

Questions and Answers - Fresno County Transportation Systems Management and Operations (TSMO) Plan and Regional ITS Architecture Update

Issued: March 27, 2026

The following questions were received during the question period for the Fresno County Transportation Systems Management and Operations (TSMO) Plan and Regional ITS Architecture Update. Responses are provided below for clarification.

Question 1: Will the Fresno Council of Governments provide an evaluation criteria?

Response: Proposals will be evaluated based on factors including thoroughness of the proposal, comprehension of the project, responsiveness to the RFP objectives, relevant experience of the firm and team, and cost.

Question 2: Can you please confirm whether submission of a hard copy proposal is optional? The RFP indicates proposals must be submitted via email, and that a hard copy may be mailed. We want to confirm that an electronic submission alone will be considered fully responsive.

Response: Submission of an electronic copy via email will be considered fully responsive. A hard copy may be provided but is not required.
