulate matter.

Individuals with disabilities may call Fresno COG (with 3-working-day advance notice) to request auxiliary aids necessary to participate in the public hearing. Translation services are available (with 3-working-day advance notice) to participants speaking any language with available professional translation services.

A 30-day public review and comment period will commence on May 31, 2024, and conclude on June 30, 2024. The draft documents are available for review at the Fresno Council of Governments office, located at 2035 Tulare Street, Suite 201, Fresno CA, 93721 and on Fresno Council of Governments website at www.fresnocog.org.

Public comments are welcomed at the hearing or may be submitted in writing by May 31, 2024 at 5:30 p.m. to Ofelia Abundez at the address below.

After considering the comments, the documents will be considered for adoption, by resolution, by the Fresno Council of Governments at a regularly scheduled meeting to be held on July 25, 2024. The documents will then be submitted to state and federal agencies for approval.

APPENDIX J
FORMAL COMMENTS AND
RESPONSES

Fresno COG staff received zero comments for the Draft 2025 FTIP documents at the public hearing held on June 12, 2024.

During the 30-day public comment period, four (4) sets of comments were received regarding the Draft 2025 FTIP. Commenters submitted responses via email and via virtual meeting. The comments and responses are summarized below.

A) Comment From: Antonio Cano, Rural Non-MPO Coordinator

Date Received: June 11, 2024

Submitted via: Microsoft Teams Virtual Meeting

To: Ofelia Abundez

Subject: Draft 2025 FTIP Adoption Review

1. Please confirm that all dates in the introduction are accurate.

Comment noted. The document has been reviewed and dates should be accurate.

2. Please reduce the number of drilldown reports attached. You may use 2023 FTIP as an example.

Comment noted. I have generated the drilldown project reports the same way the 2023 FTIP drilldown reports were generated.

Financial Summary Comment:

Revenue Table:

3. Please confirm that there are no pending loans for CMAQ or STBG that need to be paid back. If there is, please add them to the bottom of the Financial Summary Revenue and Programming pages.

We contacted Megan Perasso and she confirmed we do have a CMAQ loan that is scheduled to be paid back to Fresno COG in FFY 2026. It is a loan with SACOG from FFY 2022 for \$6,300,000 CMAQ. This information was added to the bottom of our financial summary Revenue page #15.

Project Specific Comments:

B) Comments From: Gelasio Rodriguez, Assistant Engineer from A&M Consulting Engineers

Date Received: June 18, 2024

Submitted via: Email

To: Ofelia Abundez

Subject: RE: Draft 2025 FTIP

1. The draft 2025 FTIP and 2022 RTP Amendment #4 which is out for public comment until June 30, and I see the Parlier projects for which we've received funding. However, I'm wondering how we can add other projects to the RTP during this amendment period. I don't see the Rails to Trails project for Parlier listed in the Financially Constrained Project group. Can this and other long-term Parlier projects be added to the list? The project ID for the Rails to Trails project was shown as FRE501473

in the 2018 RTP. We submitted an application for funding for this project through the mid-cycle CRP call for projects with an updated project cost of just under \$2.8 million.

The project (FRE501473) is an air quality beneficial project. Because the project is not currently federally funded nor was it submitted to be in the 2025 FTIP, the project may be programmed the 2025 FTIP amendment No. 1 which will be federally approved concurrently in December 2024.

C) **Comments From:** Tatiana Partain, Management Analyst for the City of Fresno

Date Received: June 20, 2024

Submitted via: Email

To: Ofelia Abundez

Subject: 2025 FTIP Error

1. Our Ashlan project (LSTMP897) was not programmed correctly for construction. I want to bring this to your attention because in our application we committed to an expedited delivery for this project and are planning to adhere to that. I also noticed that there is a note in the FTIP file that states the committed programming year. I know that we can always EPSP it up if there is capacity. I am worried if there is not capacity this project will be delayed and therefore impact our commitment on our application. Please let me know what we can do, if anything, to remedy this situation.

The project (LSTMP897) funding has been reprogrammed into the requested federal fiscal year which was stated in the project application which is year 25/26 instead of what was previously programmed year 27/28. These changes are now reflected within the Grouped Project listing and Financial Plan.

D) **Comments From:** Marilu Morales, PE, City Engineer for the City of Reedley

Date Received: June 20, 2024

Submitted via: Email

To: Ofelia Abundez

Subject: Draft 2025 FTIP and Draft 2022 RTP Amendment No. 4 Comments

1. I was reviewing the draft documents and noticed on the 2nd page of the Draft 2022 RTP Amendment No. 4 that the City of Reedley Parlier Avenue Project was listed as a CMAQ project in the narrative, however, that project was submitted and awarded as part of the 2023-2024 RSTP/STBG Call for Projects.
 - *Comment noted. This typo has been corrected.*
2. I didn't see the CMAQ Reedley Class 1 Multi-Use Trail Sports Field/Canal Loop on the list as a "New Project". Was this project added previously on another amendment? It was awarded as part of the 2023-2024 CMAQ Call for Projects. This project is shown on page 132 of the PDF (page 126 of the document).
 - *This project was not added as a new project to the 2022 RTP amendment No. 4 because this project is already in the 2022 RTP (as stated in the project application submitted by the City of Reedley), the new projects being amended into the 2022 RTP were not previously in the RTP.*

3. The Draft 2025 FTIP on Page 163 of the PDF (Page 156 of the document) right above the Reedley Class 1 Multi-use trail “Grouped” is spelled incorrect and says “Groped”.
 - *Comment noted. This typo has been corrected.*

				2024 Conformity Analysis for 2023 FTIP and 2022 RTP Amendment #3 (as of 04/2024)	Conformity Analysis for 2025 FTIP and 2022 RTP Amendment #4 (as of 05/2024)
FR-TCM1	Fowler	Traffic Flow Improvements	Monitor growth and respond appropriately.	Project is progressing, and is updated on the TID Tables.	Project is progressing, and is updated on the TID Tables.
FR1.2	Fresno / Fresno Area Express	Transit Access to Airports	Public transportation to airports. Implementation of this strategy is in effect.	Service to airport is in effect.	Service to airport is in effect.
FR5.9	Fresno / Fresno Area Express	Bus Pullouts in Curbs for Passenger Loading	Provide for bus pullouts. Review the need and evaluate benefits of providing bus pullouts for major projects.	All new street construction and capital improvement projects are constructing far side or mid-block bus bays, as feasible per safety and traffic flow, per City of Fresno Public Works standards.	All new street construction and capital improvement projects are constructing far side or mid-block bus bays, as feasible per safety and traffic flow, per City of Fresno Public Works standards.
FR5.16	Fresno / Fresno Area Express	Adaptive traffic signals and signal timing	Adjust traffic timing and install 470 cameras at various locations.	All new traffic signal projects comply with FHWA and City of Fresno adopted ITS standards. The city continues to use development fees and grant funds to improve system.	All new traffic signal projects comply with FHWA and City of Fresno adopted ITS standards. The city continues to use development fees and grant funds to improve system.
FR10.2	Fresno / Fresno Area Express	Bike Racks on Buses	Promotes placement of bicycle racks on buses. All 108 buses have installed bus racks.	All buses have installed bike racks. New buses include bike racks.	All buses have installed bike racks. New buses include bike racks.
FR10.4	Fresno / Fresno Area Express	Development of Bicycle Travel Facilities	Accommodate bicycle lanes with new or substantially expanded major street right-of-ways at the time of development.	New development will continue to construct on-street bike lanes. The City of Fresno has installed several miles of bike lanes in each of the recent FTIP cycles using CMAQ funds in the existing urbanized area.	New development will continue to construct on-street bike lanes. The City of Fresno has installed several miles of bike lanes in each of the recent FTIP cycles using CMAQ funds in the existing urbanized area.
FR10.5	Fresno / Fresno Area Express	Expedite Bicycle Projects from RTP	Build out bicycle projects at an accelerated rate.	The City of Fresno has installed several miles of bike lanes in each of the recent FTIP cycles using CMAQ funds in the existing urbanized area. New development will continue to construct on-street bike lanes.	The City of Fresno has installed several miles of bike lanes in each of the recent FTIP cycles using CMAQ funds in the existing urbanized area. New development will continue to construct on-street bike lanes.
FR10.7	Fresno / Fresno Area Express	Require inclusion of bicycle lanes on state or federally funded thoroughfare projects.	Provide adequate right-of-way for bike lanes along all major streets to the extent economically and physically feasible, including streets that are improved with Federal or State funds.	New projects require bike lanes on major streets, where feasible. In some instances, physical or other issues may limit the inclusion of bike lanes.	New projects require bike lanes on major streets, where feasible. In some instances, physical or other issues may limit the inclusion of bike lanes.
FR15.2	Fresno / Fresno Area Express	Pedestrian and Bicycle Overpasses Where Safety Dictates	Evaluate the need for pedestrian and bicycle overpasses as the need arises.	Safety evaluation is on-going as development proposals are received and as traffic patterns change. No need yet identified.	Safety evaluation is on-going as development proposals are received and as traffic patterns change. No need yet identified.

APPENDIX L

ENVIROMENTAL JUSTICE PLAN

CHAPTER 7

Environmental Justice

This chapter summarizes key findings from the Environmental Justice and Equity Analysis for Fresno Council of Governments' 2022 Regional Transportation Plan (RTP) and Sustainable Communities Strategy (SCS) for the Fresno County region.

Introduction

The Environmental Justice and Equity Analysis demonstrates Fresno Council of Government's compliance as a metropolitan planning organization (MPO) with federal requirements related to Title VI and environmental justice in the RTP development process. At the federal level, requirements include civil rights protections against discrimination in federally funded programs and federal-aid recipients on the basis of a person's race, color, or national origin; and federal environmental justice objectives aimed at avoiding disproportionately high and adverse effects on minority and low-income populations. At the state level, requirements include: civil rights protections against discrimination on the basis of sex, race, color, religion, ancestry, national origin, ethnic group identification, age, mental disability, physical disability, medical condition, genetic information, marital status, or sexual orientation. At the regional level, Fresno COG has adopted environmental justice principles and objectives that promote equity throughout the agency's regional planning efforts. (See the detailed 2022 RTP/SCS Chapter 4.

Environmental justice means identifying and addressing disproportionately high and adverse effects, if any, as a result of the RTP/SCS programs and policies on minority populations and low-income populations to achieve an equitable distribution of benefits and burdens. This also includes the full and fair participation by all potentially affected communities in the transportation decision making process. The analysis helps policymakers, local jurisdictions and the public understand the equity-related implications of implementing the RTP in the region, especially in disadvantaged communities.

Title VI and Environmental Justice Review

Title VI establishes the basis for transportation agencies to disclose to the public the benefits and burdens of proposed projects on minority populations. Civil rights have expanded to include sex, age, and disability through the Federal-Aid Highway Act of 1973, Age Discrimination Act of 1975, the Rehabilitation Act of 1973, and Americans with Disability Act of 1990. Title VI was further amended in 1987 to extend non-discrimination requirements for federal aid recipients to all of their programs and activities, not just those funded with federal funds. At the state level, California Government Code Section 11135 prohibits discrimination on the basis of sex, race, color, religion, ancestry, national origin, ethnic group identification, age, mental disability, physical disability, medical condition, genetic information, marital status, or sexual orientation by any agency receiving state funding.

Additionally, Title VI not only bars intentional discrimination, but also unjustified disparate impact discrimination. Disparate impacts result from policies and practices that are neutral on their face (i.e., there is no evidence of intentional discrimination), but have the effect of discrimination on protected groups. Title VI prohibits discrimination by recipients of federal financial assistance on the basis of race, color, and national origin, including the denial of meaningful access for limited English proficient (LEP) persons.

Furthering the principles of environmental justice (EJ), the 1994 Presidential Order (Executive Order 12898) directed every federal agency to make environmental justice part of its mission by identifying and addressing disproportionately high and adverse human health or environmental effects of all programs, policies, and activities on minority populations and low-income populations. Reinforcing Title VI, this presidential order ensures that every federally funded project nationwide considers the human environment when undertaking the planning and decision-making process. The Presidential memorandum accompanying E.O. 12898 underscored certain provisions of existing law that help ensure all communities and persons live in a safe and healthful environment, and identified Title VI as one of several federal laws that should be applied “to prevent minority communities and low-income communities from being subject to disproportionately high and adverse environmental effects.”

To implement and ensure compliance with these statutes, federal and state agencies have issued a series of orders, regulations and guidance on environmental justice. The U.S. Department of Transportation (DOT) issued DOT Order 5610.2 in 1997 to “summarize and expand upon the requirements of Executive Order 12898 on Environmental Justice.” The order is used as a framework for incorporating Environmental Justice into every DOT activity, policy, and program. Expanding on DOT Order 5610.2, in December 1998 the Federal Highway Administration (FHWA) issued FHWA Order 6640.23 that requires the FHWA to implement environmental justice practices described in both DOT Order 5610.2 and Executive Order 12898 into all FHWA activities. DOT Order 5610.2 was updated in 2012, reaffirming DOT’s commitment to environmental justice and clarifying certain aspects of the original order. FHWA Order 6640.23A was issued in June 2012, updating and replacing the previous 1998 order. Fresno COG is subject to these laws and executive orders.

Title VI of the Civil Rights Act of 1964 (Title VI) states:

“No person...shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance.”

The overlap between the statutory obligation placed on federal agencies under Title VI to ensure nondiscrimination in federally assisted programs administered by State and local entities, and the administrative directive to federal agencies under the executive order to address disproportionate adverse impacts of federal activities on minority and low-income populations explain why Title VI and environmental justice are often paired. The clear objective of the executive order and presidential memorandum is to ensure that federal agencies promote and enforce nondiscrimination as one way of achieving the overarching objective of environmental justice.

In addition to federal requirements, Fresno COG must comply with California Government Code Section 11135, which states that, “no person in the State of California shall, on the basis of race, national origin, ethnic group identification, religion, age, sex, sexual orientation, color, or disability, be unlawfully denied full and equal access to the benefits of, or be unlawfully subjected to discrimination under, any program or activity that is conducted, operated, or administered by the state or by any state agency that is funded directly by the state, or receives any financial assistance from the state.” California Senate Bill 115, passed in 1999, also established the definition of “EJ” in the California Government Code as “the fair treatment of people of all races, cultures and income with respect to development, adoption and implementation of environmental laws, regulations and policies.” The State of California also provides guidance for those involved in transportation decision-making to address environmental justice.

In 2003, the California Department of Transportation (Caltrans) published the Desk Guide on Environmental Justice in Transportation Planning and Investments to provide information and examples of promoting environmental justice. The desk guide identified public agency requirements, guidance on impact analyses, and recommendations for public involvement and mitigation. Under Senate Bill 375 (SB 375), Fresno COG is required to include a sustainable communities strategy (SCS) within the regional transportation plan. The Fresno COG 2022 RTP/SCS provides a framework for the future development of Fresno County’s transportation system. Through SB 375, the California Air Resources Board (ARB) established per-capita SCS targets for greenhouse gas emission reductions for cars and light trucks. The Fresno County region’s 2035 target is a 13% reduction from 2005 levels.

Other legislation relevant to environmental justice in recent years includes: Senate Bill 1000 (SB 1000), the Planning for Healthy Communities Act, which requires all local jurisdictions in California with disadvantaged communities, as defined by SB 535, to develop an environmental justice element as part of their general plan update or consider environmental justice goals, policies, and objectives throughout their general plan.

Assembly Bill 617 (AB 617) brings air quality monitoring to a more localized level. While Fresno COG does not have statutory requirements from this legislation, it is evident that environmental justice is becoming an increasingly significant topic in all sectors of planning. As a result of this, Fresno COG aims to provide support, as needed, to its member agencies.

Fresno COG's Role

As a federally designated MPO, Fresno COG is required to comply with the above mentioned federal and state rules and policies and therefore conducts an Environmental Justice & Equity Analysis, which assures Fresno COG conforms to federal environmental justice principles, policies and regulations, including Title VI. Fresno COG is required by law to determine whether the RTP/SCS benefits low-income and minority communities equitably and whether the Plan's transportation investments have any disproportionate negative effects on minority and/or low-income populations in the Fresno COG region, and to minimize negative impacts where they exist. To certify compliance with Title VI and address environmental justice, Fresno COG's three main principles underlying environmental justice are:

- To avoid, minimize, or mitigate disproportionately high and adverse human health or environmental effects, including social and economic effects, on minority and low-income populations.
- To provide opportunities for full and fair participation by all potentially affected communities in the transportation decision making process.
- Prevent denial, reduction, or significant delay in benefits by minority and low-income populations

Environmental justice is the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income with respect to developing, implementing and enforcing environmental laws, regulations, and policies.

Fair treatment means that no group of people should bear a disproportionate share of the negative environmental consequences resulting from industrial, governmental and commercial operations or policies.

Meaningful involvement means that:

- People have an opportunity to participate in decisions about activities that may affect their environment and/or health
- The public's contribution can influence the regulatory agency's decision
- Community concerns will be considered in the decision-making process
- Decision makers seek out and encourage involvement of those potentially affected

Plan Development Process

The 2022 RTP was developed with meaningful and extensive participation from key stakeholders, including community-based advocates, labor organizations, public agencies, business groups, and individual residents. This section describes the public outreach efforts focused on specifically reaching and engaging EJ communities and EJ population groups.

Consistent with Fresno COG's 2019 Public Participation Plan and Title VI Program Plan for Engaging Individuals with Limited English Proficiency (LEP), outreach for the RTP incorporated strategies to engage LEP community members by providing interpretation, translated flyers, television and social media campaigns in Spanish and other languages, as requested. See the public engagement section for additional details.

Outreach and Public Engagement Efforts

RTP Mini Grant Program

As discussed in RTP Chapter 1: About the Plan and in Chapter 5: Sustainable Communities Strategy, Fresno COG's RTP community engagement process included several strategies and tools specifically designed for engaging disadvantaged communities and EJ populations. In February 2020 Fresno COG released a RTP Mini Grants application packet online and through targeted emails, seeking assistance from community organizations, schools, agencies and businesses to solicit ongoing public input into key activities associated with the 2022 Regional Transportation Plan (RTP) and the Sustainable Communities Strategy scenarios. To ensure diverse and extensive input on the 2022 RTP from people and populations throughout the region, Fresno COG requested help to expand community outreach that would garner significant public input.

Fresno COG received three mini grant applications by the March 26, 2020 due date. Due to the COVID 19 pandemic and California's shelter-in-place order issued March 17, 2020, the number of applicants was unusually small. However, Fresno COG entered into agreements with the following organizations to conduct virtual public outreach, obtaining input regarding community transportation needs.

RTP Transportation Needs Community Engagement

In partnership with Fresno COG staff, the three mini grant organizations worked from August through October 2020 gathering transportation project suggestions from our region's residents via hard copy or online survey. This effort was conducted to assist our member agencies with community outreach prior to the RTP call for projects deadline of Dec. 1, 2020. This outreach provided an opportunity for community members to participate in the RTP planning process, addressing needs while offering input early on in the RTP development process. For this community engagement effort, Fresno COG executed an outreach plan using several communication strategies specifically designed for engaging disadvantaged communities and EJ populations (for the complete list of strategies and outreach results see Appendix E):

- Online community survey available in English, Spanish and Punjabi
- Six e-newsletters to a database of almost 4,980 email addresses in English and Spanish
- Seven social media posts in English and Spanish repeatedly posted on Facebook, Instagram, Twitter and LinkedIn
- Seven targeted English and Spanish social media "boosts" or advertisements on Facebook and LinkedIn that reached 37,871 people living in the Fresno County region.
- Flyers with QR code links to the surveys circulated through mini-grantees and member agencies in English and Spanish
- Facebook Live community presentation explaining Fresno COG's roles and responsibilities, RTPs and the Transportation Needs Survey posted to Facebook as well. Received 46 event responses and 25 comments

RTP Mini Grant Recipients

Jakara Movement

Central Valley Partnership
Inspiration Transportation

- Three mini-grants supplied to community-based organizations that successfully engaged underrepresented communities and communities of color

The suggestions and corresponding demographic data received were downloaded from the survey website, emails and social media posts. In total, the online survey had 3,765 views with 1,673 participants submitting 1,301 project suggestions. COG staff processed all of the project suggestions, combining written descriptions for each project into one excel spreadsheet, then breaking them down by local agency or transit line. Projects referencing a specific location were depicted on a map providing visual context.

All project suggestions were forwarded to corresponding local agencies for review and consideration prior to their RTP project submittals due date. The list of projects and mapping was also available to the public on Fresno COG's PlanFresno.com website.

Spring 2021 SCS Indicators and Strategies Outreach

March/April 2021

Fresno COG's Sustainable Communities Strategy (SCS) Strategies and Indicators online, interactive survey was open from March 26-April 25, 2021. It outlined five scenario concepts, asking the public what they liked and didn't like about each one. It also asked participants to prioritize groupings of SCS indicators. The survey was available in English and Spanish -- with hard copy versions available to download in English, Spanish, and Hmong. All survey options were accessible through direct links or through the PlanFresno.com website.

Strategies specifically designed for engaging disadvantaged communities and EJ populations were as follows:

- Videos explaining the SCS strategies and indicators in English and Spanish on Fresno COG's YouTube channel, posted on social media/websites and sent out via email
- Hard-copy surveys in three languages shared by community organizations at local community events
- Email-share requests sent from COG staff to member agencies, partner-agencies/businesses and community organizations
- Hosted a public Zoom webinar and a Facebook Live meeting, with the Facebook event recording posted on social media – available in English and Spanish
- Organic and boosted posts in English and Spanish on Fresno COG's social media channels -- Facebook, Instagram, Twitter, and LinkedIn

The survey was viewed 1,326 times receiving responses from 421 respondents. The outreach results were presented to Fresno COG's advisory committees and the Fresno COG Policy Board to assist them in selecting SCS performance indicators and to narrow five scenarios down to three. Links to the participant demographics and Strategies/Indicators Comments are available in Appendix D. Public Participation, Review, and Adoption.

SCS Five Scenario Concepts

Scenario A The Neighborly Approach

Scenario B The Vibrant Urban Approach

Scenario C The Conservation Approach

Scenario D The Fresnan Approach

Scenario E The Smart Growth Approach

Fall 2020 Sustainable Communities Strategy Scenario Outreach

This segment of RTP/SCS outreach took the results from three modeled SCS scenarios back out to the public for review and comment. As Fresno COG was preparing the outreach presentation, staff engaged a professional focus group company to assist in fine-tuning the presentation. Due to the complex subject matter, staff felt it prudent to make the material as understandable as possible without losing important content needed to provide informed and useful responses. One focus group comprised exclusively Latino participants.

Fresno COG released the three SCS scenarios and modeling results for public review and comment on Aug. 25, 2021. Public outreach ran through Sept. 26, using a four-pronged public participation approach that included the following strategies:

1. A total of 14 geo-targeted, community-focused ads were purchased in English and Spanish on Google and Facebook
2. Online, interactive surveys, for scenario review and selection in English and Spanish, easily accessible via smart phone or computer
3. Eight workshops held throughout the County of Fresno in the cities of: Reedley, Coalinga, Sanger, Clovis, Kerman, Selma, Fresno and Mendota, held in the evenings with English/Spanish materials and Spanish interpreters. Fresno COG staff worked with each host city to invite community members to attend meetings.
4. Five additional English/Spanish presentations given to rural, unincorporated residents and community organizations.
5. Two virtual workshops held in English and Spanish—one in the daytime and one in the evening

See Appendix D for all the presentations and results.

DOS TEMAS ¡UNA NOCHE!

Primer tema: Actualización del Plan de Transporte Regional Planeando el Futuro

En estos talleres, el Consejo de Gobiernos de Fresno pedirá a los miembros de la comunidad que compartan sobre tres perspectivas de planes futuros. Los planes se ven a las estrategias de planificación del transporte regional y del uso de la tierra destinadas a hacer lo siguiente:

- mejorar la calidad del aire
- hacer frente al cambio climático
- utilizar los recursos de manera eficiente
- invertir en comunidades existentes
- mejorar la salud
- mejorar la economía
- reducir la pérdida de tierras agrícolas en la región del Condado de Fresno

Estos planes sostenibles son parte del Plan Regional de Transporte el cual se está actualizando. Únase a nosotros en un taller cerca de usted, o en nuestro virtual en Septiembre 15, 2021 a las 5:00 pm. También puede comentar en línea. Visite www.planfresno.com para más información.

Segundo tema: Necesidades de Transporte Local

¿Qué Sigue Para la? MEDIDA C?

¡ÚNASE A NOSOTROS Y COMPARTA CÓMO LA MEDIDA C PUEDE MEJORAR LAS NECESIDADES DE TRANSPORTE DE SU COMUNIDAD!

La Medida C proporciona fondos locales para las necesidades de transporte del Condado de Fresno que han resultado en:

- ✓ CARRETERAS MÁS SEGURAS
- ✓ LLENADO DE PUZOS, CONSTRUCCIÓN DE PUENTES Y AMPLIANDO CARRETERAS
- ✓ MANTENER BAJAS LAS TARIAS DEL TRANSPORTE PÚBLICO
- ✓ MEJOR ACCESO PARA SERVICIOS DE EMERGENCIA
- ✓ MAYOR CONECTIVIDAD ENTRE COMUNIDADES RURALES Y URBANAS
- ✓ TRANSPORTE MEJORADO A LAS ESCUELAS

PROMESAS HECHAS. PROMESAS CUMPLIDAS.
Para obtener más información visite MeasureCReveal.com o llame (559) 680-0413.

Próxima Reunión Comunitaria:
AGOSTO 23 Centro Comunitario de Reedley 300 N East Ave. Reedley, CA 93654 8:30 PM
SEPTIEMBRE 1 Centro Comunitario East de Coalinga 3550 Avenida Coalinga St. Coalinga, CA 93227 8:30 PM
SEPTIEMBRE 2 Centro Comunitario de Sanger 730 Riverdale Ave. Sanger, CA 93407 8:30 PM
SEPTIEMBRE 3 Sala de Junta del Ayuntamiento 2025 5th St. Clovis, CA 93612 8:30 PM
SEPTIEMBRE 7 Centro Comunitario de Kerman 21021 N Kerman Blvd. Kerman, CA 93630 8:30 PM
SEPTIEMBRE 14 Edificios de Kerman 2000 Santa St. Selma, CA 93642 8:30 PM
SEPTIEMBRE 22 Taller Virtual a través de Zoom www.planfresno.com 8:30 PM
SEPTIEMBRE 26 Edificios de Mendota 1246 Belmont Avenue Mendota, CA 93640 8:30 PM
SEPTIEMBRE 29 Bobby Paulsen Salones 3040 N Cedar Ave. Fresno, CA 93703 8:30 PM
SEPTIEMBRE 22 Taller Virtual a través de Zoom www.planfresno.com 8:30 PM

Fresno County Demographic Profile

In 2019, for the second year in a row, Fresno County ranks first among counties in the nation with \$7.7 billion in agriculture production. Fresno County is the second largest county in the San Joaquin Valley by land area, encompassing 6,011 square miles, but the largest by population. The estimated population from the US Census Bureau, American Community Survey (2015-2019 5-year estimates) was 984,521, placing Fresno as the tenth most populous of the 58 counties in California. Within Fresno County, there are 15 incorporated cities. The county contains a federally recognized urbanized area, known as the Fresno-Clovis Metropolitan Area (FCMA), with a population of 699,023. The City of Fresno is now the fifth-largest city in the state, with a population of 525,010. Fresno County's population growth rate has outpaced that of California and the United States. During the 50-year period from 1969-2019, Fresno County's population increased by 145% compared to 101% and 63% for the state and nation respectively.

TABLE 7-1: FRESNO COUNTY DEMOGRAPHICS

RACE/ETHNICITY	POPULATION	PERCENT
Hispanic or Latino	522,364	53.1%
White Alone	289,650	29.4%
Asian Alone	99,480	10.1%
Black or African American Alone	44,209	4.5%
American Indian and Alaska Native Alone	4,651	0.5%
Native Hawaiian and Other Pacific Islander Alone	1,207	0.1%
Some Other Race Alone	1,732	0.2%
Two or More Races	21,228	2.2%
<i>2019: ACS 5-year Estimates Data Profiles, Table DP05: ACS DEMOGRAPHIC AND HOUSING ESTIMATES</i>		
Income below 150% poverty level	335,832	34.7%
Income above 150% poverty level	632,169	65.3%
Population for whom poverty status is determined	968,001	100%
<i>Source: United States Census Bureau, American Community Survey, 2015-2019 5-year estimates, Table DP05: ACS DEMOGRAPHIC AND HOUSING ESTIMATES; Table C17002: RATIO OF INCOME TO POVERTY LEVEL IN THE PAST 12 MONTHS</i>		

Fresno County has been plagued with high unemployment. The County's 2019 unemployment rate was 7.4% in contrast to 4.2% for the State and 3.7% for the nation. Fresno County residents' education levels lag behind those of both California and the United States. Only 21.2% of persons 25 years of age and older in Fresno County have a bachelor's degree or higher, compared with 33.9% for the state and 32.1% for the nation. Approximately 13.8% of those 25 and older have less than a ninth-grade education, in contrast to 9.2% for the state and 5.1% for the nation.

With high unemployment and low educational attainment, Fresno County is plagued with a low median household income. Fresno County's median house-

hold income of \$53,969 is far below the state and nation's incomes of \$75,235 and \$62,843, respectively.

Fresno County residents are more ethnically diverse than that of California and the United States as well. In 2019, 70% of the County's inhabitants were people of color compared to 63% for the State of California and 39% for the nation. Furthermore, historical trends and demographic projections indicate that Fresno County's Hispanic population is growing as the white population has been shrinking.

TABLE 7-2: FRESNO COUNTY DEMOGRAPHICS VERSUS CALIFORNIA AND THE NATION

COMPARISON	MINORITY POPULATION	INCOME BELOW 150% POVERTY LEVEL
Fresno County	70%	35%
California	63%	22%
United States	39%	22%

Environmental Justice Population Definition

The Environmental Justice & Equity Analysis is intended to measure both the benefits and burdens associated with the transportation investments included in the 2022 RTP/SCS, and to ensure that the environmental justice communities (minority and low-income) living within Fresno County share equitably in the benefits of the Plan's investments without bearing a disproportionate share of the burdens.

Defining the Environmental Justice Communities within Fresno County

Fresno COG first determined where EJ communities are located within Fresno County to better understand whether those communities are sharing both the benefits and burdens associated with projects in the plan. Demographic data from U.S. Census American Community Survey 2015-2019 Summary Tables

helped develop a database with estimated socioeconomic and travel characteristics. Staff used this database to map environmental justice communities within traffic analysis zones (TAZ). A TAZ is an area similar in size to a neighborhood or census block group. TAZs can range in size from approximately ½ mile square within a metropolitan area to much larger areas in low-density, outlying areas. There are 1,963 TAZs within Fresno County. To evaluate travel-related equity measures, Fresno COG's travel forecasting model produced estimates of travel characteristics of environmental justice communities compared to non-EJ communities across the county.

Minority

"Minority population" means "any readily identifiable groups of minority persons who live in geographic proximity, and if circumstances warrant, geographically dispersed/transient persons (such as migrant workers or Native Americans) who will be similarly affected by a proposed DOT program, policy or activity." Minority populations include persons who identify as any of the following groups as defined by the Census Bureau.

Minority Persons include the following:

- Black or African-American – A person having origins in any of the Black racial groups of Africa.
- Hispanic or Latino – A person of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish culture or origin, regardless of race.
- American Indian or Alaska Native – A person having origins in any of the original peoples of North and South America (including Central America) and who maintains tribal affiliation or community attachment.
- Asian – A person having origins in any of the original peoples of the Far East, Southeast Asia, or the Indian subcontinent including, for example, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Thailand, and Vietnam.
- Native Hawaiian or Other Pacific Islander – A person having origins in any of the original peoples of Hawaii, Guam, Samoa, or other Pacific Islands.

The non-EJ population includes those persons who identify as white and not Hispanic or Latino.

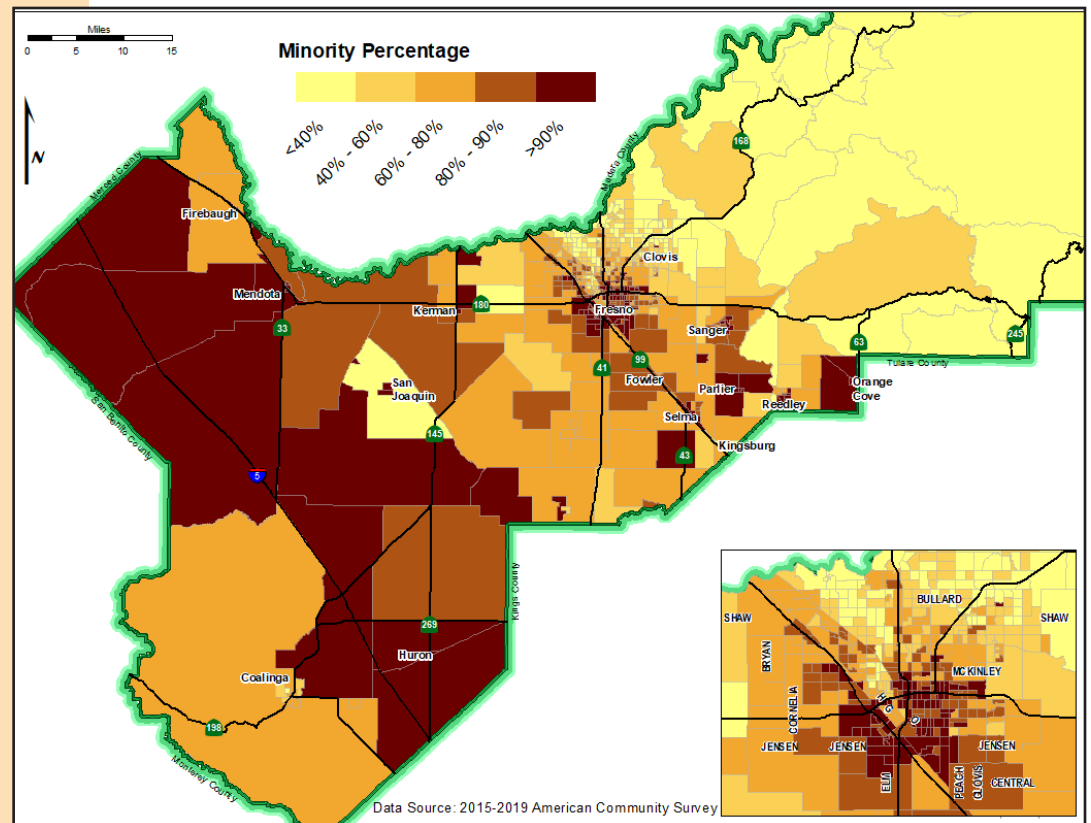

Low-Income

Low-income population means any readily identifiable group of low-income persons who live in geographic proximity, and, if circumstances warrant, geographically dispersed/transient persons (such as migrant workers or Native Americans) similarly affected by a proposed DOT program, policy or activity.

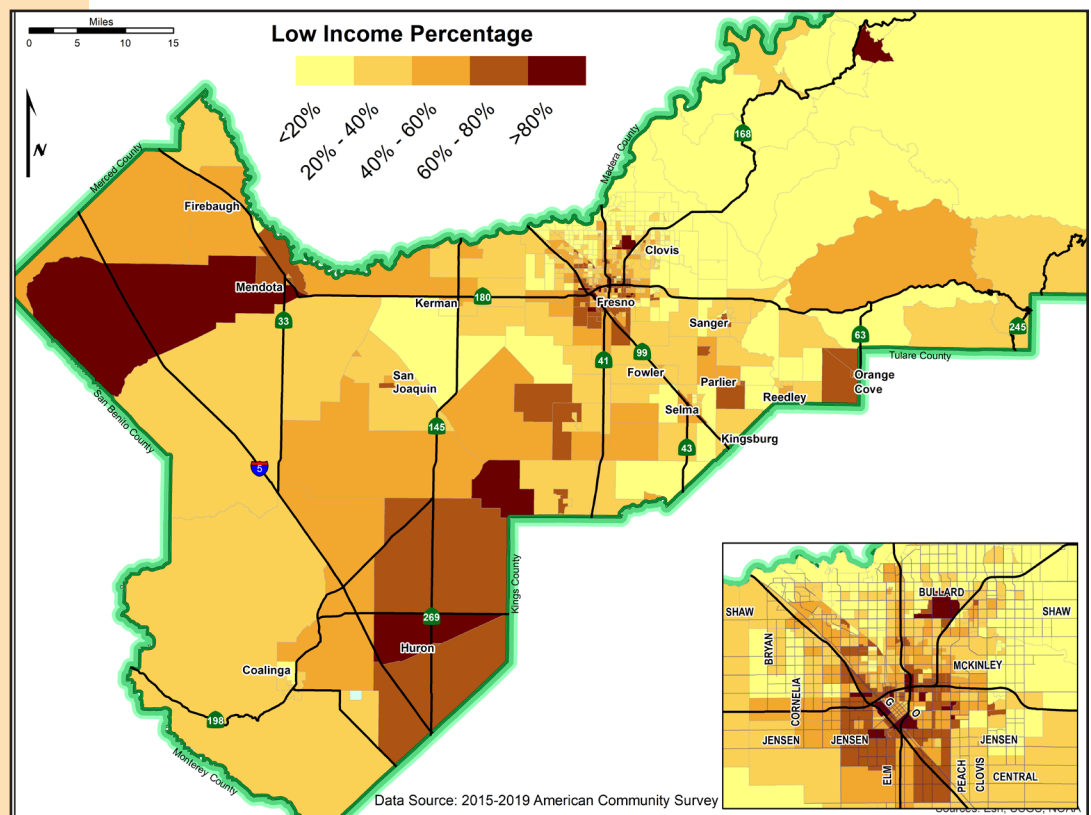

The Department of Health and Human Services (HHS) issues the annual federal poverty thresholds for individuals based on a combination of an individual's household composition, size and income in Fresno County. In 2021, 100% of the federal poverty level was \$12,880 a year for a single person living alone and approximately \$26,500 a year for a family of four. As of the 2015-2019 American Community Survey, approximately 20.5% of Fresno County's population was living below the federal poverty line.

CONCENTRATION OF
LOW INCOME**

Environmental Justice Subcommittee

EJ communities must have their parameters defined and be geographically located before determining whether a population would be affected by a proposed program, project, or activity.

For help in defining Fresno County's environmental justice communities, Fresno COG called upon its Environmental Justice Subcommittee. The Environmental Justice Subcommittee serves under Fresno COG's Transportation Technical Committee (TTC), enjoying the benefits of a formalized process as it feeds into Fresno COG's structured, standard committee process. The subcommittee generally meets when Fresno COG staff, the TTC, the Policy Advisory Committee or the Fresno COG Policy Board request recommendations on issues involving EJ populations. Subcommittee members report all advisory actions to the TTC through an EJ representative. Then the TTC's recommendations are referred to the Policy Advisory Committee and Fresno COG Policy Board as needed. The subcommittee also reports to the RTP Roundtable through the Subcommittee Chair, who holds a seat on the Roundtable.

The Environmental Justice Subcommittee has 13 positions to provide full, diverse and equitable representation from designated EJ populations:

- Four Fresno COG member agencies, one from each of the following geographies:
 - o Local agency urban
 - o East side local agency rural
 - o West side local agency rural
 - o County of Fresno
- Four representatives, one from each of the following ethnicities:
 - o Hispanic
 - o African-American
 - o Asian
 - o American Indian
- Two low-income representatives
- One senior (65 or older) representative
- One disabled person representative
- One youth representative

EJ Subcommittee Accomplishments

The EJ Subcommittee helped shape the Environmental Justice & Equity Analysis. The Subcommittee met nine times to determine EJ population thresholds and EJ SCS indicator.

The following is a summary listing of the main topics discussed:

- Regional Transportation Plan Environmental Justice & Equity Analysis: purpose and goals
- Modeling equity
- Federal definition of EJ populations
- Defining the Fresno County EJ population
- Establishing a low-income threshold that is representative of the region
- Selecting the equity indicator for the SCS scenarios
- 2022 EJ populations methodology
- Fresno County demographics (focused on race & income levels)
- Draft analysis review and comment

The EJ Subcommittee defined the EJ area as the TAZs within Fresno County with a concentration of minority and/or low-income population equal to or greater than the Fresno County average. Several other major metropolitan planning organizations in California have used this methodology in assessing equity in their regions. It is transparent and emphasizes impacts on minority and low-income communities. Fresno County averages are as follows:

- Minority Population: 70%
- Low Income (income <150% of Federal Poverty Level): 35%

Out of the 1,963 TAZs in Fresno County, 1,255 are considered EJ TAZs as defined by the EJ Subcommittee; 334 TAZs meet the Minority threshold, 151 meet the Low-Income threshold and 770 meet both thresholds. This definition of the EJ area includes 64% of Fresno County's total population.

The EJ subcommittee also recommended the equity indicator – Access to Destinations (Jobs & Services) – that was used as one of the SCS indicators by which the public and other local stakeholders ranked the three SCS scenarios.

Fresno COG took into consideration the CalEnviroScreen 3.0 data to further understand burdens beyond what the current modeling capacity could provide. The California Environmental Protection Agency (CalEPA) and the Office of Environmental Health Hazard Assessment (OEHHA) developed the California Communities Environmental Health Screening Tool (CalEnviroScreen). CalEnviroScreen is a data-driven mapping tool that helps identify California communities most affected by multiple sources of pollution and most vulnerable to pollution's adverse effects. CalEnviroScreen uses environmental, health, and socioeconomic information to produce a numeric score for each Census tract in the state.

CalEnviroScreen helps establish which areas have higher relative environmental burdens in an effort to increase environmental law compliance in disproportionately impacted areas. Additionally, CalEnviroScreen informs the identification of disadvantaged communities pursuant to SB 535 (De León, Chapter 830, Statutes of 2012), based on geographic, socioeconomic, public health and environmental hazard criteria.

There are 119 census tracts in Fresno County that fall within the top 25% of highest-scoring Census tracts according to CalEnviroScreen. Census tracts with the highest scores are the most burdened by air pollution, environmental and other socio-economic factors. The State of

California's Climate Change Initiative has worked to target Cap-and-Trade program expenditures and other funds to these designated Census tracts.

Figures 7-4 and 7-5 show maps of SB 353 and CalEnviroScreen that are overlaid with the EJ TAZs. Both maps illustrate that a majority of Fresno County census tracts identified in SB 535 (De Leon) Disadvantaged Communities and the CalEnviroScreen 3.0 directly overlap with the EJ TAZs. It further emphasizes that transportation investments focused in these areas are in line with the States priorities for mitigating neighborhoods that are most burdened and confirms that the designated EJ TAZs the 2022 RTP are appropriately captured.

While all of the areas identified in the methodology outlined above, and shown in the maps below, are included for purposes of this analysis, the data has limitations.

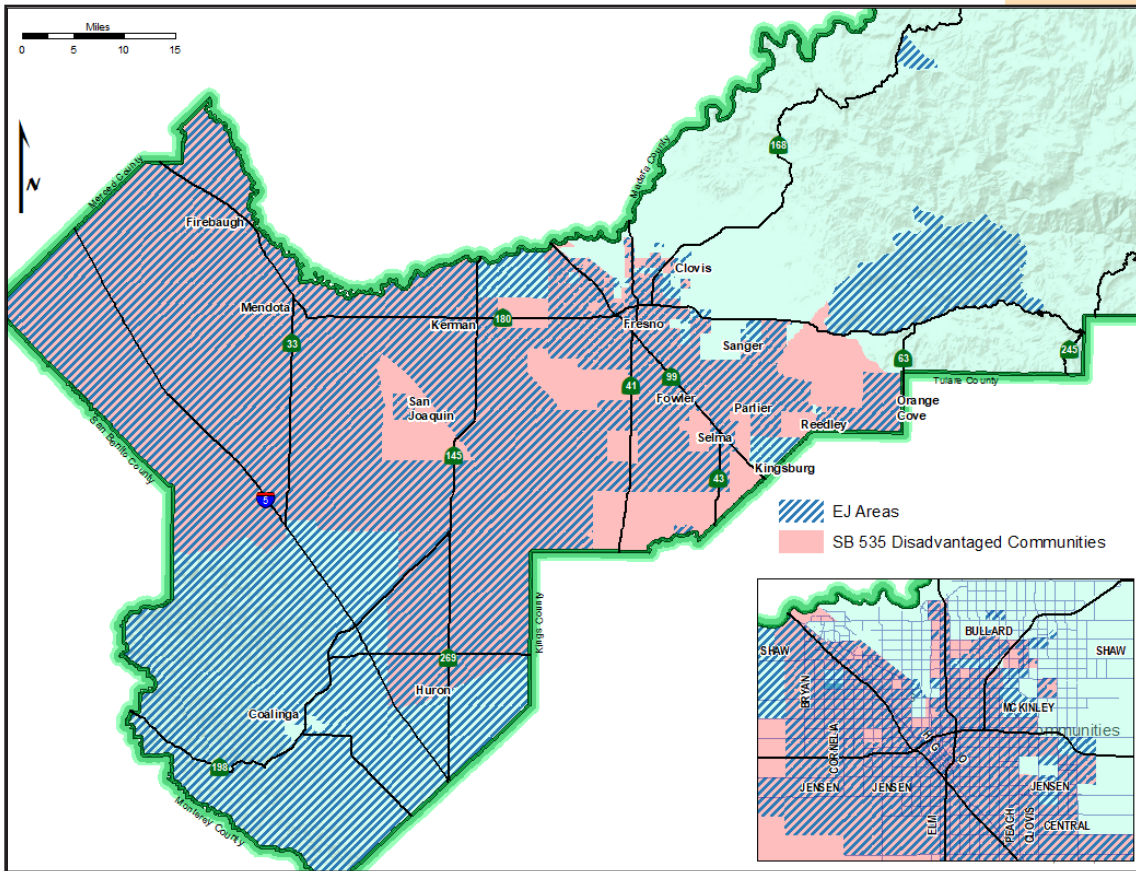

FIGURE 7-4:
SB 535 AREA /
ENVIRONMENTAL
JUSTICE TAZS

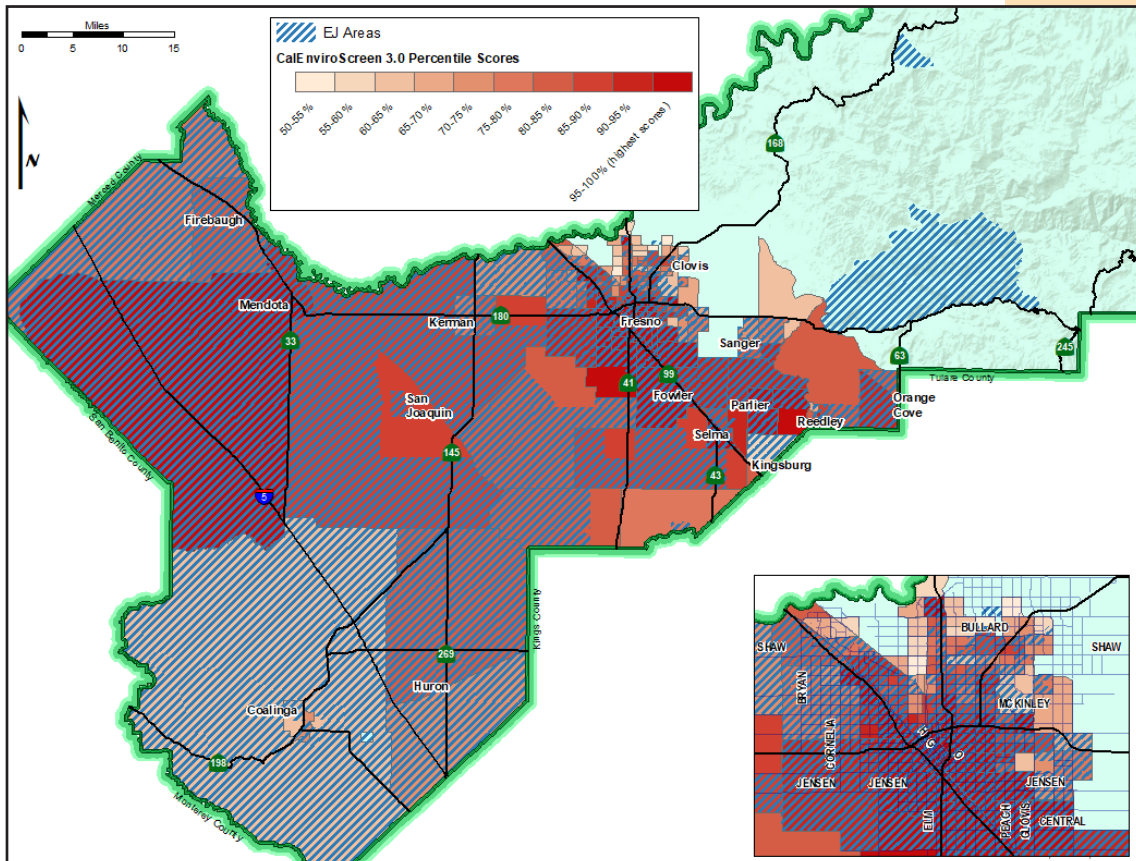

FIGURE 7-5:
CALENVIROSCREEN
3.0 /
ENVIRONMENTAL
JUSTICE TAZS

Some of the specific limitations will be discussed throughout the analysis discussion as needed, but there are several important caveats that apply to all the analysis, including:

- Whether areas qualify as “EJ” or “Non-EJ” depends on thresholds for block groups that quantify the residents of an area, but they are not monolithic. There are residents who do not have low incomes and/or who are not from minority groups who reside in EJ Communities. There are also low-income and minority residents who live in Non-EJ Communities.
- With its current analytical tools, Fresno COG is not able to predict where people of color, or low-income populations, will locate in the future. As a result, and for purposes of this analysis, the EJ areas identified with base year data are assumed to be the same for 2046. With the continuing diversification of the Fresno region, which is reinforced by the Regional Housing Needs Allocation requirements, this assumption might or might not provide the best projection where the EJ or non-EJ communities would be in 2046.

Measuring the Benefits and Burdens

To measure the benefits and burdens of the proposed 2022 RTP projects on disadvantaged communities, the EJ subcommittee and RTP roundtable approved the following eight quantitative performance measures:

Transportation

- o Access to Jobs & Services
- o Travel Delay
- o Transit Productivity

Financial Investments

- o Distribution of investments by mode
- o Distribution of road maintenance projects
- o Targeted active transportation investments

Quality of life

- o Housing Mix
- o Pollution Exposure

The performance measures compare the current (2019) transportation system to the future (2046) transportation system which assumes the construction of all projects proposed in the preferred scenario including transit, capacity increasing, bike and pedestrian, and maintenance and operational improvement projects. Model assumption inputs for analyzing performance indicators are derived from the demographic forecast for households, employment and land use as detailed in Chapter 3: Fresno Today. The forecasts used for the 2022 Fresno COG Regional Transportation Plan/Sustainable Communities Strategy were from the updated Fresno County 2050 Growth Projections prepared by Applied Development Economics (ADE), October 2020 and is contained in the Sustainable Communities Strategy Appendix I. The newly developed Activity-Based Model (ABM) was applied in the EJ analysis. Documentation of the ABM is available on Fresno COG website at Fresno Activity-Based Model Update. The land use and roadway projects assumptions are consistent with Scenario B, which was selected by the Fresno COG Policy Board as the preferred SCS scenario.

Transportation Performance Measures

Access to Jobs and Services

Description:

Access to Jobs and Services is defined as the ability to move throughout the region. It is measured by the time it takes to reach desired destinations from one's home during the morning commute hours. Jobs and services were defined as major job centers, medical facilities, parks and schools.

Methodology:

This indicator measures the ease of reaching defined areas of interest during the morning rush hour. Average auto and transit travel times are measured using the Activity Based Model.

Goal or Purpose:

For the Environmental Justice communities obtain an equitable share of the benefits without receiving disproportionately high and adverse effects.

Discussion of results:

The analysis in general shows that in the future accessibility will hold steady for vehicle drivers and passengers, but that transit times will reduce significantly across all categories. This is especially good for the EJ communities since the majority of transit riders are low-income. A 2022 Fresno Area Express (FAX) Passenger Satisfaction Survey reports on-board interviews showed that 76% of respondents earn an annual household income of less than \$19,999. Under all conditions, EJ TAZs have average travel times to areas of interest equal to or shorter than the travel times from non-EJ TAZs for all modes of travel (drive alone, carpool and transit). The results of this performance measure demonstrate that the Environmental Justice communities obtain an equitable share of the benefits without receiving disproportionately high and adverse effects.

AM Peak Travel Time (minutes)		2019		2046	
		EJ	Non-EJ	EJ	Non-EJ
FCMA	Drive alone	10	10	9	10
	Shared Drive	7	8	7	7
	Transit	41	46	35	37
Remainder of County	Drive alone	15	22	14	20
	Shared Drive	9	16	9	15
	Transit	42	47	38	39
Countywide	Drive alone	11	12	11	12
	Shared Drive	8	9	7	8
	Transit	41	46	35	37

Travel Delay

Description:

Travel Delay is defined as the ability to move throughout the region during the afternoon rush hour.

Methodology:

This indicator determines a ratio of the average travel times for trips throughout the county during the afternoon rush hour to the average travel times for those same trips when there is no delay and traffic is free flow. Travel Time Index of 1 indicates no travel delay.

Goal or Purpose:

For the Environmental Justice communities obtain an equitable share of the benefits without receiving disproportionately high and adverse effects.

Discussion of results:

Generally countywide and in the Fresno/Clovis Metropolitan Area, travel conditions in the PM peak hours will improve for the EJ areas as a result of the investment

PM Peak Travel Time Index	2019		2046	
	EJ	Non-EJ	EJ	Non-EJ
FCMA	1.24	1.07	1.18	1.07
Remainder of County	1.00	1.00	1.01	1.01
Countywide	1.13	1.04	1.10	1.04

from the 2022 RTP, whereas the afternoon commute time for the non-EJ areas will remain constant or become slightly longer over time. The rural areas do not have congestion now as the travel index is close to 1. The same

is true in 2046. The results of this performance measure demonstrate that the Environmental Justice communities obtain an equitable share of the benefits without receiving disproportionately high and adverse effects.

Transit Productivity

Description:

Transit productivity measures the increase in transit ridership due to the transit projects in the 2022 RTP/SCS.

Methodology:

This indicator compares the number of miles transit passengers traveled in 2019 to the number of miles transit passengers are forecasted to travel in 2046.

Goal or Purpose:

For the Environmental Justice communities obtain an equitable share of the benefits without receiving disproportionately high and adverse effects.

Discussion of results:

This data demonstrates that the projects in the 2022 RTP/SCS will dramatically increase the number and length of transit trips countywide in a balanced fashion as transit ridership essentially doubles in both the EJ and Non-EJ TAZs. By 2046, all transit fleets will be zero emission, there will be many new transit centers, shorter wait times and expanded routes and schedules. The results of this performance measure demonstrate that the Environmental Justice communities obtain an equitable share of the benefits without receiving disproportionately high and adverse effects.

Passenger Miles Traveled (PMT)	2019			2046		
	Total	EJ	Non-EJ	Total	EJ	Non-EJ
PMT	115,251	77,975	37,276	193,509	129,062	64,447

Financial Investments Performance Measures

Distribution of investments by mode

Description:

This indicator shows the 2022 RTP/SCS funding invested in EJ and Non-EJ areas for the following project types: Bicycle & Pedestrian, Transit, Streets & Roads - Maintenance, Capacity Increasing and Operations.

Methodology:

This indicator calculates the total funding for the program of projects in the preferred 2022 RTP/SCS scenario for each project type in EJ and Non-EJ areas.

Goal or Purpose:

For the Environmental Justice communities obtain an equitable share of the benefits without receiving disproportionately high and adverse effects.

Discussion of results:

EJ areas have 64% of the population but will receive 68% of the total transportation investments and over \$1,000 more per capita than the Non-EJ areas. The results of this performance measure demonstrate that the Environmental Justice communities obtain an equitable share of the benefits without receiving disproportionately high and adverse effects.

Mode	EJ	Non-EJ
Bicycle & Pedestrian	590,682,698	450,912,652
Transit	954,707,160	71,129,673
Streets & Roads - Maintenance	1,306,061,297	393,788,036
Streets & Roads - Capacity Increasing	777,690,436	851,957,314
Streets & Roads - Operations	473,997,013	153,629,820
Total	4,103,138,604	1,921,417,495
Total funding per capita	\$6,512	\$5,421

Distribution of Road Maintenance Projects

Description:

This indicator compares the miles of roadway maintenance projects in the 2022 RTP/SCS in the EJ and Non-EJ areas.

Goal or Purpose:

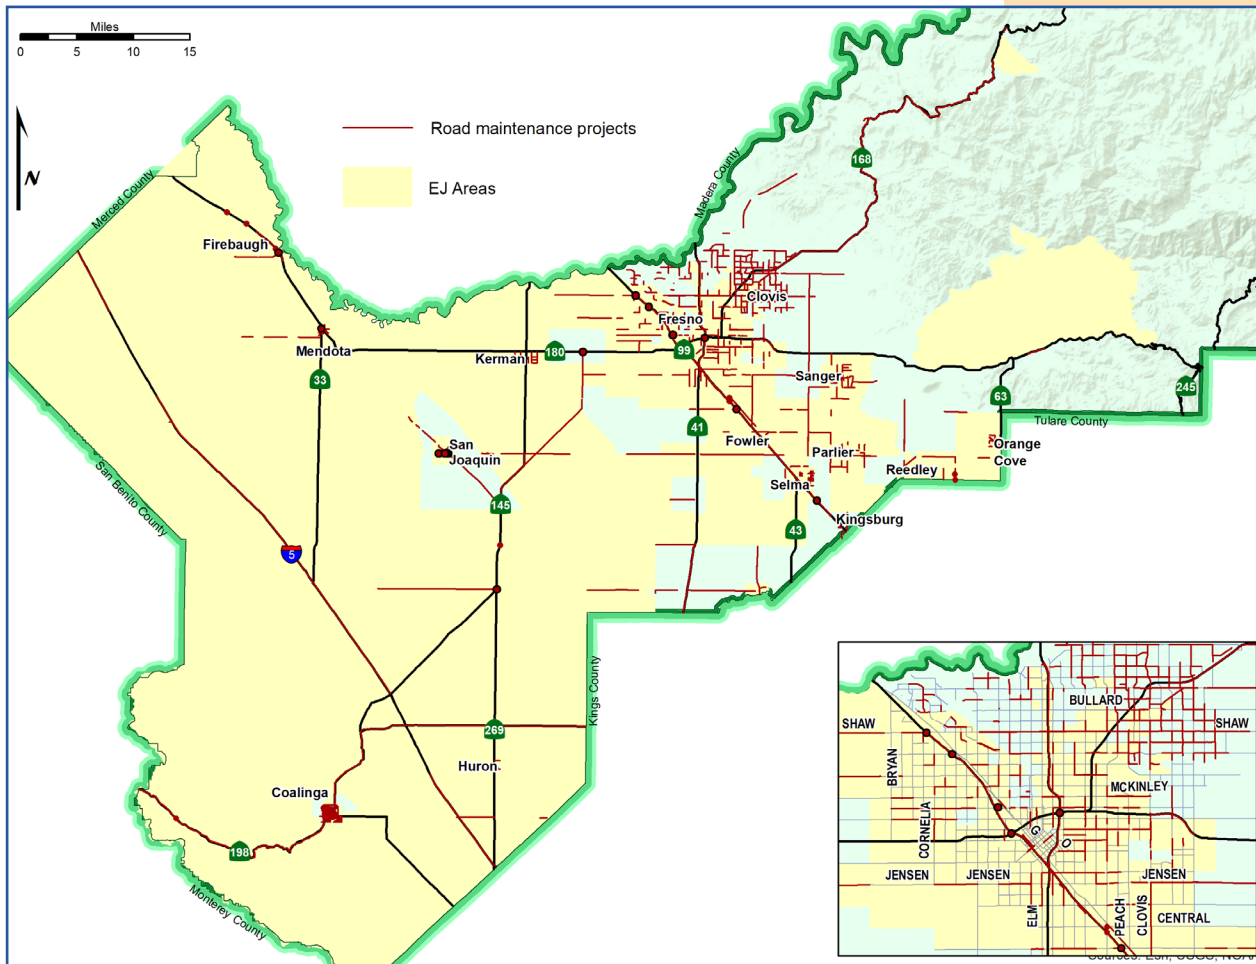

For the Environmental Justice communities obtain an equitable share of the benefits without receiving disproportionately high and adverse effects.

Discussion:

EJ areas will have considerably more roadway maintenance project miles compared to the Non-EJ areas. There are also 30 maintenance projects located at intersections. 90% of these projects are in EJ areas. The results of this performance measure demonstrate that the Environmental Justice communities obtain an equitable share of the benefits without receiving disproportionately high and adverse effects.

Road maintenance projects	EJ	Non-EJ
Length of road maintenance projects (miles)	489.25	289.62
Length of road maintenance projects (% of total)	62.8%	37.2%
Road maintenance projects at intersections	27	3
Road maintenance projects at intersections (% of total)	90.0%	10.0%

Figure 7-6:
Road Maintenance Projects / Environmental Justice TAZs

Targeted Active Transportation Projects

Description:

This indicator compares the lane miles constructed for bicycle and pedestrian projects in the 2022 RTP in the health burdened EJ and Non-EJ areas.

Methodology:

Data from the Fresno County Department of Public Health - Health Priority Index (HPI) is used to map the most health burdened areas. The HPI compiles data from national, state, and local sources to visualize the level of health burden within each census tract in Fresno County. HPI is based on guidance from U.S. Centers for Disease Control and Prevention (CDC), Community Health Assessment for Population Health Improvement (2013), through the Fresno Community Health Improvement Partnership. Four health indicators are in this composite data. They include the 25% poorest performing on CalEnviroScreen Pollution Burden, Composite Mortality Index, Years of Potential Life Lost (set at 75) and Pre-term Births. The HPI scale has 4 levels with 4 as the most health burdened

area. Areas with levels 3 and 4 are considered the most health burdened areas for this performance measure.

Goal or Purpose:

For the Environmental Justice communities obtain an equitable share of the benefits without receiving disproportionately high and adverse effects.

Discussion of results:

The results show that the EJ areas in the most health burdened sections of Fresno County contain over six times the number of miles of bicycle and pedestrian projects than the health burdened Non-EJ areas. This in part can be attributed to the State of California favoring grant applications for bicycle and pedestrian projects in extremely disadvantaged communities. The results of this performance measure demonstrate that the Environmental Justice communities obtain an equitable share of the benefits without receiving disproportionately high and adverse effects.

Targeted Active Transportation Project miles	EJ & HPI ≥ 3	Non-EJ & HPI ≥ 3
Project length (miles)	147.8	21.4

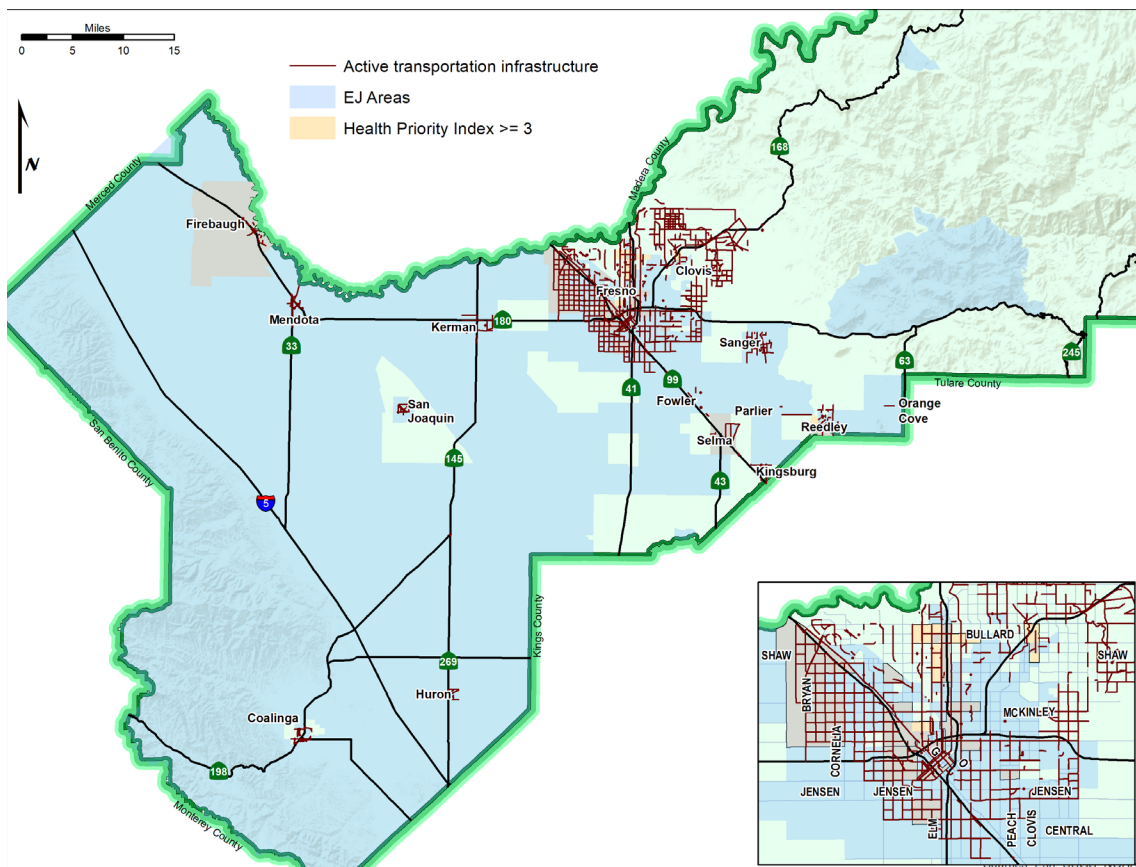

FIGURE 7-7:
HEALTH PRIORITY
INDEX AREAS
 ≥ 3 / ACTIVE
TRANSPORTATION
PROJECTS /
ENVIRONMENTAL
JUSTICE TAZS

Quality of Life Performance Measures

Housing Mix

Description:

This indicator calculates and compares the number & type of housing units in both the EJ and non-EJ areas.

Methodology:

This indicator demonstrates future year new housing estimates based on the proposed land use designation from the General Plans of all 15 cities and the County along with the Land Use Strategies within the preferred 2022 RTP/SCS scenario.

Goal or Purpose:

No unaddressed disproportionately high adverse effects for Environmental Justice communities.

Discussion of results:

Overall, the EJ areas are expected to have a higher housing growth rate compared to Non-EJ areas. The State sets ambitious policies and goals to reduce vehicle miles traveled (VMT) and greenhouse gases (GHG) and directs future housing development towards urban areas where residents are closer to jobs and services. Such urban areas in Fresno region are mostly located within the EJ areas. The City of Fresno General Plan calls for 50% of

the city’s new development through 2035 in infill development areas. Much of this new development is planned in and around Downtown, the neighborhoods immediately surrounding Downtown, and along the bus rapid transit corridors running north and east from the Downtown area. All these infill development areas are in EJ areas. Furthermore, state housing legislation requires that through the Regional Housing Need Allocation (RHNA) process the region will increase the housing supply and mix of housing types in an equitable manner across the region and address disparities in housing need and access to opportunity and replace segregated living patterns. RHNA, which looks at the first 8 years of the RTP planning timeframe, seeks to provide a more equitable distribution of housing types and affordability across the region. The 2022 RTP provides a general direction that is consistent with the State’s housing policies. As shown in the above table multifamily housing development is increasing in the Non-EJ areas at a higher rate than in the EJ areas. The rate of single-family housing development is projected to grow faster in the EJ areas than the non-EJ areas.

Housing Mix	2019		2046		Percent Growth between 2019-2046	
	EJ	Non-EJ	EJ	Non-EJ	EJ	Non-EJ
Single Family	121,636	113,579	143,579	126,401	18%	11%
Multifamily	63,083	21,794	84,074	30,183	33%	38%
Total	184,719	135,373	227,653	156,584	23%	16%

Description:

Traffic-related air pollution is a main contributor to unhealthy ambient air quality, particularly in urban areas with high traffic volume. Studies suggest that health risks are associated with locating housing near freeways as populations in areas surrounding freeways may have an increased risk of asthma, non-asthma respiratory symptoms, impaired lung function, and cardiovascular mortality. The Center for Disease Control (CDC) states that traffic emissions are highest at the point of release and typically diminish to near background levels within 150 to 300 meters of the roadway; however, the potential exposure zone around roads can vary considerably depending on the pollutant, traffic volume, ambient pollution concentrations, weather, topography, and land use. In terms of traffic density, adverse health effects associated with residential proximity to roads with average daily traffic volume (ADT) as low as 10,000 vehicles per day. In contrast, the California Air Resource Board (ARB) published in 2005 the Air Quality And Land Use Handbook: A Community Health Perspective which recommends siting new sensitive land uses such as residence and schools at a distance of greater than 500 feet of a freeway or from with urban roads of 100,000 ADT, or rural roads with 50,000 ADT. However, there are very few roads in Fresno County that meet the ARB threshold of urban roads with 100,000 ADT, or rural roads with 50,000 ADT. Therefore, Fresno COG has adopted and slightly modified the CDC's methodology for measuring Air Contaminant Exposure to better reflect the traffic in the county. The CDC used roadways with a functional classification of 1 & 2. Fresno COG used roadways with a functional classification of 1, 2 and 3. The EJ Subcommittee requested that other large facility polluters and Superfund/brownfield sites be included with roadways in this performance measure. Therefore, this indicator will measure the percentage of Housing Units within 500 Feet of a major polluter as defined below.

Methodology:

Major polluters were defined as:

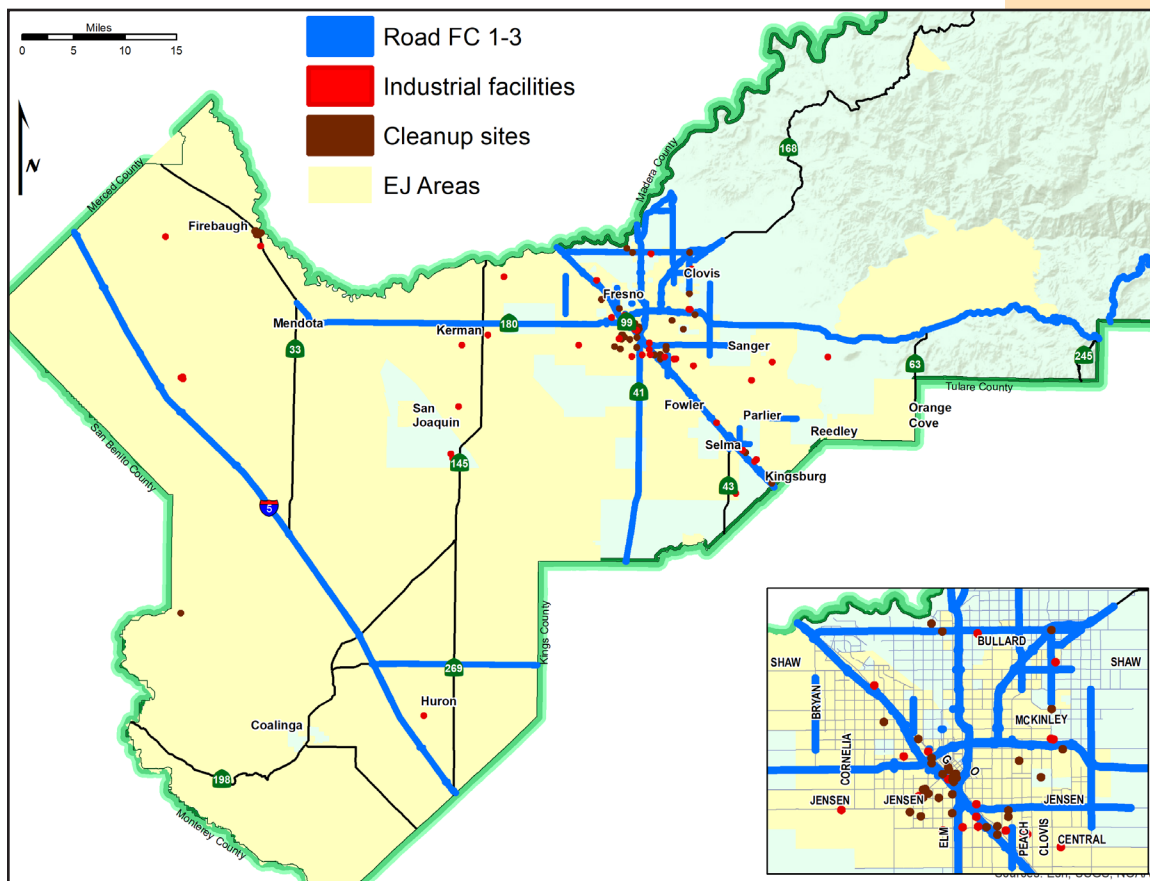

- Road functional classifications 1-3, which includes Interstates, freeways or expressways and principal arterials (CDC used Road functional classifications 1-2)
- large facility polluters, as defined by California Air Resources Board Pollution Mapping Tool
- EPA superfund & brownfield sites

These roadways and sites were mapped and distance to current and future housing stock was determined.

Goal or Purpose: For the Environmental Justice communities obtain an equitable share of the benefits without receiving disproportionately high and adverse effects.

Discussion of results: There is now and plans that show that in the future there will be a slightly higher percentage of new housing units built within 500' of a major polluter in the EJ areas compared to the Non-EJ areas. This is partially due to the State of California's policies and goals to reduce sprawl, greenhouse gas emissions and vehicle miles traveled by encouraging and incentivizing more housing closer to major transit lines, downtown, and urban core areas where many EJ communities are located and there are more major roadways. However, projections show the share of electric vehicles on Fresno County roads rising steadily. Additionally, executive order N-79-20 by California Governor Gavin Newsom, not only mandates that all new passenger car and truck sales in the state will have to be electric by 2035, but it also directs state agencies to develop strategies to improve air quality in other ways. As a result, emissions will steadily decrease. This will take away much of the pollution burden within 500' of roadways. The results of this performance measure demonstrate that the Environmental Justice communities obtain an equitable share of the benefits without receiving disproportionately high and adverse effects.

Conclusions

This Environmental Justice & Equity Analysis is a tool to help determine proposed 2022 RTP/SCS projects' equitable distribution of benefits and burdens, as well as their overall cost/benefit to our inhabitants, especially those living in disadvantaged neighborhoods. The performance indicators demonstrate that in terms of overall equity, the 2022 RTP/SCS projects appear to distribute benefits and impacts equitably between the EJ and non-EJ areas of Fresno County. Overall, the proposed projects will generally improve conditions for the EJ communities in most performance areas.

Although this Environmental Justice & Equity Analysis focuses on racial minorities and low-income populations, Fresno COG is also very involved with programs for elderly and disabled populations. Some of these programs include the Senior Taxi Scrip program, FTA Section 5310 grants (Transportation for Elderly Persons and Persons with Disabilities) and consulting the Social Services Transportation Advisory Council (SSTAC). The SSTAC serves as a Fresno COG advisory body regarding transit-dependent and transit-disadvantaged population needs, including the elderly, handicapped, and persons of limited means.

Based on the results of the Environmental Justice & Equity Analysis, Fresno COG can conclude that EJ communities are not disproportionately burdened by high and adverse effects and do share equitably in the benefits from the 2022 RTP/SCS.

APPENDIX M

ANNUAL LISTING OF PROJECTS

Annual Listing of Projects with Federal Funding for Federal Fiscal Year 2023

Fresno Council
of Governments

November 2023

Fresno Council of Governments
2035 Tulare Street, Suite 201
Fresno, California 93721
Phone: (559) 233-4148
Fax: (559) 233-9645
Website: www.fresnocog.org

Purpose

23 CFR 450.334 of the Federal Register outlines the requirement for Metropolitan Planning Organizations (MPOs) to publish an annual listing of projects for which funds have been obligated in the preceding year, including a listing of pedestrian and bicycle projects. From the Fixing America's Surface Transportation (FAST) Act, 23 U.S.C. 134(j)(7)(B), 23 U.S.C. 135(g)(5)(B), 49 U.S.C. 5303(j)(7)(B), and 49 U.S.C. 5304(g)(5)(B), the requirement is as follows:

“An Annual Listing of projects, including investments in pedestrian walkways and bicycle transportation facilities, for which federal funds have been obligated in the preceding year, shall be published or otherwise made available by the cooperative effort of the State, transit operator, and metropolitan planning organization for public review. This listing shall be consistent with the funding categories identified in each metropolitan transportation improvement program.”

This report is published in response to the above requirement by listing all federally funded transportation projects in the Fresno County region that were obligated during federal fiscal year 2023. Obligation refers to the federal government's commitment to pay or reimburse the lead agency for the federal share of a project's cost. Obligation does not indicate expenditure or project completion; only that the project has been approved for federal reimbursement. Programmed project costs can be found in the corresponding Federal Transportation Improvement Program (FTIP) and Regional Transportation Plan (RTP).

Background

Fresno COG is a voluntary association of local governments, one of 25 in California and 522 nationwide. In 1967, elected officials of Fresno County and its incorporated cities informally created the Council to provide "a cooperative body" for the discussion and resolution of issues which go beyond their individual boundaries. Subsequent federal and state laws encouraged such efforts, and the agency was formalized in 1969.

Fresno COG fosters intergovernmental communication and coordination, undertakes comprehensive regional planning with an emphasis on transportation, provides for citizen involvement in the planning process, and supplies technical services to its member governments.

In all these areas the Fresno COG serves as a consensus builder to develop an acceptable approach on how to handle problems that do not respect political boundaries.

Who are the members, their representatives, and how do they vote?

Fresno COG's member agencies are represented on the Policy Board by the Mayors of each incorporated city, and the Chairman of the County Board of Supervisors, or designated representatives.

The Policy Board is a governing body that establishes policy and guides work activities. They are assisted in making decisions by the Policy Advisory Committee (PAC), composed of the Chief Administrative Officer of each member agency, or their designated representatives. With the exception of urgent matters, all items must first be considered by the PAC before submission to the Policy Board.

The Policy Board and PAC are assisted in the decision-making process by staff from their agencies, citizen and interest groups, and various technical advisory committees who comprise the Transportation Technical Committee (TTC).

Fresno COG Policy Board

Reedley	Councilmember Mary Fast
Sanger	Mayor Frank Gonzalez
San Joaquin	Mayor Julia Hernandez
Selma	Mayor Scott Robertson

The Regional Transportation Plan

The RTP is a long-range (25-year) plan that provides a vision for future transportation improvements and investments based on specific transportation goals, objectives, policies, and strategies. The RTP is based on federal transportation law requiring comprehensive, cooperative, and continuous transportation planning. Fresno COG meets these requirements by developing comprehensive transportation plans that include all

surface transportation modes (also known as multi-modal planning), to ensure efficient people and goods movements throughout the region.

The RTP provides strategic direction for transportation capital investments by assessing regional growth and economic trends. Thus, the RTP helps planners link transportation investments to provide a cohesive, balanced, and multimodal transportation system that will help relieve traffic congestion, improve safety, and provide for economic development.

The Federal Transportation Improvement Program

As the designated MPO for the region, Fresno COG also prepares and maintains the FTIP, which is the short-term (four-year) planning document. The FTIP includes a listing of all transportation-related projects requiring federal funding or other approval by the federal transportation agencies. The FTIP also lists non-federal, regionally significant projects for information and air quality modeling purposes.

Projects included in the FTIP are consistent with Fresno COG's RTP and are part of the area's overall strategy for providing mobility, congestion relief, and reduction of transportation-related air pollution in support of efforts to attain federal air quality standards for the region.

Public Involvement

Fresno COG aims to proactively engage the public in the regional transportation planning process and embrace federal requirements that MPOs provide the public with complete information, timely public notice, full public access to key decisions, and early and continuing involvement in developing the FTIP, RTP, and other products.

Annual Listing of Projects with Federal Funding for Federal Fiscal Year 2023

Federal law requires Fresno COG to publish for public review an annual listing of projects for which federal funds have been obligated in the preceding year, as a record of project delivery and a progress report for public information and disclosure.

This report is divided into the funding types administered by the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA). Projects are listed by *Lead Agency*, *FTIP Program*, *Federal ID*, and *Fresno COG ID*. The *Fresno COG ID* number is a unique project identifier used in the FTIP; the category *Total Dollar Amount in FTIP* is included for reference of total project funding. Multiple *Federal IDs* can correspond with one *Fresno COG ID*. Please note that this list includes only federal funds that were obligated; no state or local funds are reported. The information contained in this report was provided by the California Department of Transportation (Caltrans).

This report indicates that nearly \$141 million in federal funds were obligated for transportation projects in the region between October 1, 2022 and September 30, 2023.

The federal funds obligated for transportation projects were distributed amongst Congestion Mitigation Air Quality (CMAQ), Highway Bridge Program (HBP), Highway Safety Improvement Program (HSIP), State Highway Operation and Protection Program (SHOPP), Local Rail, Regional Improvement Program (RIP), Surface Transportation Program (STP), and Active Transportation Program (ATP) projects.

ANALYSIS: ADDRESSING FEDERAL PERFORMANCE MEASURE REQUIREMENTS

Transportation Performance Management

How the FTIP Addresses Federal Requirements for Performance Measures

Background

Federal rules require that the Federal Transportation Improvement Program (FTIP) “be designed such that once implemented, it makes progress toward achieving the performance targets established under § 450.306(d).” Also, the FTIP “shall include, to the maximum extent practicable, a description of the anticipated effect of [the FTIP] toward achieving the performance targets identified in the metropolitan transportation plan, linking investment priorities to those performance targets.”ⁱ

The Moving Ahead for Progress in the 21st Century Act (MAP-21, 2012) established new requirements for metropolitan planning organizations (MPOs) to coordinate with transit providers, set performance targets, and integrate those performance targets and performance plans into their planning documents by specified dates. The most recent federal transportation legislative package, the Infrastructure Investment and Jobs Act of 2021 (IIJA), carries forward these performance-based planning requirements. Beginning in 2018, federal rules required that state departments of transportation and MPOs implement federally defined transportation system performance measures. In response, FHWA and FTA worked with state, regional, and transit agencies to identify performance measures that meet the requirements.

In California, Caltrans is directly responsible for submitting statewide performance targets and periodic progress reports to federal agencies. MPOs are required to establish targets for the same performance measures for their respective metropolitan planning areas within 180 days after the state establishes each target. MPOs may elect to support the statewide targets, establish alternative quantitative targets specific to their region, or use a combination of both approaches. Furthermore, each MPO must incorporate these short-range performance targets into their planning and programming processes, including the regional transportation plan (RTP) and FTIP.

FHWA Performance Measures

The federal performance measures defined by the Federal Highway Administration (FHWA) are categorized into three performance management (PM) focus areas. Each focus area includes an associated set of metrics for which statewide and regional targets must be set.

PM 1: Transportation Safety

Motor Vehicle Collisions

- Number of motor vehicle collision fatalities

- Rate of motor vehicle collision fatalities per 100 million VMT
- Number of motor vehicle collision serious injuries
- Rate of motor vehicle collision serious injuries per 100 million VMT

Non-Motorized Fatalities and Serious Injuries

- Number of non-motorized fatalities and serious injuries

PM 2: National Highway System (NHS) Pavement and Bridge Condition

NHS Pavement Condition

- Percentage of Interstate System pavement in 'good' condition
- Percentage of non-interstate NHS pavement in 'good' condition
- Percentage of Interstate System pavement in 'poor' condition
- Percentage of non-interstate NHS pavement in 'poor' condition

NHS Bridge Condition

- Percentage of NHS bridges in 'good' condition
- Percentage of NHS bridges in 'poor' condition

PM 3: NHS Performance, Interstate System Freight Movement, and CMAQ Program Performance

NHS Performance

- Percent of Interstate System mileage reporting reliable person-mile travel times
- Percent of non-interstate NHS mileage reporting reliable person-mile travel times

Interstate Freight Movement

- Percent of Interstate system mileage reporting reliable truck travel times

CMAQ Program Performance

- Annual hours of peak-hour excessive delay per capita
- Total emissions reduction by criteria pollutant (PM10, PM2.5, Ozone, CO)
- Percent of non-single occupancy vehicle (SOV) travel

FTA Performance Measures

In addition to the three PM focus areas defined by FHWA, the Federal Transit Administration (FTA) established performance measures and reporting requirements for transit asset management (TAM) and transit safety.

Performance metrics for TAM focus on the maintenance of our regional transit system in a state of good repair. Transit safety performance monitoring is focused on assessment of the number of transit incidents resulting in fatalities or serious injuries and transit system reliability.

FTA issued the TAM Final Rule (49 CFR §625 et seq.), effective October 1, 2016, to implement MAP-21 transit asset management provisions. This final rule mandates a National TAM System, defines ‘State of Good Repair’ (SGR), and requires transit providers to develop TAM plans. The Metropolitan Transportation Planning Final Rule (23 CFR §450.206) outlines the timelines and processes by which states, MPOs, and transit providers must coordinate in the target setting process.

The FTA PM focus areas and associated metrics are as follows:

Transit Asset Management (TAM)

- Equipment: Share of non-revenue vehicles that meet or exceed useful life benchmark
- Rolling Stock: Share of revenue vehicles that meet or exceed useful life benchmark
- Infrastructure: Share of track segments with performance restrictions
- Facilities: Share of transit assets with condition rating below 3.0 on FTA Transit Economic Requirements Model (TERM) scaleⁱⁱ

Transit Safety

- Number of transit-related fatalities
- Number of transit-related injuries
- Number of transit system safety events
- Transit system reliability

Public Transit Agency Safety Plan

On July 19, 2018, the FTA published the Public Transportation Agency Safety Plan (PTASP) Final Rule (49 CFR §673.15) regulating how Chapter 53 grantees would have to implement federally mandated safety standards. The rule’s effective date was July 19, 2019, and the compliance date was initially set for July 20, 2020. Considering the extraordinary operational challenges presented by the COVID-19 public health emergency, FTA issued a Notice of Enforcement Discretion effectively extending the PTASP compliance deadline from July 20, 2020 to December 31, 2020. The MPO’s initial transit safety targets are to be set within 180 days of receipt of the safety performance targets from the transit agencies. The MPO then revisits its targets based on the schedule for preparation of its system performance report that is part of the Metropolitan Transportation Plan (MTP). The first MTP or FTIP update or amendment to be approved on or after July 20, 2021, is required to include the MPO’s transit safety targets. See FTA’s COVID-19 FAQs page for more information about the Notice.ⁱⁱⁱ

The final rule specifically requires transit agencies receiving federal funds to develop a safety plan and annually self-certify compliance with that plan. The National Public Transportation Safety Plan identifies four performance measures that must be included in the transit agency safety plans: number of fatalities, number of injuries, safety events, and system reliability. Each transit agency must make its safety performance targets available to MPOs to assist in the planning process and to coordinate, to the maximum extent practicable, with the MPO in selecting regional transit safety targets.

How Fresno COG Addresses Each Performance Management Focus Area

Transportation Safety (PM 1)

PM1 is the annual target setting process for transportation safety. MPOs can either choose to support the statewide target or set a separate regional target. Except for the first round in 2018 when Fresno COG set its own targets, it has been simply supporting the statewide targets. COG recently finalized the seventh round of safety targets for 2024.

This year, Caltrans released the 2024 safety targets in August 2023 giving MPOs the deadline of February 2024 to either support the statewide targets or set their own targets. Caltrans set the statewide safety targets consistent with the National Highway Traffic Safety Administration (NHTSA)'s new requirement that would reflect constant targets between 2021 and 2026 five-year rolling average. This was achieved by setting the 2026 rolling average target equal to that of 2021 and using the average annual change to calculate the annual projection between 2021-2024. Based on this methodology, 2.8% and 3.7% are the annual reduction targets for number of fatalities and serious injuries respectively. Similarly, the annual reduction targets for rate of fatalities and rate of serious injuries are 4.6% and 3.7% respectively. Table 1 shows the statewide targets for 2024.

Table 1 - Safety Performance Targets

Performance Measure	Data Source	5-Yr. Rolling Average Target for 2024	Annual Percentage Change for 2024
Number of Fatalities	FARS	4,080.6	-2.84%
Rate of Fatalities (per 100M VMT)	FARS & HPMS	1.300	-4.61%
Number of Serious Injuries	SWITRS	16,628.1	-3.69%
Rate of Serious Injuries (per 100M VMT)	SWITRS & HPMS	4.918	-3.69%
Number of Non-Motorized Fatalities and Non-Motorized Severe Injuries	FARS & SWITRS	4,380.5	-2.84% for Fatalities and -3.69% for Serious Injuries

Note: The targets highlighted in gray are set in coordination with OTS.

Each year, Fresno COG analyzes the historical crash datasets for Fresno County region and proposes different target- setting options to discuss with the safety committee. The safety committee comprises engineers and safety planners from multiple member jurisdictions in Fresno County. The committee convened on December 21, 2023 to discuss the appropriate methodology/option for the region. Fresno COG presented two options to the committee: first, the state targets applicable to the Fresno County region and second, the best fit curve using the historical trendline of fatalities and serious injuries within Fresno County. The first option is simply using the annual percentage change for all five metrics from the

state targets and projecting the 2024 numbers based on the latest available crash number for 2021. The second option is a trendline approach in which the 5-year average curve was fitted with 3rd order polynomial equation. The second option was more aggressive and less achievable compared to the first option. 2024 targets for all five metrics from this option were higher than those from the State targets option. The committee unanimously selected the statewide targets this year again as it was more reasonable and achievable considering the COVID effect on travel patterns. Table 2 shows the two options considered by Fresno COG and presented to the Safety Committee.

Table 2 - Safety Performance Targets

Safety Metrics	State Targets 2024	COG Trendline
Number of Fatalities	-2.84%	-2.3%
Rate of Fatalities	-4.61%	-10.6%
Number of Serious Injuries	-3.69%	-12.0%
Rate of Serious Injuries	-3.69%	-12.0%
Non-Motorized Fatalities and Non-motorized Serious Injuries	-2.84% for fatalities and -3.69% for Serious injuries	-2.3% for fatalities and -12.0% for Serious injuries

Safety Plan Efforts in Fresno County

1. Fresno COG Regional and Local Transportation Safety Plan

Fresno COG developed a regional safety plan (RSP) and multi-jurisdictional local roadway safety plan (MLRSP) in 2021/22 to address Fresno County's disproportionate share of the state's traffic fatalities. As part of the RSP, Fresno COG convened a regional steering committee of local stakeholders for input on developing an existing condition report, identifying countermeasures, and developing strategies for the countermeasures, conducting public outreach to collect input on safety concerns, and developing a transportation safety education program by working with the consultant. The regional safety analysis tool was also developed as a part of this safety plan which can be used for the analysis of crash databases for the region.

The MLRSP also went side by side with the regional safety plan and developed the local road safety plan (LRSP) in ten jurisdictions in the Fresno County who don't have their individual local road safety plan. The

MLRSP was built off of RSP and was developed concurrently to maximize the data analyses, public engagement, and countermeasures design. The MLRSP brought together the local agencies with other safety partners to align safety efforts across jurisdictions. Each local agency develops its own safety goals, policies, and project priorities, but creating a multi-jurisdictional plan allowed for sharing of resources and provided a structure to support each local agency. While the RSP is the regional safety plan for the Fresno County, MLRSP developed the city specific LRSP that will make cities eligible for Caltrans's Highway Safety Improvement Program (HSIP) funding. Ten agencies in Fresno County secured the HSIP funds in the latest cycle 11. The final report of both the plans are now available in the Fresno COG's [website](#).

The major goals of these plans are:

- Study past crashes and gather public input to learn where, when, and why crashes happen in the County
- Identify the safety solutions that research shows will prevent the most common types of crashes and minimize their severity that occur in Fresno County
- Develop a transportation safety education program that will help people make choices that reduce their risk of being involved in a crash
- Create a roadmap for action, called an implementation plan, that helps Fresno County communities use public dollars in ways that save the most lives and prevent the most injuries
- Develop high-priority locations for potential safety improvements and ensure each jurisdiction is ready to apply for grant funding for safety improvements.
- Make all the jurisdictions in Fresno County eligible for the HSIP funding

2. Eastside Transportation Corridor Improvement Study

The purpose of the Fresno COG's Eastside Transportation Corridor Improvement Study (ETCIS) is to determine future transportation needs for the eastern part of the Fresno County, with a focus on the major transportation corridors that serve that area: Academy Avenue and Manning Avenue.

The goal of the study was to address mobility, access, safety, and connectivity for all modes of transportation. The ETCIS report presents safety improvements as one of the key outcomes of the project. A detailed safety analysis was conducted along the Eastside Corridors, Academy Avenue and Manning Avenue. The multimodal improvement recommendations proposed in the ETCIS are an outcome of this safety study.

3. 2024 Fresno County Regional Active Transportation Plan

2024 Active Transportation Plan (ATP) updates the existing plan and develops the plan for 12 jurisdictions within Fresno County. Many parts of the County lack sidewalks, shared-use paths, and bike lanes thereby making walking and biking unsafe, leading to non-motorized related collisions. ATP

outlines goals for supporting bicycling, walking, and other human-powered transportation within each jurisdiction that include increasing safety through engineering and facility improvements. To quantify its goals, the ATP outlines the length of each type of bikeway and the number of intersections and bicycle parking locations that would be improved through the actions outlined in the ATP.

The ATP predicts that implementing comprehensive measures throughout the County will significantly reduce crashes involving bicyclists and pedestrians. The ATP states that a 50% or greater reduction in injuries and fatalities is reasonable. Fresno COG has just completed the update of the ATP and published the draft [report](#) at the time of writing this document.

4. California Safe Roads Steering Committee

The COG participates in the California Safe Roads Steering Committee that oversees SHSP development. The steering committee establishes the strategies and processes to implement the SHSP and provides direction and oversight to challenge area teams, which evaluate and track best practices related to SHSP challenge areas. As a member of steering committee, the COG is privy to emerging best practices and proposed actions related to SHSP development as well as potential changes to the statewide vision for SHSP implementation.

5. Local vision zero and safety plans

City of Fresno, Clovis, Fowler, and Parlier along with County of Fresno garnered a total of more than 1.5 million in FY 2022 and 2023. The funds will be utilized in developing the safety action plans and vision zero plans. The latest funding by County was secured under supplemental planning and demonstration activities. The County of Fresno has also carried out multiple demonstration activities in the disadvantaged communities regarding the safe road behaviors as a pilot project from the State.

6. Other Programming and Funding

Fresno COG updates its Regional Transportation Plan (RTP) every four years. Please refer to the 2022 RTP [here](#). While the main purpose of the RTP is to address the GHG reduction, it continues to ensure the safety and mobility for the regional road network by programming various safety and operations projects. Apart from this, there are also some federal and state funding opportunities to improve the safety of the region. Please refer to chapter six “Financial Element” on the RTP website for the different funding programs.

Three statewide funding programs dedicated to transportation safety are employed by Fresno Council of Governments including:

1. Active Transportation Program (ATP)
2. Highway Safety Improvement Program (HSIP)
3. State Highway Operations & Protection Program (SHOPP) Collision Reduction

ATP

The ATP provides funding for bicycle and pedestrian projects. Since people are more vulnerable to safety risk while walking or biking as compared to traveling in a motor vehicle, any project that promotes the safe use of bicycling or pedestrian modes is likely to generate safety benefits. The ATP further emphasizes safety by allotting points for project applications that specifically seek to reduce the rate or number of pedestrian and bicyclist fatalities and injuries.

HSIP

The HSIP directly addresses transportation safety. The program's stated purpose is to "achieve a significant reduction in traffic fatalities and serious injuries on all public roads, including non-State-owned public roads and roads on tribal land." Successful project applications specifically seek to reduce collision related fatalities and injuries. The program is designed to focus local investments on locations and corridors that demonstrate the greatest need for safety improvement to implement lower cost countermeasures.

SHOPP Collision Reduction

SHOPP is the State Highway System's "fix-it-first" program that funds roadway repairs and preservation, emergency repairs, safety improvements, and some highway operational improvements on the State Highway System (SHS). SHOPP funding is limited to capital improvement projects that do not add new roadway capacity (no new highway lanes) to the SHS, though some new auxiliary lanes may be eligible for SHOPP funding.

The Collision Reduction program is one of eight categories that make up the SHOPP, and its objective is to reduce the number or severity of collisions. The SHOPP Collision Reduction category consists of two sub-programs:

- *201.010 - Safety Improvements*: Reactive approach based on analysis of collision history
- *201.015 - Collision Severity Reduction*: Proactive approach targeted to reduce the potential for traffic collisions based on past performance of roadway characteristics

201.010 – Safety Improvements

The SHOPP Collision Reduction Safety Improvements sub-program is designed to reduce the number or severity of collisions on the SHS. Projects with a safety index above 200 qualify as a safety improvement project. Projects may be individual locations where the collision history indicates a pattern potentially correctable by a targeted safety improvement, such as unsafe traffic (school zone signals included), wet pavement corrections, curve corrections, shoulder widening, left-turn channelization, etc. All proposed projects will be verified by the Caltrans Office of Traffic Safety Programs in the Division of Traffic Operations before being certified as a safety improvement project.

This program also provides funding for safety improvements at sites identified in regional monitoring programs for the reduction of motor vehicle collisions, such as locations at high risk for wrong-way, multilane, cross-median, cross-centerline, and run-off-the-road collisions. The program also provides funding for non-motorized safety improvements, such as pedestrian and bicycle facilities.

The Safety Improvements program does not provide funding for relocating existing highways or projects that would add new through lanes or upgrade existing highways to a higher classification, such as conventional to expressway, regardless of the safety benefits. This program also does not include projects where the prime purpose is reducing congestion.

Highway improvement projects along an existing alignment to improve standards of width, grade, alignment, or other geometric improvements, are considered new highway construction and are included in the Caltrans STIP programs.

201.015 - Collision Severity Reduction

This sub-program is focused on upgrading existing highway safety features within the roadbed's clear recovery area to reduce the number and severity of collisions. Eligible projects may include new guardrail end treatments and crash cushions, rumble strips, glare screen, rock fall mitigation, overcrossing pedestrian fencing, crosswalk safety enhancements, and improvements that prevent roadway departure.

The Collision Severity Reduction program is designed to be proactive in enhancing safety on the State Highway System. As such, this program is not subject to a safety index analysis but will define projected collision severity reduction performance quantitatively. Projects will be prioritized based on the projected collision severity reduction benefits provided.

2024 SHOPP Collision Reduction Numbers (Statewide)

A total of 635 projects are included in the 2024 SHOPP that was adopted by the CTC in March 2024. The 2024 SHOPP is valued at \$21.2 billion, which includes reservation amounts for several programs, including the Collision Reduction Program. The SHOPP Collision Reduction Program currently has 95 programmed safety projects totaling \$1,053,464,000. The SHOPP reserves \$1,135,000,000 for the 201.010 Safety Improvement program. The reserved amount will address future safety improvements as they are identified.

Surface Transportation Block Grant Program (STBG)

To encourage projects funded through STBG that address safety concerns, Fresno COG implemented a ranking criterion that prioritizes projects that have a safety component, which accounts for 10 percent of the total score. Twenty-two projects were awarded funding under the most recent call for projects in January 2024, all of which included a safety aspect.

Fresno COG partnered with Caltrans and Fresno County Transportation Authority (FCTA) to identify a funding plan for construction of our SR 41 Excelsior Expressway project. The SR 41 Excelsior

Expressway project will construct a 4-lane divided expressway from an existing 2-lane expressway and close a 6-mile unimproved gap. Over the last decade, this six-mile gap has recorded 146 collisions and 19 fatalities, accounting for 35% of deaths on the entire 44-mile stretch of SR 41 in Fresno County. Fresno COG programmed \$10m in the Regional Transportation Improvement Program, FCTA is contributing \$13m from our local sales tax, Measure C, and Caltrans programmed the remaining \$23m in their 2022 Interregional Transportation Improvement Program. Construction is scheduled to begin in the federal fiscal year 2024-25. Table 3 below shows the summary of the safety projects in the 2025 FTIP.

Table 3 - Safety Projects in the 2025 FTIP

Category	Number of Projects	% of Projects	Total Project Cost (All Years)	% of Total Project Cost	Funding in the 4-Year Element	% of Funding in the 4-Year Element
Primarily Safety Projects	59	28.6%	\$511,274,000	29.7%	\$395,551,000	28.0%
Other Projects with Safety Components*	49	23.8%	\$672,663,000	39.1%	\$521,955,000	36.9%
Non-Safety Projects	98	47.6%	\$537,275,000	31.2%	\$495,532,000	35.1%
Total FTIP Investments	206	100.0%	\$1,721,212,000	100.0%	\$1,413,038,000	100.0%

While some projects are primary safety projects, others include a peripheral safety element in it. In this round of FTIP, 59 projects are primarily the safety projects, and 49 projects are secondary safety projects (with safety components). 98 of the total FTIP projects are not related to safety at all. Altogether, there are 206 projects with a total project cost of approximately \$1.7 billion while total funding available in the 4-years element of the FTIP is only \$1.2 billion. Hence, there is a deficit of approximately \$500 million funding.

Table 4 shows the breakdown of all the FTIP projects, by funding type. 17% of the projects are funded by three major sources, ATP, HSIP, and SHOPP. The remaining 83% of projects are funded through other programs like STBG.

Table 4 - Fresno Council of Governments Safety Funding Programs

Fund	Number of Projects	% of Number of Projects	Total Project Funding (All Years)	% of Total Project Funding	Funding in the 4-Year Element	% of the 4-Year Element
ATP	20	9.7%	\$ 21,989,000	1.3%	\$18,756,000	1.3%
HSIP	1	0.5%	\$2,167,000	0.1%	\$2,167,000	0.2%
SHOPP	13	6.3%	\$336,886,000	19.6%	\$261,931,000	18.5%
Total Safety (ATP, HSIP, SHOPP)	34	16.5%	\$361,042,000	21.0%	\$282,854,000	20.0%
Other Programs	172	83.5%	\$1,360,170,000	79.0%	\$1,130,184,000	80.0%
Total	206	100.0%	\$1,721,212,000	100.0%	\$1,413,038,000	100.0%

Safety Project Highlights

- In Fresno County, on Auberry Road and Frazier Road, Fresno County is reconstructing the intersection and improving the horizontal alignment by flattening the curve. Installing a right-turn pocket, a left-turn pocket, widening the shoulders and improving intersection sight distance as well as installing a painted median. (FRE230007)
- On State Highway 180 near the community of Squaw Valley, from east of George Smith Road to Elwood Road; Caltrans District 6 is constructing a two-way left turn lane. (LSTMP754)
- On State Highway 180 near Mendota and Kerman, from West Belmont Avenue to Modoc Avenue; also, near Rolinda, from 0.2 mil east of Goldenrod Avenue to 0.3 mile west of Brawley Avenue, Caltrans is reconstructing centerline and shoulder rumble strips, and replace signs, and sensor loops. (LSTMP863)

National Highway System (NHS) Pavement & Bridge Condition (PM 2)

NHS Pavement and Bridge Condition (PM 2) Targets

Fresno County residents have continued to consistently voice a strong preference for prioritizing maintenance of roadways and bridges within the county. For the Surface Transportation Block Grant Program (STBG), Fresno COG implemented a ranking criterion that prioritizes projects primarily preservation-related in nature (rehabilitation, reconstruction, and replacement), which accounts for 40 percent of the total competitive score. Fresno COG implemented a multi-jurisdictional pavement management system (PMS) for nine local cities within the region that did not have such a program in place back in 2018. Now, COG is working on the update of this program, likely expanding to more member agencies, that helps to update the road inventory records, create an inventory of maintenance and repair needs, estimate the costs, develop a prioritization list, and plan the budget accordingly. PMS is designed to provide objective information and useful data for analysis so that local governments can make more consistent, cost-effective and defensible decisions related to the preservation of a pavement network. With the Pavement Management System, the cities will be able to prioritize roadway improvements and better manage their roadway repair and maintenance. Table 5 shows the 10-year TAMP targets set in 2021.

Table 5: PM2- National Highway System Pavement and Bridge Condition

Performance Measure	Target
Percentage of Interstate System pavement in 'Good' condition	22.4%
Percentage of non-interstate NHS pavement in 'Good condition	22.4%
Percentage of Interstate System pavement in 'Poor' condition	3.9%
Percentage of non-interstate NHS pavement in 'Poor' condition	3.9%
Percentage of NHS bridges in 'Good' condition	33.6%
Percentage of NHS bridges in 'Poor' condition	0.8%

Fresno COG along with all other MPOs in California worked with the State on the Transportation Asset Management Plan (TAMP) process and reported the financial information for pavement and bridges to Caltrans in 2021. This financial information was paired with statewide deterioration rates and statewide unit costs to estimate appropriate targets. Hence multiple alternatives along with 4 and 10 years invested/uninvested scenarios were developed, and 10 years targets were set in 2021. The excel tool developed by Caltrans was used to calculate the necessary funding needed to maintain the pavement and bridge assets. Figures 1 and 2 show the comparison of the asset condition for pavement and bridge respectively. For pavement in Fresno County, the existing status of good and poor conditions are 8% and 16.6% respectively. With no spending at all in the next 10 years, the pavement will deteriorate very badly with good condition reaching the rock-bottom of 0.6% while poor condition peaking at 25.7%. Since the 10-year target is more aggressive than that of 10-year investment scenario, more funding and

resources are needed to meet the targets. For bridges in Fresno County, the existing status of good and poor conditions are 52.3% and 1.6% respectively. With no spending at all in the next 10 years, the bridge will deteriorate to good condition of 26.2% while poor condition peaking at 4.8%. The 10-year target for good condition bridge is higher than that from the investment scenario. Hence, more funding and resources may need to be dedicated to converting some of the fair condition bridges to good condition.

Figure 1: Funding scenarios and asset condition for Pavement

Figure 2: Funding scenarios and asset condition for Bridge

Table 6 and 7 show the 10-year needs assessment for pavement and bridge respectively. For pavement, while approximately \$55 million is available for the investment, there is a funding gap of \$109 million to meet the total cost needs of \$164 million. The cost gap is about two times the invested amount, which is a big difference. Similarly, while approximately \$11 million dollars is invested in the bridge in the next 10 years, there is still a funding gap of \$10 million to reach the total investment needs of \$26 million.

Table 6: 10 years Need Assessment for Pavement

10Y Needs Assessment			
Total Cost of Work			
Treatment	Invested	Cost Gap	Total
Fix Fair to Good	\$ 8,140,084	\$ -	\$ 8,140,084

The following section describes the funding sources and programs that have been used to fund PM 2 related projects in the Fresno COG region.

Local Funds

Cities and counties spend billions of dollars each year maintaining local roads and bridges. Funding for these efforts is derived from a myriad of sources. In a survey of California jurisdictions, for local funds alone, there are more than a hundred different sources of taxes and fees reported that are used on pavement improvement projects.^{iv} Some examples of local funding sources include:

- Local sales taxes
- Development impact fees
- General funds
- Various assessment districts – lighting, maintenance, flood control, special assessments, community facility districts
- Traffic impact fees
- Traffic safety/circulation fees
- Utilities (e.g., stormwater, water, wastewater enterprise funds)
- Transportation mitigation fees
- Parking and various permit fees
- Flood control districts
- Enterprise funds (solid waste and water)
- Investment earnings
- Parcel/property taxes
- Indian reservation roads
- Indian gaming funds
- Vehicle registration fees
- Vehicle code fines
- Underground impact fees
- Transient occupancy taxes
- Capital Improvement Program (CIP) reserves/capital funds

Local Funds are typically used for non-regionally significant road maintenance, safety, and bridge projects. Even so, some of the PM 2 projects in the FTIP are funded through Local Funds.

State Funds

HUTA

The Highway Users Tax Account (HUTA), more commonly known as the state gas tax, is still the single largest funding source for cities and counties.

SB 1

California doubled down on PM 2 when it approved Senate Bill 1 on April 28, 2017. SB 1 increased several taxes and fees to raise more than \$5 billion annually in new transportation revenues. Moreover, SB 1 provides for inflationary adjustments, so that purchasing power does not diminish as it has in the past. SB 1 prioritizes funding towards maintenance, rehabilitation, and safety improvements on state highways, local streets and roads, and bridges and to improve the state's trade corridors, transit, and active transportation facilities.

Many SB 1 funds are not captured in the FTIP because this document focuses on federally funded and regionally significant projects, while SB 1 is a non-federal fund source that tends to pay for non-regionally significant road maintenance, safety, and bridge projects. Even so, some of the PM 2 projects in the FTIP are funded through SB 1.

Federal Funds

HBP

The Highway Bridge Program (HBP) provides federal aid to local agencies to replace and rehabilitate deficient, locally owned, public highway bridges. The HBP is intended to remove structural deficiencies, the Bipartisan Infrastructure Law (BIL) revises the terminology to "classified in poor condition," from existing local highway bridges to keep the traveling public safe.^v The HBP provides about \$288 million annually for bridge projects. Off-system bridges are usually funded at 100% HBP, while on system bridges are funded at 88.53% HBP. An exception to the federal participating rate is "high-cost" bridges, in which sponsors enter into agreements with Caltrans Local Assistance and agree on a federal participating rate which may not equal 100% or 88.53%.

BFP

Bridge Formula Program (BFP) is a new program established under the Bipartisan Infrastructure Law (BIL) to provide funding to replace, rehabilitate, preserve, protect, and construct bridges. It is a complement to the discretionary Bridge Investment Program (see below). The Bridge Formula Program under BIL provides 4.25 billion to the State of California, of which States are required to reserve 15 percent of their formula funds under this program for use on off-system bridges. For funds used on locally owned off-system bridges, the Federal share is 100%.

SHOPP

The SHOPP was described in the section above under PM 1. Two of the eight categories of the SHOPP that address PM 2 are Bridge Preservation and Roadway Preservation.

Although the SHOPP is a program, it is often thought of as a fund source as well. The FTIP lists the fund source for most SHOPP projects as “SHOPP Advance Construction.” Caltrans blends funds from HUTA, SB 1, and federal highway funds into SHOPP, and the “SHOPP Advance Construction” designation serves as a placeholder for what may be federal or state funds.

SHOPP Roadway Preservation

The SHOPP Roadway Preservation category includes the following programs:

- 201.120 – Roadway Rehabilitation
- 201.121 – Pavement Preservation
- 201.122 – Pavement Rehabilitation
- 201.150 – Roadway Protective Betterments
- 201.151 – Drainage System Restoration
- 201.170 – Signs and Lighting Rehabilitation

The 2024 SHOPP has 281 Roadway Preservation projects totaling \$9,030,559,000 which includes future need/contingency dollars. The SHOPP does not have a reservation for Roadway Preservation.

SHOPP Bridge Preservation

The SHOPP Bridge Preservation category includes the following programs:

- 201.110 – Bridge Rehabilitation and Replacement
- 201.111 – Bridge Scour Mitigation
- 201.113 – Bridge Seismic Restoration
- 201.119 – Capital Bridge Preventative Maintenance Program
- 201.322 – Transportation Permit Requirements for Bridges

The 2024 SHOPP has 82 Bridge Preservation projects totaling \$2,362,120,000 which includes future need/contingency dollars. The SHOPP does not have a reservation for Bridge Preservation.

Table 8 below shows the summary of the NHS Pavement and Bridge Condition Programs & Projects in the 2025 FTIP. 65 out of total 206 projects are PM2 which are related to the pavement and bridges. Although the percentage of PM2 projects is about 32%, the total project cost share and the funding share are both 20%. 141 projects are not related to pavement and bridges at all. Also, the PM2 targets in 2025 FTIP are comparatively less aggressive than that in 2023 FTIP.

Table 8 - NHS Pavement and Bridge Condition Programs & Projects in the 2025 FTIP

Category	Number of Projects	% of Projects	Total Project Cost	% of Total Project Cost	Funding in the 4-Year Element	% of Funding in the 4-Year Element
Pavement Condition Projects	56	27.2%	\$303,258,000	17.6%	\$264,058,000	18.7%
Bridge Condition Projects	9	4.4%	\$40,227,000	2.4%	\$15,677,000	1.1%
Total Pavement and Bridge Condition Projects	65	31.6%	\$343,485,000	20.0%	\$279,735,000	19.8%
Non-Pavement and Bridge Condition Projects	141	68.4%	\$1,377,727,000	80.0%	\$1,133,303,000	80.2%
Total FTIP Investments	206	100.0%	\$1,721,212,000	100.0%	\$1,413,038,000	100.0%

Pavement and Bridge Condition Project Highlights

Key projects in the Fresno COG region that further progress towards achieving performance target goals include several Fresno County projects that replace and/or repair pavement and bridges, deemed structurally deficient. These projects include:

- In the City of Clovis, on Barstow Avenue, Villa to Minnewawa;, the city of Clovis is doing road rehabilitation including grinding, paving, concrete, installing traffic devices, and restriping (LSTMP898) - \$0.6 Million
- In the City of Parlier, on Zediker Ave from South Ave to Fresno St, the city is doing a chip seal, sidewalk, curb and gutter, striping, lighting, and street trees for shade (LSTMP912) - \$1.02 Million
- In Fresno County, on North Fork Road, BRIDGE NO. 42C0001, OVER SAN JOAQUIN RIVER, 0.1 MI W/O FRIANT RD, Fresno County will replace 2 lane bridge with 2 lane bridge (LSTMP443) – 9.8 Million
- In Fresno County, BRIDGE NO. 42C0175, E MANNING AVE, OVER TRAVERS CREEKS, 0.6 MI W ALTA AVE. Replace deficient 2 lane bridge with new 4 lane bridge that will be striped for 2 lanes only. (FRE150019) - \$4.6 Million

NHS Performance, Interstate System Freight Movement, and CMAQ Program Performance (PM 3)

Fresno COG has consistently prioritized system reliability and mobility within the region's transportation system. A properly functioning, well-maintained streets and highway system is critical for public safety and mobility, emergency responders, law enforcement, the trucking industry and those dependent on farm-to-market commerce. Economic development experts tell us that regional mobility and access are key requirements of business and industry for job creation and retention. Fresno County being a farming prominent area with a significant truck traffic, needs a very good freight infrastructure to meet the farming needs and maintain the economy. A side benefit is that it has an overall positive effect on property values in an area, effectively raising the value of our homes and businesses. For these reasons, Fresno COG recognizes the need to preserve our local streets and roads to maintain our regional mobility.

The second round of PM3 (1/1/2022 – 12/31/2025) was set in May 2023. Caltrans established the 2-year and 4-year statewide targets on December 16, 2022, after the coordination between Caltrans and MPOs that consisted of two virtual workshops. Caltrans then gave MPOs 180 days to either adopt the statewide targets by contributing towards the accomplishment of it or set its own regional targets.

Table 9 shows the statewide four years targets adopted by Fresno COG. Target for the Interstate System mileage share with reliable person-mile travel times is set 1% higher than its baseline 2022 data. Similarly, the non-interstate NHS mileage share with reliable person-mile travel time is again set 1% higher than baseline data. The Truck Travel Time Reliability Index measures the ratio of peak travel periods to normal travel periods for the truck. The target is equal to that of baseline. All these reliability measures are computed from [NPMRDS](#) Analytics Tool. Among the CMAQ measures, two performance measures that are applied to Fresno County region this round are peak hour excessive delays per capita and non-single occupancy travel which are 6.44 hours and 28.9% respectively. Comparing the overall targets of the second round to those from first round, except the emissions reduction by criteria pollutants, targets are set higher since the performance measures have improved. The baseline 2022 shows significant jump in the performance compared to 2017 used in last round. However, the emissions from criteria pollutants have significantly increased this round.

As such, Fresno COG has a 38-year history of local investment in transportation infrastructure via Measure C, the local ½-cent sales tax for transportation. This progress in local investment continues in the 2025 FTIP and by leveraging local and state funds to build many of the major streets, highways, and freeways that maintain and enhance system reliability and mobility in Fresno County. However, with a sunset of current cycle of Measure C in 2026, investment from this source beyond 2026 will be decided by the voters in near future.

Table 9: PM3 Targets for Reliability, Mobility, and CMAQ Performance

PM 3 - NHS Performance, Interstate System Freight Movement, and CMAQ Program Performance	
Performance Measure	Target
NHS Performance	
Percent of Interstate System mileage reporting reliable person-mile travel times	74.80% (+1%)
Percent of non-Interstate NHS mileage reporting reliable person-mile travel times	84.70% (+1%)
Interstate Freight Movement	
Percent of Interstate system mileage reporting reliable truck travel times (Truck Travel Time Reliability Index)	1.6 (0.00)
CMAQ Program Performance	
Annual hours of peak-hour excessive delay per capita	6.44 Hours
Total emissions reduction by criteria pollutant (PM10, PM2.5, Ozone, CO)	
PM10 (kg/day)	4,305
PM2.5 (kg/day)	3,659
Nox (kg/day)	8,635
VOC (kg/day)	5,724
CO (kg/day)	25,596
Percent of non-single occupancy vehicle (SOV) travel	28.90% (+2%)

The Congestion Mitigation and Air Quality Improvement (CMAQ) program funds transportation projects or programs that contribute to attainment or maintenance of the national ambient air quality standards (NAAQS), including those that reduce ozone precursor emissions (including nitrogen oxides (NOx), volatile organic compounds (VOC), carbon monoxide (CO), and particulate matter (PM) emissions or PM precursor (e.g. NOx) emissions from transportation. The CMAQ program enables communities to build public awareness about the link between transportation and air quality, fund technological applications to improve transportation systems, or increase transit services, as a few examples. Most of the CMAQ project categories include a wide variety of measures to decrease vehicle emissions. Projects that add

new capacity for single occupancy vehicles (SOVs) are ineligible for CMAQ funding unless construction is limited to high-occupancy vehicle (HOV) lanes. Policy considerations **exclude** highway maintenance and reconstruction projects because these activities preserve existing levels of service and are unlikely to contribute to further improvements in air quality. Projects nominated for CMAQ funding **must** show positive air pollution emission reductions.

The following are funding sources and programs that help fund Non-Interstate and Interstate improvement projects:

SHOPP Mobility

The SHOPP Mobility category includes following three programs:

201.310 – Operational Improvements

201.315 – Transportation Management Systems

201.321 – Weigh Stations & Weigh-In-Motion Facilities

201.310 – Operational Improvements

The primary purpose of this program element is to improve traffic flow on existing State highways by reducing congestion and operational deficiencies at spot locations. Operational improvement projects do not expand the design capacity of the system.

Examples of Operational Improvements projects include, but are not limited to:

- Interchange modifications (not to accommodate traffic volumes significantly larger than what the existing facilities were designed for)
- Ramp modifications (acceleration - deceleration/weaving)
- Auxiliary lanes for merging or weaving between adjacent interchanges
- Curve corrections/improve alignment
- Signals and/or intersection improvements
- Two-way left-turn lanes
- Channelization
- Turnouts
- Shoulder widening

201.315 – Transportation Management Systems

The primary purpose of this program element is to improve traffic flow on existing State highways by addressing system-wide congestion through system management techniques. Transportation Management Systems facilitate the real time management of the State highway system by providing accident and incident detection, verification, response, and clearance. These systems provide State highway system status information to travelers.

Examples of Transportation Management System projects include, but are not limited to:

- Traffic sensors

- Changeable message signs
- Close circuit television cameras
- Ramp meters
- Communications systems
- Highway advisory radio
- Traffic signal interconnect projects
- Traffic management systems housed in Transportation Management Centers (TMCs), including the necessary software and hardware (excluding facilities)
- TMC interconnect projects

201.321 – Weigh Stations & Weigh-in-Motion Facilities

The primary purpose of this SHOPP Mobility program element is to provide for Commercial Vehicle Enforcement Facilities (commonly called Weigh Stations) and Weigh-in-Motion (WIM) systems. The Weigh Stations are needed to support the Commercial Vehicle Enforcement Plan; Truck safety, size and weight regulations are enforced by the California Highway Patrol reducing truck related accidents or incidents and protection our highways from premature damage. The WIM sites provide data for federally required data systems and special studies, design and maintenance strategies, size and weight policies, enforcement and planning strategies, and the traffic and truck volumes publications.

The 2024 SHOPP features 43 Mobility projects programmed totaling \$862,000,000 which includes future need/contingency dollars. The SHOPP does not have a reservation for Mobility.

SB 1 Trade Corridor Enhancement Program (Including National Highway Freight Program)

The purpose of the Senate Bill 1 (SB 1) Trade Corridor Enhancement Program (TCEP) is to provide funding for infrastructure improvements on federally designated Trade Corridors of National and Regional Significance, on California's portion of the National Highway Freight Network as identified in California Freight Mobility Plan, and along other corridors that experience high volumes of freight movement. The Trade Corridor Enhancement Program also supports the goals of the National Highway Freight Program, the California Freight Mobility Plan, and the guiding principles in the California Sustainable Freight Action Plan.

This statewide, competitive program will provide approximately \$300 million per year in state funding and approximately \$515 million in National Highway Freight Program funds if the federal program continues under the next federal transportation act.

Eligible applicants apply for program funds through the nomination of projects. All projects nominated must be identified in a currently adopted regional transportation plan (RTP). The Commission is required to evaluate and select submitted applications based on the following criteria:

- Freight System Factors – Throughput, Velocity, and Reliability
- Transportation System Factors – Safety, Congestion Reduction/Mitigation, Key Transportation Bottleneck Relief, Multi-Modal Strategy, Interregional Benefits, and Advanced Technology

- Community Impact Factors – Air Quality Impact, Community Impact Mitigation, and Economic/Jobs Growth
- The overall need, benefits, and cost of the project
- Project Readiness – ability to complete the project in a timely manner
- Demonstration of the required 30% matching funds
- The leveraging and coordination of funds from multiple sources
- Jointly nominated and/or jointly funded

Truck Travel Discussion

Truck travel mobility, and the goods movement that it provides, is essential to the economic vitality in the central San Joaquin valley. The majority of the freight movement in the Central Valley is provided by trucks. For Fresno County, the majority of the rural roads serve as farm roads. Therefore, a reliable and efficient good movement systems is necessary to support economic vitality in Fresno County and the greater San Joaquin Valley. As such, transportation projects that support efficient truck travel, such as shoulder improvements, auxiliary lanes, traffic flow improvement, dedicated truck lanes and routes, and intelligent transportation systems (such as signal synchronization of the urban areas) are important to keep the reliable freight movement going. While some of these projects had been included in the 2023 FTIP to support our freight mobility, none of these kinds of projects were programmed in 2025 FTIP. However, this is consistent with the new targets as the 2 years and 4 years reliable truck travel time targets are same as the baseline 2022 data. Nevertheless, Fresno COG continually looks for ways to prioritize investment improvements and strategies to increase the efficiency and reliability of the region's goods movement system.

CMAQ

The Congestion Mitigation and Air Quality (CMAQ) program supports improving air quality and relieving roadway congestion. The purpose of the CMAQ program is to fund transportation projects or programs that will contribute to attainment or maintenance of the National Ambient Air Quality Standards (NAAQS) for ozone, carbon monoxide (CO), and particulate matter (both PM10 and PM2.5).

Table 10 below shows the summary of the NHS Performance, Interstate System Freight Movement, and CMAQ Program Performance Projects in the 2025 FTIP. Out of 206 FTIP projects, 91 of them are related to PM3. While the total project cost for those PM3 projects is approximately \$257 million, the funding available in the 4 year element is only \$212 million. Hence, there is a deficit of about \$45 million. One important thing to note in this table is that while approximately 45% of the total projects are PM3, they only take 15% of the total project cost as well as the total funding. Although the number of PM3 projects are lesser than safety projects, the PM3 attributes get some boost from the safety projects in terms of travel time reliability and emissions.

Table 10: NHS Performance, Interstate System Freight Movement, and CMAQ Program Performance Projects in the 2025 FTIP

Category	Number of Projects	% of Projects	Total Project Cost	% of Total Project Cost	Funding in the 4-Year Element	% of Funding in the 4-Year Element
Interstate Reliability Projects	2	1.0%	\$129,227,000	7.5%	\$129,227,000	9.1%
Non-Interstate Reliability Projects	17	8.3%	\$ 34,128,000	2.0%	\$27,996,000	2.0%
Truck Travel Time Projects	0	0.0%	\$0	0.0%	\$0	0.0%
CMAQ Projects	72	35.0%	\$93,354,000	5.4%	\$55,239,000	3.9%
Total PM 3 Projects	91	44.2%	\$256,709,000	14.9%	\$212,462,000	15.0%
Non-PM 3 Projects	115	55.8%	\$1,464,503,000	85.1%	\$1,200,576,000	85.0%
Total FTIP Investments	206	100.0%	\$1,721,212,000	100.0%	\$1,413,038,000	100.0%

PM 3 Project Highlights

Key projects in the Fresno COG region that further the progress towards achieving PM 3 performance target goals include several Intelligent Transportation System (ITS) projects that advance transportation safety and mobility by integrating advanced communications technologies into transportation infrastructure. Two out of four projects below are adaptive traffic signals projects on a long segment, thereby improving the traffic movement and travel time reliability along with reducing the emission from transportation. However, both are non-interstate (on local roads) projects within the boundary of Clovis and Fresno. The roundabout project in the city of Kingsburg will help to improve the transportation emissions by improving the traffic flow and truck travel around that area. The last project on this list is the interstate I-5 at the southern end of Fresno County that will rehabilitate pavement and drainage systems, construct rumble strips, upgrade guardrail, signs, lighting, and Traffic Management System (TMS) elements. All of these improvements on the major interstate will improve the reliable person-mile and truck travel times.

- City of Clovis - Shaw Ave Adaptive ITS Project - install adaptive ITS system and related signal improvements - Cole to DeWolf, (LSTMP797) - \$0.6 Million
- City of Fresno - Clovis Ave Adaptive ITS Project - Clovis Ave from Shields Ave to American Ave; install adaptive ITS system, upgrade detection, synchronize corridor, (LSTMP796) - \$2.7 Million
- City of Kingsburg - Gilroy/Mariposa/18th Roundabout, Construct a 5-leg single-lane roundabout. (LSTMP927)- \$1.6 Million

- Caltrans - Rehabilitation Gale Undercrossing to Tuolumne Avenue Overcrossing - Near Kettleman City, from 0.8 mile north of Gale Undercrossing to Tuolumne Avenue Overcrossing. Rehabilitate pavement and drainage systems, construct rumble strips, upgrade guardrail, signs, lighting, and Traffic Management System (TMS) elements. (FRE250006) - \$57.7 Million

Transit Asset Management (TAM)

The TAM targets for Fresno County were developed collaboratively with regional transit agencies based on the agency's TAM plans and local targets. In developing the targets, Fresno COG reviewed and considered the transit operators' TAM plans (including identified goals, objectives, measures, and targets), thereby incorporating them into the metropolitan planning process.

Transit Asset Management Performance

The FTIP includes funding from multiple FTA sources for projects that support Transit Asset Management. Examples of these projects include rural and urban capital assistance programs; rolling stock acquisition, maintenance, and overhauls; bus fleet rehabilitation and replacement; track and rail yard maintenance and improvements; and maintenance of passenger facilities. Table 11 provides a summary of the performance measures designated as TAM.

Table 11: Performance measures designated for Transit Asset Management (TAM)

Transit Asset Management Performance Measures		
Asset Category	Performance Measurement	Asset Class Examples
Rolling Stock - (revenue service vehicles) (Age)	Percentage of revenue vehicles within a particular asset class that have met or exceeded useful life benchmark (ULB).	40-foot bus, 60-foot bus, vans, automobiles, locomotives, rail vehicles
Equipment – (non-revenue) service vehicles (Age)	Percentage of vehicles that have met or exceeded their ULB.	Cranes, prime movers, vehicle lifts, tow trucks, vans, automobiles
Infrastructure-rail fixed-guideway track, signals, and systems (Condition)	Percentage of track segments, signal, and systems with performance restrictions.	Signal or relay house, interlockings, catenary, mechanical, electrical and IT systems
Stations/Facilities (Condition)	Percentage of facilities within an asset class, rated below 3 on the Transit Economic Requirements Model scale.	Stations, depots, administration, parking garages, terminals, shelters

MPOs are required to establish annual TAM targets specific to the MPO planning area for the same performance measures for all public transit providers in the MPO planning area within 180 days after the transit providers establish their targets. Fresno Area Express (FAX) and the Fresno County Rural Transit Agency (FCRTA) have adopted Transit Asset Management plans, which are available from transit operators. Out of three transit operators in the region, Clovis Transit is exempt from setting the TAM target/plan as it does not receive federal dollars. Fresno COG developed the 2023/24 regional TAM targets by weighing the targets set by the local transit providers, Fresno Area Express (FAX) and Fresno County Rural Transit Agency (FCRTA). The infrastructure performance measure does not apply to the Fresno region since there is no rail transit in Fresno County. Each transit agency is encouraged to apply for funding through the various competitive funding programs and has been successful in acquiring a portion of these funds to help meet TAM targets.

This section presents the TAM performance measures and targets adopted by FAX and FCRTA in the Fresno COG or Fresno County region. Targets are the threshold for the maximum percentage of assets at or exceeding acceptable standards. In most cases for the target-setting process, providers set targets that were approximately equivalent to their current performance. Table 12 below shows the TAM targets for the individual transit agencies as well as the average regional targets for the Fresno COG region. The TAM targets were produced collaboratively with transit agencies based on their agency TAM plans and local targets. While FAX set a flexible target for Rolling Stock and Equipment, the targets under Facilities are aggressive compared to the last round. FCRTA's targets did not change except for the Cutaway Bus category as the number of vehicles exceeding useful life benchmark (ULB) increased compared to the last round. In developing the regional targets, Fresno COG reviewed and considered the various local and regional transit operators' TAM plans (including identified goals, objectives, measures, and targets), thereby incorporating them into the metropolitan planning process. Fresno COG took the weighted mean of the targets against the inventories of FAX and FCRTA to come up with the regional targets.

Table 12: Transit Asset Management Targets

Transit Asset Management (TAM) Targets								
Reporting Entity	Rolling Stock			Equipment	Facilities			Infrastructure
	(Pct of revenue vehicles > ULB)			(Pct of non-revenue vehicles > ULB)	(Pct of facilities < TERM scale 3)			
	Automobile	Bus	Cutaway Bus		Administration	Maintenance	Parking Facilities	(Pct of track segments with restrictions)
FAX - Fresno Area Express	0%	30%	30%	30%	0%	0%	0%	N/A
FCRTA - Fresno County Rural Transit Authority	0%	0%	35%	0%	N/A	N/A	N/A	N/A
Regional Target based on Weighted Average	0%	26%	33%	29%	0%	0%	0%	N/A

The two public transportation reporting entities provided their targets to Fresno COG as shown above. The Fresno COG regional targets are presented in tabular form to account for the differences in targets and standards among the providers of public transportation. Targets represent the thresholds for the maximum percentage of assets at or exceeding acceptable standards. Both transit providers set targets that were close to their current performance.

The FAX data is based upon FAX's specific operational requirements, hence these ULBs differ from the FTA provided default values. As the ULBs have been adjusted downward for rolling stock buses, FAX will be aggressively pursuing zero emission grant opportunities to address their aging fleet and work towards a state of good repair. This is a challenge considering the increased cost of the zero emission buses. Their goal is to leverage the agency-specific Zero Emission Vehicle Transition Plan and the battery-electric bus infrastructure, entering final acceptance, to increase application appeal and competitiveness.

FAX has been successful in acquiring new revenue vehicles to replace its aging fleet. FY23 saw the delivery of 7 battery electric buses and in FY24, FAX is projected to be receiving an order of 12 CNG buses and 2 hydrogen fuel cell buses. Additionally, in FY24, FAX is slated to receive 14 cutaway vehicles for its paratransit fleet. The addition of these vehicles should significantly better the state of good repair and position FAX to meet the California 2040 transition mandate to zero emission vehicles. FAX anticipates increased efficiencies with the relaxing of pandemic protocols, as city employees have returned to the office full time and are resuming normal duties. This is in addition to an added FAX fleet specialist, who has been hired to accelerate the purchasing and onboarding of new vehicles. Through these changes in circumstances, FAX is working towards a better position for more robust performance targets during the next reporting period.

TAM category projects may also be supported by state, local, and other federal funding sources (e.g., FTA Section 5337 State of Good Repair, FTA 5307, FTA 5339 formula funds, and FHWA flexible funds such as CMAQ and STBG). The funding and the program of projects in the FTIP will enable FAX and FCRTA to achieve their respective transit asset management performance targets. Table 13 below shows the summary of the transit asset management projects in the 2025 FTIP. Please note that some projects identified for TAM may also benefit PTASP target and hence the totals may exceed.

Table 13 - Transit Asset Management Projects in the 2025 FTIP

Category	Number of Projects	% of Projects	Total Project Cost	% of Total Project Cost	Funding in the 4-Year Element	% of Funding in the 4-Year Element
Transit Asset Projects	21	10.2%	\$46,564,000	2.7%	\$27,998,000	2.0%
Non-Transit Asset Projects	185	89.8%	\$1,674,648,000	97.3%	\$1,385,040,000	98.0%
Total FTIP Investments	206	100.0%	\$1,721,212,000	100.0%	\$1,413,038,000	100.0%

The TAM Final Rule also requires that, in the future, the FTIP describe the anticipated effect toward achieving the TAM targets set in the RTP, linking investment priorities to those targets (23 CFR 450.326(d)). Each transit agency is encouraged to apply for funding through our various competitive funding programs, and have been successful in acquiring a portion of these funds to help meet TAM targets. Fresno COG meets with each transit agency biannually to discuss and identify other funding sources and transit projects for inclusion on the FTIP that also help to meet TAM targets. Fresno COG will continue to work with the region's transit operators to seek ways to improve the methodology, data collection, and analysis for future RTP updates, and to continue engaging in a regional discussion about transit state of good repair and the need for additional funding.

There are 21 projects in the 2025 FTIP with \$23.9 Million in FTA funds, \$30 Million in local funds, and \$12.6 Million in CMAQ funds that support the maintenance or replacement of transit assets.

Transit Asset Management Project Highlights

The FTIP includes funding from multiple FTA sources for projects that support TAM and maintaining a state of good repair. Examples of these projects include rural and urban capital assistance programs, rolling stock acquisition, maintenance, and overhauls, bus fleet rehabilitation and replacement, track and rail yard maintenance and improvements and maintenance of passenger facilities. For the Fresno Council of Governments region, key project that address TAM is the construction of a new state-of-the-art bus maintenance and operations facility for FCRTA on 7.5 acres of raw land in Selma, CA at 1821 Pacific St by FCRTA (FRE190017). The project will be enhancing FCRTA's maintenance capabilities and transition to a zero-emission fleet. The new facility in Selma will include a maintenance shop to service the agency's vehicle fleet, an office and training facility for technician training in advanced transit vehicle technology, and bus wash services. The construction is expected to be completed by the end of the calendar year 2024.

Public Transportation Agency Safety Plans (PTASP)

The National Public Transportation Safety Plan identifies four performance measures that must be included: fatalities, injuries, safety events, and system reliability. Definitions for transit safety performance measures are as described in the NTD Safety and Security Manual. Transit providers may choose to establish additional targets for safety performance monitoring and measurement. Transit safety targets must be set every four years and be included in the MPO Regional Transportation Plan (RTP). The goals, objectives, performance measures, and targets from the transit providers' safety plans must also be integrated into the RTP, either directly or by reference.

There are three transit agencies in Fresno County (Fresno COG region), Fresno Area Express (FAX), Clovis Transit, and Fresno County Rural Transit Agency (FCRTA). However, FAX is the sole agency in the region required by FTA to develop the PTASP and set the annual transit safety targets. Clovis Transit and FCRTA are exempt from the PTASP requirements as they do not receive the FTA's Urbanized Area Formula Grants. Hence, the regional annual transit safety targets would be the same as that of FAX. Fresno COG and FAX communicate with each other whenever the PTASP is updated so that the COG can incorporate

the changes in its regional plans and targets. FAX updated the targets for FY24 last year, and is already working on the next update to be approved by the city council later this year.

Table 14 documents existing performance targets set by FAX in the Fresno COG region. FAX's targets for FY24 represent a 10% reduction of FY23 actuals. While FY24 refers to July 2023- June 2024, FY23 is July 2022 - June 2023. FY24 VRM (Vehicle Revenue Miles) are estimated at 5,316,937, an approximate 10% increase in FY23's VRM. Regarding the mode of service, Fresno County has only bus service as public transit. Although few agencies have been providing Paratransit and limited carpool/vanpool services in the region, the safety targets have not been set for those categories.

The target setting approach for PTASP is different than the FHWA performance measures which are generally developed by the State DOT and shared with the MPOs (top down), while the transit performance targets are developed by the transit agencies and MPOs, and sent to the state DOT (bottom-up).

Table 14: Public Transportation Agency Safety Plan (PTASP) Targets

Mode of Service	Fatalities	Fatalities (per 10 million VRM)	Injuries	Injuries (per 10 million VRM)	Safety Events	Safety Events (per 10 million VRM)	System Reliability
Rail Transit	N/A	N/A	N/A	N/A	N/A	N/A	N/A
Bus Transit	0	0	41	77.1	46	86.5	6,421.4
ADA/ Para transit	N/A	N/A	N/A	N/A	N/A	N/A	N/A
Vans/Autos	N/A	N/A	N/A	N/A	N/A	N/A	N/A

There are 22 projects in the FY 2025 FTIP with \$36.6 Million in §5307 and CMAQ funding that specify the maintenance or replacement of transit assets. Although there are only 15 transit safety projects, some projects identified for TAM may also benefit Transit Safety.

Table 15: Summary of Transit Safety Projects in the 2025 FTIP

Category	Number of Projects	% of Projects	Total Project Cost	% of Total Project Cost	Funding in the 4-Year Element	% of Funding in the 4-Year Element
Transit Safety Projects	15	7.3%	\$79,002,000	4.6%	\$35,691,000	2.5%
Non-Transit Safety Projects	191	92.7%	\$1,642,210,000	95.4%	\$1,377,347,000	97.5%
Total FTIP Investments	206	100.0%	\$1,721,212,000	100.0%	\$1,413,038,000	100.0%

Transit Safety Project Highlights

The FTIP includes funding from multiple FTA sources for projects that support transit safety. Examples of these projects include bus replacement, bus pullouts, bulb-outs, bus stop improvements, light rail crossing improvements, train control, grade separations. For other project examples, consider reaching out to the transit sponsors in your region. For the Fresno COG region, key projects that address transit safety include:

- Fresno Area Express (FAX)- Associated Transit Improvements, (FRE021510) - \$1.26 Million. Passenger shelters/structures, benches, trash receptacles and lighting; on-street signs; bus stop repairs; and miscellaneous amenities to benefit transit passengers.
- Fresno Area Express (FAX) - ADA Bus Stop Improvements (LSTMP788) - \$1.86 Million. Improve concrete; add ramps, and miscellaneous amenities to improve access to bus stops throughout the service area.
- Fresno Area Express (FAX) - Wheelchair Securement Upgrade- Wheelchair Securement Upgrade project is aimed at enhancing the accessibility and safety of our bus fleet, by replacing the state-of-the-art Quantum securement system. (LSTMP943) - \$0.25 Million

Footnotes

ⁱ [23 CFR § 450.326 \(c, d\)](#)

ⁱⁱ The TERM scale is a measure of condition used in the National Transit Database (NTD). This is the five-point scale that agencies use to report the condition of their facility assets. An asset is deemed to be in good repair if it has a rating of 3, 4, or 5 on this scale.
