Bruce De Terra, Chief
Caltrans, Division of Programming MS 82
Office of Federal Transportation Management Program
PO Box 942874
Sacramento, CA 94274-0001

Attention: Muhaned Aljabiry

Subject: Amendment No. 8 to the 2015 Federal Transportation Improvement Program (FTIP), Amendment No. 1 to the 2014 Regional Transportation Plan (RTP) and the 2015 Conformity Analysis for the 2008 Ozone and 2012 PM2.5 Standards

Mr. Aljabiry:

Enclosed for your review and approval is Amendment No. 8 to the 2015 FTIP, Amendment No. 1 to the 2014 RTP and the 2015 Conformity Analysis for the 2008 Ozone and 2012 PM2.5 Standards. The final adopted documents meet all applicable transportation planning requirements per 23 CFR Part 450 and 40 CFR Part 93. Associated documentation is attached as indicated below.

- Project Listings: Attachment 1 includes a summary of programming changes that result from Amendment No. 8 to the 2015 FTIP. The attachment also includes the FresnoTrak printouts for the projects with changes to the 2015 FTIP via Amendment No. 8. Amendment No. 8 is necessary to make funding, open to traffic date, and scope changes to regionally significant, capacity increasing projects. This amendment also adds and deletes project phases and line item projects.
- Updated Financial Plan: Attachment 2 includes the updated Financial Plan from the 2015 FTIP Amendment No. 8 to include the project list as provided in Attachment 1.
- 2014 RTP Amendment No. 1: Attachment 3 includes a summary of programming changes to the 2014 RTP with the updated corresponding project list. Draft RTP Amendment No. 1 is necessary to reflect funding, open to traffic date, and scope changes to regionally significant, capacity increasing projects. This amendment also deletes line item projects that are now programmed in the 2015 FTIP. The amendment does not change the time frame of the transportation plan.
- Conformity Requirements: Attachment 4 includes the conformity analysis to support a finding that 2015 FTIP Amendment No. 8 and 2014 RTP Amendment No. 1 meet the air quality conformity requirements for carbon monoxide, ozone, and particulate matter. In addition, the projects and/or project phases contained in the amendment do not interfere with the timely implementation of any approved TCMs.

- Public Involvement: Attachment 5 includes the Draft Public Notice, Proof of Publication and the Adoption Resolution.

Fresno COG conducted a 30-day public review and interagency consultation period that was completed on September 18, 2015 at 4:30 pm. One comment was received. The public participation process for Amendment No. 8 to the 2015 FTIP, Amendment No. 1 to the 2014 RTP and the 2015 Conformity Analysis for the 2008 Ozone and 2012 Pm2.5 Standards, is consistent with the Fresno COG Policy Board adopted Public Participation Plan.

Included with this letter are three hard copies of Amendment No. 8 to the 2015 FTIP, Amendment No. 1 to the 2014 RTP and the 2015 Conformity Analysis for the 2008 Ozone and 2012 Pm2.5 Standards. An electronic copy of the four year financial plan will be sent via email. This amendment is available online at the Fresno COG website at www.fresnocog.org. If you should have any questions or comments, please feel free to call Lindsey Chargin at (559) 233-4148, ext. 205.

Sincerely,

TONY BOREN, Executive Director
Fresno Council of Governments

RE: Draft 2015 FTIP Amendment No. 8, Draft 2014 RTP Amendment No. 1, and Draft 2015 Conformity Analysis addressing the 2008 Ozone and 2012 PM2.5 Standards for Interagency Consultation and Public Review

The Fresno Council of Governments (Fresno COG) is proposing a Draft 2015 Federal Transportation Improvement Program Amendment No. 8 (2015 FTIP Amendment No. 8) and 2014 Regional Transportation Plan Amendment No. 1 (2014 RTP Amendment No. 1) and Draft 2015 Conformity Analysis addressing the 2008 Ozone and 2012 PM2.5 Standards for the 2014 RTP/2015 FTIP. Associated documentation is attached as indicated below.

- Project Listings: Attachment 1 includes a summary of programming changes that result from Amendment No. 8 to the 2015 FTIP. The attachment also includes the FresnoTrak printouts for the projects with changes to the 2015 FTIP via Amendment No. 8. Amendment No. 8 is necessary to make funding, open to traffic date, and scope changes to regionally significant, capacity increasing projects. This amendment also adds and deletes project phases and line item projects.
- Updated Financial Plan: Attachment 2 includes the updated Financial Plan from the 2015 FTIP Amendment No. 8 to include the project list as provided in Attachment 1.
- 2014 RTP Amendment No. 1: Attachment 3 includes a summary of programming changes to the 2014 RTP with the updated corresponding project list. Draft RTP Amendment No. 1 is necessary to reflect funding, open to traffic date, and scope changes to regionally significant, capacity increasing projects. This amendment also deletes line item projects that are now programmed in the 2015 FTIP. The amendment does not change the time frame of the transportation plan.
- Conformity Requirements: Attachment 4 includes the conformity analysis to support a finding that 2015 FTIP Amendment No. 8 and 2014 RTP Amendment No. 1 meet the air quality conformity requirements for carbon monoxide, ozone, and particulate matter. In addition, the projects and/or project phases contained in the amendment do not interfere with the timely implementation of any approved TCMs.
- Public Involvement: Attachment 5 includes the Draft Public Notice, Proof of Publication and the Adoption Resolution.

The public review and comment period was open for 30 days commencing on August 18, 2015 and ending on September 18, 2015. A public hearing was held on September 1, 2015 at 5:30 p.m.; all comments were due by 4:30 p.m. on September 18, 2015. One comment was received during the comment period and one technical correction was identified by Fresno COG staff. Documentation of both items is included below.

These documents can also be viewed on the Fresno COG website at www.fresnocog.org.

The Fresno COG Policy Board will consider the adoption of the Draft 2015 FTIP Amendment No. 8, 2014 RTP Amendment No. 1, and the Draft 2015 Conformity Analysis addressing the 2008 Ozone and 2012 PM2.5 Standards on October 22, 2015 at 5:30 p.m. The meeting will be at the address noted above.

In conclusion, the Draft 2015 FTIP Amendment No. 8, 2014 RTP Amendment No. 1, and 2015 Conformity Analysis addressing the 2008 Ozone and 2012 PM2.5 Standards meet all applicable transportation planning requirements per 23 CFR Part 450, 40 CFR Part 93, and conform to the applicable SIPs. If you have any questions please contact: Mike Bitner at 559-233-4148 ext. 216 or via email at mbitner@fresnocog.org.

September 30, 2015

***Response to Comments to Amendment No. 8 to the 2015 Federal
Transportation Improvement Program (FTIP), Amendment No. 1 to the 2014 Regional
Transportation Plan (RTP) and the Corresponding Conformity Analysis***

The Fresno Council of Governments (FCOG) received 1 (one) comment on Amendment No. 8 to the 2015 FTIP, Amendment No. 1 to the 2014 RTP and the Corresponding Conformity Analysis. The public review and comment period began on August 18, 2015 and ended on September 18, 2015 at 4:30 p.m. All amendment documents were posted on the FCOG website for public review at www.fresnocog.org and a Public Hearing was held at FCOG on September 1, 2015.

Comment No. 1

Comment was verbally submitted on September 11, 2015 by Nick Paladino, representing the Fresno Cycling Club, regarding FRE111303-Willow-1/8 Mile North of Alluvial to Alluvial.

Mr. Paladino brought to the attention of Mike Bitner, Deputy Director, that he thought the open to traffic date for the City of Clovis' project FRE111303 was incorrect.

Response: The open to traffic date for FRE111303 was listed as 2015. FCOG staff verified with City of Clovis staff that the correct open to traffic date is 2016. The change will be reflected in the final amendment.

Technical Correction

In addition to the above listed comment, during the public comment period, FCOG staff identified a policy update that took place in 2010 that had not been updated into the prior FTIP text.

On page 5 of Appendix C under the Regional Bid heading the sentence that states "Regional Bid funds from a canceled project, or project savings from closed out Regional Bid projects do not vest with the project sponsor; however, these funds may be used in funding up to a 20% overrun in other Regional Bid Project costs or returned to the Regional Bid pot to be applied to the next eligible project that was not funded from the most recent Call For Projects list." was changed to "allow project savings to vest with the member agency and to be applied to eligible Federal Aid RSTP or CMAQ project of their choosing."

Response: This change was approved by the FCOG Policy Board on April 29, 2010 and will be reflected in the 2015 FTIP text as a technical correction in the final amendment.

APPENDIX C
FTIP AMENDMENT
PROCEDURES

FTIP AMENDMENT PROCEDURES

The Fresno Council of Governments as a federally designated Metropolitan Planning Organization (MPO) adopts a Federal Transportation Improvement Program (FTIP), which includes projects and sets priorities for federal transportation funding. Federal regulations require fairly strict adherence to the projects and priorities (schedules) contained within the adopted FTIP. FTIP Amendments are used to make any necessary changes to the document or to projects within the document.

Current federal regulations [Title Code 23 of Federal Regulations Part 450.332-c] provide MPOs the ability to adjust FTIP project schedules and make minor changes without the need for an Amendment. Under current circumstances, FTIP change approvals have been delegated by Caltrans to the COG Executive Director, and can be approved without formal Policy Board review. The COG Policy Board has adopted “Amendment-Director Delegation” and “Administrative Modification” procedures providing this flexibility. Also, on May 10, 2012, with the acknowledgment of the Fresno COG Policy Board, the California Department of Transportation (Caltrans) delegated to the Fresno COG Executive Director the authority to approve Administrative Modifications to the Federal Statewide Transportation Improvement Program (FSTIP)/Federal Transportation Improvement Program (FTIP). This delegated authority is in accordance with the revised FSTIP/FTIP Amendment and Administrative Modification procedures. Fresno COG’s amendment procedures are as follows;

Amendment Type 1

Administrative Modifications

Administrative modifications include minor changes to project cost, schedule, or funding sources. Administrative modifications only require approval by Fresno COG. State and Federal agencies are notified, but do not take approval action on Administrative Modifications. They are posted on Fresno COG’s website at the time of action, and are later posted on Caltrans’ website.

Amendment Type 2

Amendment – Funding Changes

Type 2 amendments primarily include project cost changes that are greater than minor changes identified under Administrative Modification procedures. Type 2 amendments require approval by Fresno COG, Caltrans, and FHWA. Publicly accessible notification of a Type 2 amendment is posted on Fresno COG’s website at least 7 days prior to action, and distributed to local agency partners through Fresno COG’s standing committees. Fresno COG will consider public comments on the amendment prior to approval action.

Amendment Type 3

Amendment – Exempt Projects

Type 3 amendments primarily include adding or deleting projects that are exempt from regional air quality emissions analyses. These amendments typically include transit or safety projects. Type 3 amendments require approval by Fresno COG, Caltrans, and FHWA. Public notification of a Type 3 amendment is posted on Fresno COG’s website at least 7 days prior to action, and distributed to local agency partners through Fresno COG’s standing committees. Fresno COG will consider public comments on the amendment prior to approval action.

Amendment Type 4

Amendment – Conformity Determination that Relies on a Previous Regional Emissions Analysis

Type 4 amendments primarily include adding or deleting projects that have already been appropriately modeled for air quality purposes as part of the RTP. In this case, the federal approving

agencies can use a previous analysis of the project's impact on air quality for approval purposes. Type 4 amendments may be accompanied by an RTP amendment to maintain consistency. The FTIP amendment and RTP Amendment (if applicable) follow the same public process. Type 4 amendments require approval by Fresno COG, Caltrans, and FHWA. Public notification of a Type 4 formal amendment includes the following:

- Legally noticed 30-day public comment period
- Legally noticed public meeting
- Posting of amendment information on Fresno COG's website during public comment period
- Publishing amendment information as part of the following publicly available Fresno COG agendas: Transportation Technical Committee, Policy Advisory Committee and Fresno COG Policy Board
- Consideration and response to public comments received during comment period

Amendment Type 5

Amendment – Conformity Determination and New Regional Emissions Analysis

Type 5 amendments are the highest level amendment and primarily involve adding or deleting new projects that must be modeled for their air quality impacts, or significantly changing the design concept, scope, or schedule of an existing project. Type 5 amendments are accompanied by a new Air Quality Conformity Document that demonstrates conformity with applicable air quality requirements, and if applicable, an RTP amendment to maintain consistency. The FTIP amendment, Air Quality Conformity Document, and RTP Amendment (if applicable) follow the same public process. Type 5 amendments require approval action by Fresno COG, Caltrans, and FHWA. Public notification of a Type 5 amendment includes:

- Legally noticed 30-day public comment period
- Legally noticed public meeting
- Posting of amendment information on Fresno COG's website during public comment period
- Publishing amendment information as part of the following publicly available Fresno COG agendas: Transportation Technical Committee, Policy Advisory Committee, and Fresno COG Policy Board
- Consideration and response to public comments received during comment period

Technical Correction

A technical correction to an FTIP project by staff does not require public review or approval of any kind.

Grouped Project Listings

Federal rules allow MPOs to group or combine projects that are not considered to be of appropriate scale for individual listing. Such grouped projects are often referred to as "Lump Sum Project Listings." Fresno COG uses this ability to program grouped projects within the FTIP. Such projects may be grouped by function (e.g., bike lanes), work type (e.g., maintenance), or geographical area. Once grouped, the MPO is required to maintain, outside of the FTIP, a detailed list of the projects contained in each group. Modifications to the projects or costs within the listings are conducted on an as needed basis and do not require a formal public participation process. However, any changes to the overall grouped project cost or scope are done in accordance with the amendment types above. Grouped project listings are made available through the Fresno COG website and distributed to Caltrans and FHWA.

Fresno COG in cooperation with the Federal Highway Administration and Caltrans has entered into an agreement to regulate the number of FTIP Amendment Cycles in order to help federal and state agencies insure for a more expeditious review of Regional FTIP Amendments. As part of the agreement,

Fresno COG would consider limiting the number of FTIP Amendment Cycles to one per two-month period, with exceptions as needed for safety or emergency reason. Fresno COG would be responsible for verifying that urgent requests for amendments meet the criteria for exceptions. FHWA and Caltrans, likewise, have agreed to provide expeditious review of Fresno COG FTIP Amendments. It is understood that future consideration will be made to limit the number of amendments to one per three-month period.

A major part of the FTIP is the four-year “Element”. Federal guidance requires that the FTIP be delivered in the following manner:

- All projects (as a group) shown in the first year of the Element shall have first priority.
- All projects (as a group) shown in the second year of the Element shall have second priority; and
- All projects (as a group) shown in the third year of the Element shall have third priority.
- All projects (as a group) shown in the fourth year of the Element shall have fourth priority.

The significance of this method is that the federal government expects the Fresno COG to make every effort to complete first year projects before second year projects, the second year projects before third year projects, and the third year project before the fourth year projects. In theory, failure to do so could throw the entire program into chaos with second, third, or fourth year projects being held up due to the inability of a single first year project to proceed. In practice, the federal reviewing agencies have generally been satisfied if significant progress is being made to implement all first year projects, even if one or more projects happen to slip into the next year. However, if a project is stalled or is no longer going to be implemented, Fresno COG is required to recognize this fact and adjust the FTIP.

Different restrictions apply to projects that can qualify as Transportation Control Measures (TCMs). In accordance with federal air quality regulations, Fresno COG is required to expeditiously implement all TCMs. If programmed TCM projects are unavoidably delayed, other TCMs must be advanced, least we risk jeopardizing the entire program.

FTIP “Expedited Project Selection Procedures”

The State, the Fresno Council of Governments and transit operators have implemented a project selection process for its Federal Transportation Improvement Program (FTIP) as required by Federal Regulations 23 Code of Federal Regulations (CFR) Part 450 and Title 23 United States Code (USC). Projects from the first four years of 2015 FTIP have been selected using the approved project selection procedures and as outlined on the following table. The State, Fresno Council of Governments and transit operators have selected all of the projects in the first four years of the FTIP based on the attached table for Project Selection Procedures. It has been agreed by all member agencies represented by the Fresno Council of Governments, the California Department of Transportation (Caltrans), and the transit operators per 23 CFR 450.332, that the projects within the first four years of the FTIP may be advanced or delayed within the Four-Year Element (Element) of the Federal Statewide Transportation Improvement Program (FSTIP) subject to the conditions of the Expedited Project Selection Procedures outlined below. For FTA administered funds, projects may be moved within the period of the FSTIP at the request of the agency, as long as funding is available and the change does not negatively impact the delivery or availability of funds for other projects ready for obligation.

The projects within the State Transportation Improvement Program (STIP) may be advanced subject to amendments approved by the California Transportation Commission CTC to the STIP.

The projects funded within the RSTP, CMAQ and Active Transportation programs may be moved subject to the Fresno Council of Governments Expedited Projects Selection Process (attached).

Fresno COG and Caltrans agree that the Caltrans Program Managers for the following programs may implement projects within the four year FSTIP element without amending the FTIP/FSTIP.

State Highway Operation and Protection Program (SHOPP)
 Highway Bridge Program (HBP)
 Hazard Elimination and Safety Program (HSIP)
 Safe Routes to School Program (SRTS/ SR2S)
 High Risk Rural Roads Program (HRRR)
 Section 130 - STP Railroad Program
 Highway Safety Improvement Program (HSIP)

The Fresno Council of Governments designates Executive Director Tony Boren to sign below acknowledging that advancing of projects under such agreement does not invalidate the financial constraint of its FTIP.

Tony Boren, Executive Director

June 3, 2014

Date:

Project Selection Procedures - Consultation and Cooperation Requirements

Region	Project Type	Selecting Agency	Selection Procedure	Consulted/ Cooperating Agency
TMA MPO	Projects funded with title 23 and Federal Transit Act funds-except: projects on the, NHS, HBP, IM and FLHP funded projects	MPO	Consultation	State and Transit Operator
	Projects on the Highway-Railroad Grade Separation, NHS, and projects funded under the HBP and IM programs	State	Cooperation	MPO
	Projects funded with Federal Lands Highway Program (FLHP) funds	Selected in accordance with 23 U.S.C. 204		

These changes should be accounted for through subsequent amendments or modifications to the FSTIP/FTIPs.

Fresno Council of Governments Expedited Project Selection Process

The COG Policy Board hereby establishes guidelines for programming the Surface Transportation (STP) program, the Congestion Mitigation and Air Quality (CMAQ) and the Active Transportation Program (ATP) to insure timely project delivery within federal and state funding deadlines.

It is the responsibility of the implementing agency at the time of programming to understand the requirements and procedures for authorizing a project through Caltrans Local Programs and insure the deadlines and provisions of project delivery can be met.

COG staff will actively monitor all RSTP, CMAQ and ATP projects regarding the funding authorization, implementation schedule, and obligation status in order to identify delivery issues as they arise and make determinations on project placement in the FTIP based on this policy. Appeals to this decision process must be taken through the COG committee process to the policy board.

Projects Eligible for Programming

To be eligible for programming in the FTIP a project must be included in a list of Lifeline and/or Regional Bid projects authorized by the Fresno COG Board. Fresno COG staff will endeavor to provide targets for Lifeline and Regional Bid programs based on estimated apportionments during the life of the federal-aid appropriation.

Lifeline — Lifeline targets are authorized in advance at the beginning of the federal-aid highway act appropriation cycle. Lifeline is an amount available to each member based on the members' population share and highway maintained mileage. Projects are selected by member agencies subject to federal eligibility requirements, FTIP Amendment procedures/policies, and programming capacity in the FTIP. Members may move Lifeline funding from project to project to fit their internal program requirements. Project savings from closed out lifeline projects are vested with the member and can be moved to other projects that meet Federal regulations for the type of funding involved.

Regional Bid — Regional Bid pot targets are determined by estimating the residual remaining in the federal-aid appropriation after the Lifeline amounts are calculated. Regional Bid projects are selected in cycles by a "Call for Projects" process. Supplemental cycles may be required toward the end of the federal-aid appropriation to adjust for differences in actual appropriation. The selection and scoring criteria to identify these projects has been adopted by the COG Policy Board through an extensive regional consensus process in conformance with 23 CFR 450.332. Once selected on regional merits, a Regional Bid project should be delivered. Changes in scope are allowed up to 20% of the total cost of the project if resources are available. A project sponsor may apply Lifeline to a Regional Bid project but not the reverse. Regional Bid funds from a canceled project do not vest with the sponsor. However, project savings from closed out Regional Bid projects vest with the member agency and can be applied to eligible Federal Aid RSTP or CMAQ projects of their choosing.

Programming the FTIP

Working through the COG regional consensus process, staff will program the authorized list of eligible Lifeline and Regional Bid projects in the Element of the FTIP until all available programming capacity has been consumed. The remaining projects are then programmed in the "Out Years" of the FTIP. As additional programming capacity becomes available, the "Out Year" projects provide a pool of authorized projects to move into the Element. To move Out Year projects into the Element requires a FTIP amendment including a finding of Financial Constraint on the entire FTIP.

When determining the split between projects in the Element and Out Years various factors may be considered.

- The status of the project as a Lifeline or Regional Bid project

- The priority assigned the project on the Call for Projects list.
- The phasing and deliverability schedule of the project or project phase.
- The status of previously programmed project phases.
- The status of the project as a Capital Procurement or Transit Operations (CMAQ).
- The track record of the project sponsor in delivering projects on schedule.
- The status of the project as having been previously programmed in the Element or Out Years.

Placement in the Four-Year Element

To be considered for placement in the Four-Year Element of the FTIP a project sponsor must submit an implementation schedule by year showing a logical planned obligation of the various phases (PE, ROW, CON). Failure to adhere to this schedule may result in the project being rescheduled. Criteria for this implementation schedule should include but not be limited to;

- Securing political commitments and authorization from local boards
- Securing required matching funds
- Fulfilling the requirements of Caltrans Local Programs
- Securing required permits, certifications, and waivers
- Completion of preliminary environmental and design studies
- Right of way certification
- Completion of final design
- Readiness to bid construction

Depending on the requirements of the project, the implementation schedule may be simple or quite complex. COG staff will schedule the projects in the Element based on this implementation schedule subject to the availability of programming capacity.

Projects with multiple phases (PE, ROW, CON) must have a reasonable expectation that the preliminary phases can be completed prior to programming subsequent phases in the current Element. Project Sponsors must be cognizant of Local Programs requirements affecting the phasing of their projects. For instance, a project cannot proceed to final design, right of way acquisition, or construction until a Preliminary Environmental Study (PES) identifies the environmental condition of the project area and proposes mitigation if required. Furthermore, final construction cannot begin until Caltrans issues an environmental certification (if required), the local agency has certified Right of Way (if included) and final plans and specs have been submitted to Caltrans along with a PSE checklist. It follows that any project with significant environmental mitigation requirements identified on the PES, unresolved Right of Way issues, or issues with final design cannot be obligated for the affected project phase until those issues are resolved. Project sponsors must identify those issues that can delay their project and document a reasonable expectation, schedule and commitment to complete required preliminary phases before requesting subsequent project phases be placed in the current Element Year.

Grouped projects programmed in the Element must be accompanied by a detailed list identifying the specific deliverable project phases of the Grouped Project. Grouped project sponsors must be able to demonstrate the deliverability of the individual projects and project phases.

It is understood by all COG member agencies, which includes all public transit operators within Fresno County, that while the above discussion of project placement within the financial element explains the method used for initial placement of the regions projects within the FTIP, approval of this “Expedited Project Selection” process will provide the COG Policy Board the flexibility to alter the order of projects

within the Element of the FTIP to fit the priorities and needs of the transportation program in Fresno County without “Formal” or “Administrative” to the approved FTIP.

Failure to Deliver

Projects that are programmed in the current Element year that fail to obligate on schedule represent a potential loss of Apportionment to the region unless another project advances to use the available Apportionment. For this reason if a project falls behind in schedule it may be necessary to replace it with another project that has a reasonable chance of obligating. Depending on the apparent demonstrated commitment of the project sponsor to deliver the project; the nature of the delay; and, the availability of programming capacity in the Four-Year Element the project may be rescheduled to the second, third, or fourth year of the Element or to the Out Years.

The FTIP is completely revised every four years. At the end of the first year, projects in the first year of the Element that did not obligate or move back are considered “Prior Year” projects. In order to obligate those projects in the subsequent year an administrative amendment must be processed transferring the projects back into the new current Element year. However, at the end of the fourth year when the FTIP is revised, all Prior Year projects must be reprogrammed in the Element or they become “Out Year” projects.

Loss of Funds through AB 1012 or decreased apportionment

AB 1012 is apportionment specific. The MPO has three years including the year of apportionment to obligate each apportionment (i.e. the 2014/15 apportionment expires at the end of the 2016/17 fiscal year). The estimated amount of available apportionments is calculated when setting the Lifeline and Regional Bid targets. Should actual apportionments come in significantly lower than those estimates, or should delayed project delivery cause a loss of apportionments via AB 1012, staff will re-estimate the capacity to deliver the program using remaining apportionments. If this results in removing projects from the pool of Lifeline and Regional Bid project list, staff will identify candidate projects for the COG Policy Board to consider for removal. Factors to be considered when identifying projects for removal will include the age of the project and failure to meet committed scheduling.

Project Obligation, Implementation and Close Out

Projects have seven years (state requirement) from the first obligation to proceed to completion and close out. A one time, one year extension may be requested. Projects that lapse unclosed may be subject to repayment by the local sponsoring agency of federal funds to the funding agency.

ATTACHMENT 3
2014 RTP AMENDMENT NO. 1
CHANGE SUMMARY AND PROJECT LIST

**FRESNO COUNCIL OF GOVERNMENTS
AMENDMENT NO. 1 TO THE 2014 RTP
CHANGE REPORT AS OF 9/30/15 (In \$1,000)**

LEAD AGENCY	PROJECT ID	PROJECT TITLE	PROJECT DESCRIPTION	PCT CHANGE	COST DIFFERENCE	COST BEFORE	COST REVISED	NARRATIVE	NOTES
Fresno County	FRE500399	Millerton-Friant to Table Mountain: 2 LU to 4 LD	2 LU to 4 LD	-100%	-31,950	31,950	0	Delete project Total project cost decreased from \$31,950,000 to \$0	Deleting project from RTP and programming in FTIP (FRE150057)
Fresno County	FRE500400	Millerton Road-Table Mountain Rd to Auberry Road: 2 LU to 4 LD	2 LU to 4 LD	-100%	-8,340	8,340	0	Delete project Total project cost decreased from \$8,340,000 to \$0	Deleting project from RTP and programming in FTIP (FRE150058)
Fresno, City of	FRE500065	Willow Ave-Shepherd to Copper: Widen Southbound 1 lane to 3 lane	Southbound 1 lane to 3 lanes including bike lanes	-100%	-3,000	3,000	0	Delete project Total project cost decreased from \$3,000,000 to \$0	Deleting project from RTP because it is programmed in FTIP (FRE111306)
Fresno, City of	FRE500431	Peach-Kings Canyon to Belmont: 2 LU to 4 LD	2 LU to 4 LD	-100%	-12,000	12,000	0	Delete project Total project cost decreased from \$12,000,000 to \$0	Deleting project from RTP because it is programmed in FTIP (FRE092520)
Fresno, City of	FRE500452	Willow-Nees to Powers: 2 LD to 6 LD	2 LD to 6 LD	-100%	-1,000	1,000	0	Delete project Total project cost decreased from \$1,000,000 to \$0	Deleting project from RTP because it is programmed in FTIP (FRE070609)
Fresno, City of	FRE500491	Divisadero & 41 on/off ramps	Reconfigure for SB dual rights; and EB dual lefts on Divisadero at NB on ramp	0%	0	2,500	2,500	Change Reason: - Non-capacity increasing Total project cost remains the same at \$2,500,000	Project is an operational improvement only and is not capacity increasing as it had been previously marked
Fresno, City of	FRE500561	Veterans Blvd-Shaw to Barstow: 4 LD	New 4 LD Super arterial with Class 1 bike path	0%	0	6,000	6,000	Change Reason: - Open to Traffic Date Total project cost remains the same at \$6,000,000	Changing open to traffic date from 2020 to 2022
Fresno, City of	FRE500562	Veterans Blvd-Bullard-Riverside to Herndon: 4 LD	New 4 LD Super arterial with trail, bike lanes, sidewalks	0%	0	4,500	4,500	Change Reason: - Open to Traffic Date Total project cost remains the same at \$4,500,000	Changing open to traffic date from 2020 to 2022

**FRESNO COUNCIL OF GOVERNMENTS
AMENDMENT NO. 1 TO THE 2014 RTP
CHANGE REPORT AS OF 9/30/15 (In \$1,000)**

LEAD AGENCY	PROJECT ID	PROJECT TITLE	PROJECT DESCRIPTION	PCT CHANGE	COST DIFFERENCE	COST BEFORE	COST REVISED	NARRATIVE	NOTES
Fresno, City of	FRE500591	Shaw-Garfield to Veterans Blvd: 2 LU to 4 LD	2 LU to 4 LD with bike lanes, sidewalks	0%	0	3,000	3,000	Change Reason: - Open to Traffic Date Total project cost remains the same at \$3,000,000	Changing open to traffic date from 2035 to 2030
Fresno, City of	FRE500740	Herndon-Brawley to Milburn: 2 LD to 6 LD	2 LD to 6 LD	-100%	-35,000	35,000	0	Delete project Total project cost decreased from \$35,000,000 to \$0	Deleting project from RTP because it is programmed in FTIP (FRE111345)
Fresno, City of	FRE501079	McKinley-Grantland to Polk	Widen from 2 LU to 3 LU with bike lanes, sidewalks	-100%	-3,750	3,750	0	Delete project Total project cost decreased from \$3,750,000 to \$0	Deleting duplicate RTP project (FRE500397 remains in 2014 RTP)
Caltrans	FRE500513	SR 180 W-James to Yuba: Passing Lanes	Passing Lanes	-100%	-11,782	11,782	0	Delete project Total project cost decreased from \$11,782,000 to \$0	Deleting project from RTP because it is programmed in FTIP (FRE111330)
Caltrans	FRE500767	SR 41-Tulare to O Street: Widen Auxiliary Lane/Improve Ramps	SR 41-Tulare to O Street: Widen Auxiliary Lane/Improve Ramps (Project J in the Measure C Urban Regional Program)	20%	4,406	21,590	25,996	Change Reason: - Increase funding Total project cost increased from \$21,590,000 to \$25,996,000	Funding estimate increased per 2014 Measure C Update

EXECUTIVE SUMMARY

This report presents the Conformity Analysis for Amendment #8 to the 2015 Federal Transportation Improvement Program (2015 FTIP Amendment #8) and Amendment #1 to the 2014 Regional Transportation Plan (2014 RTP Amendment #1). In addition, this 2015 Conformity Analysis addresses the 2008 Ozone and 2012 PM_{2.5} Standards. The FRESNO COUNCIL OF GOVERNMENTS is the designated Metropolitan Planning Organization (MPO) in Fresno County, California, and is responsible for regional transportation planning.

The Clean Air Act Section 176(c) (42 U.S.C. 7506(c)) and U.S. Environmental Protection Agency (EPA) transportation conformity regulations (40 CFR 93 Subpart A) require that each new RTP and TIP be demonstrated to conform to the State Implementation Plan (SIP) before the RTP and TIP are approved by the MPO or accepted by the U.S. Department of Transportation (DOT). This analysis demonstrates that the criteria specified in the transportation conformity regulations for a conformity determination are satisfied by the 2015 FTIP Amendment #8 and the 2014 RTP Amendment #1; a finding of conformity is therefore supported. The 2015 FTIP Amendment #8, the 2014 RTP Amendment #1, and corresponding conformity analysis was approved by the FRESNO COUNCIL OF GOVERNMENTS Policy Board on October 22, 2015. FHWA/FTA last issued a finding of conformity for the 2015 FTIP and 2014 RTP on December 15, 2014.

2015 FTIP Amendment #8 and 2014 RTP Amendment #1 have been financially constrained in accordance with the requirements of 40 CFR 93.108 and consistent with the U.S. DOT metropolitan planning regulations (23 CFR Part 450). A discussion of financial constraint and funding sources is included in the appropriate documents.

The applicable Federal criteria or requirements for conformity determinations, the conformity tests applied, the results of the conformity assessment, and an overview of the organization of this report are summarized below.

CONFORMITY REQUIREMENTS

The Federal transportation conformity regulations (40 Code of Federal Regulations Parts 51 and 93) specify criteria and procedures for conformity determinations for transportation plans, programs, and projects and their respective amendments. The Federal transportation conformity regulation was first promulgated in 1993 by the U.S. EPA, following the passage of amendments to the Federal Clean Air Act in 1990. The Federal transportation conformity regulation has been revised several times since its initial release to reflect both EPA rule changes and court opinions. The transportation conformity regulation is summarized in Chapter 1.

The conformity regulation applies nationwide to “all nonattainment and maintenance areas for transportation-related criteria pollutants for which the area is designated nonattainment or has a maintenance plan” (40 CFR 93.102). Currently, the San Joaquin Valley (or portions thereof) is designated as nonattainment with respect to Federal air quality standards for ozone, and

particulate matter under 2.5 microns in diameter (PM_{2.5}); and has a maintenance plan for particulate matter under 10 microns in diameter (PM₁₀), as well as a maintenance plan for carbon monoxide (CO) for the urbanized/metropolitan areas of Kern, Fresno, Stanislaus and San Joaquin Counties. Therefore, transportation plans and programs for the nonattainment areas for the Fresno County area must satisfy the requirements of the Federal transportation conformity regulation.

Under the transportation conformity regulation, the principal criteria for a determination of conformity for transportation plans and programs are:

- (1) the TIP and RTP must pass an emissions budget test using a budget that has been found to be adequate by EPA for transportation conformity purposes, or an interim emission test;
- (2) the latest planning assumptions and emission models specified for use in conformity determinations must be employed;
- (3) the TIP and RTP must provide for the timely implementation of transportation control measures (TCMs) specified in the applicable air quality implementation plans; and
- (4) interagency and public consultation.

On-going interagency consultation is conducted through the San Joaquin Valley Interagency Consultation Group to ensure Valley-wide coordination, communication and compliance with Federal and California Clean Air Act requirements. Each of the eight Valley MPOs and the San Joaquin Valley Unified Air Pollution Control District (Air District) are represented. The Federal Highway Administration (FHWA), Federal Transit Administration (FTA), the U.S. EPA, the California Air Resources Board (CARB) and Caltrans are also represented on the committee. The final determination of conformity for the TIP and RTP is the responsibility of FHWA, and FTA within the U.S. DOT.

FHWA has developed a Conformity Checklist (included in Appendix A) that contains the required items to complete a conformity determination. Appropriate references to these items are noted on the checklist.

CONFORMITY TESTS

The conformity tests specified in the Federal transportation conformity regulation are: (1) the emissions budget test, and (2) the interim emission test. For the emissions budget test, predicted emissions for the TIP/RTP must be less than or equal to the motor vehicle emissions budget specified in the approved air quality implementation plan or the emissions budget found to be adequate for transportation conformity purposes. If there is no approved air quality plan for a pollutant for which the region is in nonattainment or no emission budget has been found to be adequate for transportation conformity purposes, the interim emission test applies. Chapter 1 summarizes the applicable air quality implementation plans and conformity tests for carbon monoxide, ozone, PM₁₀, and PM_{2.5}.

RESULTS OF THE CONFORMITY ANALYSIS

A regional emissions analysis was conducted for the years 2017, 2018 (via interpolation), 2020, 2021, 2023, 2025, 2031, 2035 and 2040 for each applicable pollutant. All analyses were conducted using the latest planning assumptions and emissions models. The major conclusions of the FRESNO COUNCIL OF GOVERNMENTS Conformity Analysis are:

- For carbon monoxide, the total regional on-road vehicle-related emissions associated with implementation of the 2015 FTIP Amendment #8 and the 2014 RTP Amendment #1 for the analysis years are projected to be less than the approved emissions budget established in the *2004 Revision to the California State Implementation Plan for Carbon Monoxide*. The applicable conformity test for carbon monoxide is therefore satisfied.
- For ozone, the total regional on-road vehicle-related emissions (ROG and NO_x) associated with implementation of the 2015 FTIP Amendment #8 and the 2014 RTP Amendment #1 for all years tested are projected to be less than the approved emissions budgets specified in the *2007 Ozone Plan (as revised in 2011)*. The conformity tests for ozone are therefore satisfied.
- For PM-10, the total regional vehicle-related emissions (PM-10 and NO_x) associated with implementation of the 2015 FTIP Amendment #8 and the 2014 RTP Amendment #1 for all years tested are either (1) projected to be less than the approved emissions budgets, or (2) less than the emission budgets using the approved PM-10 and NO_x trading mechanism for transportation conformity purposes from the *2007 PM-10 Maintenance Plan*. The conformity tests for PM-10 are therefore satisfied.
- For PM_{2.5}, the total regional on-road vehicle-related emissions associated with implementation of the 2015 FTIP Amendment #8 and the 2014 RTP Amendment #1 for the analysis years are either (1) projected to be less than the approved emission budgets, or (2) less than the emission budgets using the approved PM_{2.5} and NO_x trading mechanism for transportation conformity purposes from the *2008 PM_{2.5} Plan (as revised in 2011)*. The conformity tests for PM_{2.5} for the 1997, 2006 and 2012 standards are therefore satisfied.
- The 2015 FTIP Amendment #8 and the 2014 RTP Amendment #1 will not impede and will support timely implementation of the TCMs that have been adopted as part of applicable air quality implementation plans. The current status of TCM implementation is documented in Chapter 4 of this report. Since the local SJV procedures (e.g., Air District Rule 9120 Transportation Conformity) have not been approved by EPA, consultation has been conducted in accordance with Federal requirements.

REPORT ORGANIZATION

The report is organized into six chapters. Chapter 1 provides an overview of the applicable Federal and State conformity regulations and requirements, air quality implementation plans, and conformity test requirements. Chapter 2 contains a discussion of the latest planning assumptions and transportation modeling. Chapter 3 describes the air quality modeling used to estimate emission factors and mobile source emissions. Chapter 4 contains the documentation required under the Federal transportation conformity regulation for transportation control measures. Chapter 5 provides an overview of the interagency requirements and the general approach to

compliance used by the San Joaquin Valley MPOs. The results of the conformity analysis for the TIP/RTP are provided in Chapter 6.

Appendix E includes public hearing documentation conducted on the 2015 FTIP Amendment #8, the 2014 RTP Amendment #1, and corresponding conformity analysis on October 22, 2015. Comments received on the conformity analysis and responses made as part of the public involvement process are included in Appendix F.

CHAPTER 1: FEDERAL AND STATE REGULATORY REQUIREMENTS

The criteria for determining conformity of transportation programs and plans under the Federal transportation conformity regulation (40 CFR Parts 51 and 93) and the applicable conformity tests for the San Joaquin Valley nonattainment areas are summarized in this section. The 2015 Conformity Analysis for the 2015 FTIP Amendment #8 and the 2014 RTP Amendment #1 was prepared based on these criteria and tests. Presented first is a review of the development of the applicable conformity regulation and guidance procedures, followed by summaries of conformity regulation requirements, air quality designation status, conformity test requirements, and analysis years for the Conformity Analysis.

FRESNO COUNCIL OF GOVERNMENTS is the designated Metropolitan Planning Organization (MPO) for Fresno County in the San Joaquin Valley. As a result of this designation, FRESNO COUNCIL OF GOVERNMENTS prepares the TIP, RTP, and associated conformity analyses. The TIP serves as a detailed four year (FFY 2014/15 – 2017/18) programming document for the preservation, expansion, and management of the transportation system. The 2014 RTP has a 2040 horizon that provides the long term direction for the continued implementation of the freeway/expressway plan, as well as improvements to arterial streets, transit, and travel demand management programs. The TIP and RTP include capacity enhancements to the freeway/expressway system commensurate with available funding.

A. FEDERAL AND STATE CONFORMITY REGULATIONS

CLEAN AIR ACT AMENDMENTS

Section 176(c) of the Clean Air Act (CAA, 1990) requires that Federal agencies and MPOs not approve any transportation plan, program, or project that does not conform to the approved State Implementation Plan (SIP). The 1990 amendments to the Clean Air Act expanded Section 176(c) to more explicitly define conformity to an implementation plan to mean:

“Conformity to the plan's purpose of eliminating or reducing the severity and number of violations of the national ambient air quality standards and achieving expeditious attainment of such standards; and that such activities will not (i) cause or contribute to any new violation of any standard in any area; (ii) increase the frequency or severity of any existing violation of any standard in any area; or (iii) delay timely attainment of any standard or any required interim emission reductions or other milestones in any area.”

Section 176(c) also provides conditions for the approval of transportation plans, programs, and projects, and requirements that the Environmental Protection Agency (EPA) promulgate conformity determination criteria and procedures no later than November 15, 1991.

FEDERAL RULE

The initial November 15, 1991 deadline for conformity criteria and procedures was partially completed through the issuance of supplemental interim conformity guidance issued on June 7, 1991 for carbon monoxide, ozone, and particulate matter ten microns or less in diameter (PM-10). EPA subsequently promulgated the Conformity Final Rule in the November 24, 1993 *Federal Register* (EPA, 1993). The 1993 Rule became effective on December 27, 1993. The Federal Transportation Conformity Final Rule has been amended several times from 1993 to present. These amendments have addressed a number of items related to conformity lapses, grace periods, and other related issues to streamline the conformity process.

EPA published the Transportation Conformity Rule PM2.5 and PM10 Amendments on March 24, 2010; the rule became effective on April 23, 2010 (EPA, 2010a). This PM amendments final rule amends the conformity regulation to address the 2006 PM2.5 national ambient air quality standard (NAAQS). The final PM amendments rule also addresses hot-spot analyses in PM2.5 and PM10 and carbon monoxide nonattainment and maintenance areas.

On March 23, 2015, EPA released its *Proposed Rule for Implementing National Ambient Air Quality Standards for Fine Particles*. The implementation rule proposes three options, one of which could revoke the primary 1997 annual PM2.5 standard, while maintaining the secondary 1997 annual PM2.5 standard. The proposed implementation rule has not been finalized.

On March 6, 2015, EPA published *Implementation of the 2008 National Ambient Air Quality Standards for Ozone: State Implementation Plan Requirements* final rule (effective April 6, 2015), which shifted the San Joaquin Valley 2008 Ozone Standard attainment date from December 31, 2032 to July 20, 2032. EPA's March 2015 ozone implementation rule also revoked the 1997 Ozone Standard for transportation conformity purposes.

On March 14, 2012, EPA published the Transportation Conformity Rule Restructuring Amendments, effective April 13, 2012 (EPA, 2012). The amendments restructure several sections of the rule so that they apply to any new or revised National Ambient Air Quality Standards. In addition, several clarifications to improve implementation of the rule were finalized.

MULTI-JURISDICTIONAL GUIDANCE

EPA reissued Guidance for Transportation Conformity Implementation in Multi-Jurisdictional Nonattainment and Maintenance Areas in July 2012. This guidance updates and supersedes the July 2004 "multi-jurisdictional" guidance (EPA, 2004a), but does not change the substance of the guidance on how nonattainment areas with multiple agencies should conduct conformity determinations. This guidance applies to the San Joaquin Valley since there are multiple MPOs within a single nonattainment area. The main principle of the guidance is that one regional emissions analysis is required for the entire nonattainment area. However, separate modeling and conformity documents may be developed by each MPO.

Part 3 of the guidance applies to nonattainment areas that have adequate or approved conformity budgets addressing a particular air quality standard. This Part currently applies to the San Joaquin Valley for carbon monoxide, ozone and PM-10. The guidance allows MPOs to make independent conformity determinations for their plans and TIPs as long as all of the other subareas in the nonattainment area have conforming transportation plans and TIPs in place at the time of each MPO and the Department of Transportation (DOT) conformity determination.

With respect to PM2.5, the Transportation Conformity Rule PM2.5 and PM10 Amendments published on March 24, 2010 effectively incorporates the “multi-jurisdictional” guidance directly into the rule. The Rule allows MPOs to make independent conformity determinations for their plans and TIPs as long as all of the other subareas in the nonattainment area have conforming transportation plans and TIPs in place at the time of each MPO and DOT conformity determination.

DISTRICT RULE

The San Joaquin Valley Unified Air Pollution Control District (Air District) adopted Rule 9120 Transportation Conformity on January 19, 1995 in response to requirements in Section 176(c)(4)(c) of the 1990 Clean Air Act Amendments. Rule 9120 contains the Transportation Conformity Rule promulgated November 24, 1993 verbatim. The Rule provides guidance for the development of consultation procedures and processes at the local level. As required by the Transportation Conformity Rule, Rule 9120 was submitted to EPA on January 24, 1995 as a revision to the State SIP. The rule becomes effective on the date EPA promulgates interim, partial, or final approval in the Federal Register.

To date, the Rule has not received approval by EPA. Section 51.390(b) of the Transportation Conformity Rule states: “Following EPA approval of the State conformity provisions (or a portion thereof) in a revision to the applicable implementation plan, conformity determinations would be governed by the approved (or approved portion of the) State criteria and procedures.” It should also be noted that EPA has changed 40 CFR 51.390 to streamline the requirements for State conformity SIPs. Since a transportation conformity SIP has not been approved for the SJV, the Federal transportation conformity rule still governs.

B. CONFORMITY REGULATION REQUIREMENTS

The Federal regulations identify general criteria and procedures that apply to all transportation conformity determinations, regardless of pollutant and implementation plan status. These include:

- 1) *Conformity Tests* — Sections 93.118 and 93.119 specify emissions tests (budget and interim emissions) that the TIP/RTP must satisfy in order for a determination of conformity to be found. The final transportation conformity regulation issued on July 1, 2004 requires a submitted SIP motor vehicle emissions budget to be found adequate or approved by EPA prior to use for making conformity determinations. The budget must be used on or after the effective date of EPA’s adequacy finding or approval.

2) *Methods / Modeling:*

Latest Planning Assumptions — Section 93.110 specifies that conformity determinations must be based upon the most recent planning assumptions in force at the time the conformity analysis begins. This is defined as “the point at which the MPO begins to model the impact of the proposed transportation plan or TIP on travel and/or emissions. New data that becomes available after an analysis begins is required to be used in the conformity determination only if a significant delay in the analysis has occurred, as determined through interagency consultation” (EPA, 2010b). All analyses for the Conformity Analysis were conducted using the latest planning assumptions and emissions models in force at the time the conformity analysis started in August 2013 (see Chapter 2).

Latest Emissions Models — Section 93.111 requires that the latest emission estimation models specified for use in SIPs must be used for the conformity analysis. EMFAC2011 was used in the Conformity Analysis and is documented in Chapter 3. EPA issued a federal register notice on March 6, 2013 formally approving EMFAC2011 for use in conformity determinations.

- 3) *Timely Implementation of TCMs* — Section 93.113 provides a detailed description of the steps necessary to demonstrate that the new TIP/RTP are providing for the timely implementation of TCMs, as well as demonstrate that the plan and/or program is not interfering with this implementation. TCM documentation is included in Chapter 4 of the Conformity Analysis.
- 4) *Consultation* — Section 93.105 requires that the conformity determination be made in accordance with the consultation procedures outlined in the Federal regulations. These include:
- MPOs are required to provide reasonable opportunity for consultation with State air agencies, local air quality and transportation agencies, the USDOT and EPA (Section 93.105(a)(1)).
 - MPOs are required to establish a proactive public involvement process, which provides opportunity for public review and comment prior to taking formal action on a conformity determination (Section 93.105(e)).

The TIP, RTP, and corresponding conformity determinations are prepared by each MPO. Copies of the Draft documents are provided to member agencies and others, including FHWA, Federal Transit Administration (FTA), EPA, Caltrans, CARB, and the Air District for review. Both the TIP and RTP are required to be publicly available and an opportunity for public review and comment is provided. The Fresno COG adopted consultation process and policy for conformity analysis includes a 30-day comment period followed by a public hearing.

C. AIR QUALITY DESIGNATIONS APPLICABLE TO THE SAN JOAQUIN VALLEY

The conformity regulation (section 93.102) requires documentation of the applicable pollutants and precursors for which EPA has designated the area nonattainment or maintenance. In addition, the nonattainment or maintenance area and its boundaries should be described.

FRESNO COUNCIL OF GOVERNMENTS is located in the federally designated San Joaquin Valley Air Basin. The borders of the basin are defined by mountain and foothill ranges to the east and west. The northern border is consistent with the county line between San Joaquin and Sacramento Counties. The southern border is less defined, but is roughly bounded by the Tehachapi Mountains and, to some extent, the Sierra Nevada range. The 2015 Conformity Analysis for 2015 FTIP Amendment #8 and 2014 RTP Amendment #1 includes analysis of existing and future air quality impacts for each applicable pollutant.

The San Joaquin Valley is currently designated as nonattainment for the National Ambient Air Quality Standard (NAAQS) for 8-hour ozone (2008 standard), and particulate matter under 2.5 microns in diameter (PM_{2.5}) (1997, 2006 and 2012 standards); and has a maintenance plan for particulate matter under 10 microns in diameter (PM-10), as well as a maintenance plan for carbon monoxide (CO) for the urbanized/metropolitan areas of Kern, Fresno, Stanislaus and San Joaquin Counties. State Implementation Plans have been prepared to address carbon monoxide, ozone, PM-10 and PM_{2.5}:

- The 2004 Revision to the California State Implementation Plan for Carbon Monoxide was approved by EPA on November 30, 2005 (effective January 30, 2006).
- The 2007 8-Hour (1997 Standard) Ozone Plan (as revised in 2011) was approved by EPA on March 1, 2012 (effective April 30, 2012).
- The 2007 PM-10 Maintenance Plan, which included revisions to the attainment plan, was approved (with minor technical corrections to the conformity budgets) by EPA on November 12, 2008.
- The 2008 (1997 Standard) PM_{2.5} Plan (as revised in 2011) was approved by EPA on November 9, 2011 (effective January 9, 2012).

EPA designated the San Joaquin Valley nonattainment area for the 2008 Ozone Standard, effective July 20, 2012. Transportation conformity applies one year after the effective date (July 20, 2013). Federal approval for the eight SJV MPO's 2008 Ozone standard conformity demonstrations was received on July 8, 2013. EPA's March 2015 final rule implementing the 2008 Ozone Standard also revoked the 1997 Ozone Standard for transportation conformity purposes. This revocation became effective April 6, 2015.

On November 13, 2009, EPA published Air Quality Designations for the 2006 24-hour PM_{2.5} standard, effective December 14, 2009. Nonattainment areas are required to meet the standard by 2014; transportation conformity applies by December 14, 2010. It is important to note that the 2006 24-hour PM_{2.5} nonattainment area boundary for the San Joaquin Valley is exactly the same as the nonattainment area boundary for the 1997 annual standard.

On January 13, 2015, EPA released its proposed *Approval of San Joaquin Valley Plan and Supplement for the 2006 PM_{2.5} Standard and Proposed Reclassification to Serious for the 2006 PM_{2.5} Standard*. At this time, EPA has not finalized the proposed approval of the Plan and reclassification.

EPA's nonattainment area designations for the new 2012 PM_{2.5} standards became effective on April 15, 2015. Conformity for a given pollutant and standard applies one year after the effective date (April 15, 2016). It is important to note that the 2012 PM_{2.5} standards nonattainment area boundary for the San Joaquin Valley are exactly the same as the nonattainment area boundary for the 1997 annual standard.

On March 23, 2015, EPA released its *Proposed Rule for Implementing National Ambient Air Quality Standards for Fine Particles*, which addresses implementation of the new 2012 PM_{2.5} standards. The implementation rule proposes three options, one of which could revoke the primary 1997 annual PM_{2.5} standard, while maintaining the secondary 1997 annual PM_{2.5} standard. The proposed implementation rule has not been finalized and the standard has not been revoked. In the San Joaquin Valley, the 1997 standards (both 24-hour and annual) continue to apply.

D. CONFORMITY TEST REQUIREMENTS

The conformity (Section 93.109(c)–(k)) rule requires that either a table or text description be provided that details, for each pollutant and precursor, whether the interim emissions tests and/or the budget test apply for conformity. In addition, documentation regarding which emissions budgets have been found adequate by EPA, and which budgets are currently applicable for what analysis years is required.

Specific conformity test requirements established for the San Joaquin Valley nonattainment areas for carbon monoxide, ozone, and particulate matter are summarized below.

Section 93.124(d) of the 1997 Final Transportation Conformity regulation allows for conformity determinations for sub-regional emission budgets by MPOs if the applicable implementation plans (or implementation plan submission) explicitly indicates an intent to create such sub-regional budgets for the purpose of conformity. In addition, Section 93.124(e) of the 1997 rules states: "...if a nonattainment area includes more than one MPO, the implementation plan may establish motor vehicle emission budgets for each MPO, or else the MPOs must collectively make a conformity determination for the entire nonattainment area." Each applicable implementation plan and estimate of baseline emissions in the San Joaquin Valley provides motor vehicle emission budgets by county, to facilitate county-level conformity findings.

CARBON MONOXIDE

The urbanized/metropolitan areas of Kern, Fresno, Stanislaus and San Joaquin Counties are classified maintenance for carbon monoxide (CO). The motor vehicle emission budgets for carbon monoxide are specified in the *2004 Revision to the California State Implementation Plan for Carbon Monoxide* in tons per average winter day. EPA published a direct final rulemaking approving the plan on November 30, 2005, effective January 30, 2006.

For carbon monoxide, the Federal transportation conformity regulation requires that the TIP and RTP must pass an emissions budget test with a budget that has been approved by EPA for transportation conformity purposes. New conformity budgets have been approved for 2003, 2010 and 2018 for portions of the San Joaquin Valley as provided in the following table.

**Table 1-1:
On-Road Motor Vehicle CO Emissions Budgets**

County	2003 Emissions (winter tons/day)	2010 Emissions (winter tons/day)	2018 Emissions (winter tons/day)
Fresno	240	240	240
Kern	180	180	180
San Joaquin	170	170	170
Stanislaus	130	130	130

OZONE (2008 STANDARD)

EPA's final rule implementing the 2008 ozone standard also revoked the 1997 ozone standard for transportation conformity purposes. This revocation is effective April 6, 2015. Areas designated nonattainment for the 2008 ozone standard are required to use any existing adequate or approved SIP motor vehicle emissions budgets for a prior ozone standard until budgets for the 2008 ozone standard are either found adequate or approved. Therefore, when a 2008 ozone nonattainment area has adequate or approved budgets for any ozone standard, the budget test requirements (40 CFR 93.118) must be met.

Under the existing conformity regulation, regional emissions analyses for ozone areas must address nitrogen oxides (NOx) and volatile organic compounds (VOC) precursors. It is important to note that in California, reactive organic gases (ROG) are considered equivalent to and are used in place of volatile organic compounds (VOC).

EPA approved the 2007 Ozone (1997 standard) Plan (as revised in 2011) and conformity budgets on March 1, 2012, effective April 30, 2012. The SIP identified both reactive organic gases (ROG) and nitrogen oxides (NOx) subarea budgets in tons per average summer day for each MPO in the nonattainment area. It is important to note that the boundaries for both the 2008 ozone standard and previous ozone standard are identical. Consequently, for this conformity analysis, the SJV MPOs will continue to conduct demonstrations for subarea emissions budgets as established in the 2007 Ozone Plan (as revised in 2011).

The approved conformity budgets from Table 5 of the EPA Federal Register notice are provided in the table below. These budgets will be used to compare to emissions resulting from the 2015 FTIP Amendment #8 and the 2014 RTP Amendment #1.

Table 1-2:
Approved Budgets from the 2007 Ozone Plan (as revised in 2011)
(summer tons/day)

County	2011		2014		2017		2020		2023	
	ROG	NOx	ROG	NOx	ROG	NOx	ROG	NOx	ROG	NOx
Fresno	14.3	36.2	10.7	30.0	9.3	22.6	8.3	17.7	8.0	13.5
Kern (SJV)	12.7	50.3	9.7	42.7	8.7	31.7	8.2	25.1	7.9	18.6
Kings	2.8	10.7	2.1	8.9	1.8	6.7	1.7	5.3	1.6	4.0
Madera	3.4	9.3	2.5	7.7	2.2	5.8	2.0	4.7	1.9	3.6
Merced	5.1	19.9	3.7	16.7	3.2	12.4	2.9	9.9	2.8	7.4
San Joaquin	11.1	24.6	8.4	20.5	7.2	15.6	6.4	12.4	6.3	10.0
Stanislaus	8.5	16.9	6.4	13.9	5.6	10.6	5.0	8.4	4.7	6.4
Tulare	8.8	16.0	6.7	13.2	5.8	10.1	5.3	8.1	4.9	6.2

PM-10

The 2007 PM-10 Maintenance Plan was approved (with minor technical corrections to the conformity budgets) by EPA on November 12, 2008, which contains motor vehicle emission budgets for PM-10 and NOx, as well as a trading mechanism. Motor vehicle emission budgets are established based on average annual daily emissions. The motor vehicle emissions budget for PM-10 includes regional re-entrained dust from travel on paved roads, vehicular exhaust, travel on unpaved roads, and road construction.

The conformity budgets from Tables 6 and 7 of the Plan are provided below (including the minor technical corrections) and will be used to compare emissions for each analysis year. CARB subsequently updated the 2005 attainment budgets; these updates are reflected in the table below.

The PM-10 SIP allows trading from the motor vehicle emissions budget for the PM-10 precursor NOx to the motor vehicle emissions budget for primary PM-10 using a 1.5 to 1 ratio. The trading mechanism allows the agencies responsible for demonstrating transportation conformity in the San Joaquin Valley to supplement the 2005 budget for PM-10 with a portion of the 2005 budget for NOx, and use these adjusted motor vehicle emissions budgets for PM-10 and NOx to demonstrate transportation conformity with the PM-10 SIP for analysis years after 2005. As noted above, EPA approved the 2007 PM-10 Maintenance Plan (with minor technical corrections to the conformity budgets) on November 12, 2008, which includes continued approval of the trading mechanism.

The trading mechanism will be used only for conformity analyses for analysis years after 2005. To ensure that the trading mechanism does not impact the ability to meet the NOx budget, the NOx emission reductions available to supplement the PM-10 budget shall only be those remaining after the NOx budget has been met.

Table 1-3:
On-Road Motor Vehicle PM-10 Emissions Budgets
(tons per average annual day)

County	2005		2020	
	PM-10	NOx	PM-10	NOx
Fresno	13.5	59.2	16.1	23.2
Kern ^(a)	12.1	88.3	14.7	39.5
Kings	3.1	16.7	3.6	6.8
Madera	3.6	13.9	4.7	6.5
Merced	6.2	39.4	6.4	12.9
San Joaquin	9.1	42.6	10.6	17.0
Stanislaus	5.6	29.7	6.7	10.8
Tulare	7.3	25.1	9.4	10.9

^(a) Kern County subarea includes only the portion of Kern County within the San Joaquin Valley Air Basin

PM2.5

EPA and FHWA have indicated that areas violating both the annual and 24-hour standards for PM2.5 must address all standards in the conformity determination. The San Joaquin Valley currently violates both the 1997 and 2012 annual PM2.5 standards and the 2006 24-hour PM2.5 standards; thus the conformity determination includes all three analyses (see discussion under Air Quality Designations Applicable to the San Joaquin Valley above).

The 2008 PM2.5 Plan for the 1997 PM2.5 standard (as revised in 2011) was approved by EPA on November 9, 2011, which contains motor vehicle emission budgets for PM2.5 and NOx established based on average annual daily emissions, as well as a trading mechanism. The motor vehicle emissions budget for PM2.5 includes directly emitted PM2.5 motor vehicle emissions from tailpipe, brake wear and tire wear. VOC, SOx, ammonia, and dust (from paved roads, unpaved roads, and road construction) were found to be insignificant and not included in the motor vehicle emission budgets for conformity purposes. The conformity budgets from Table 5 of the November 9, 2011 Federal Register are provided in Table 1-4 below and will be used to compare emissions resulting from the 2015 FTIP Amendment #8 and the 2014 RTP Amendment #1.

The Clean Air Act requires all states to attain the 1997 PM2.5 standards as expeditiously as practicable beginning in 2010, but by no later than April 5, 2015. States must identify their attainment dates based on the rate of reductions from their control strategies and the severity of the PM2.5 problem. On March 27, 2015 EPA proposed reclassification of the San Joaquin Valley to Serious nonattainment of the 1997 PM2.5 standard. The San Joaquin Valley 2015 PM2.5 Plan (1997 standard) was adopted by ARB on May 21, 2015 and subsequently submitted to EPA on June 25, 2015. The Plan requests reclassification of the San Joaquin Valley nonattainment area to

Serious, proposes new conformity budgets, and lays out a strategy to attain the 1997 24-hour PM2.5 standards. No final EPA action has been taken on the plan. As a result, the proposed SIP budgets are assumed to be unavailable for use and the 2008 PM2.5 Plan conformity budgets are the only budgets applicable at this time.

On January 13, 2015, EPA released its proposed *Approval of San Joaquin Valley Plan and Supplement for the 2006 PM2.5 Standard and Proposed Reclassification to Serious for the 2006 PM2.5 Standard*. At this time, EPA has not finalized the proposed approval of the Plan (including SIP budgets) and reclassification.

In accordance with the EPA Interim Transportation Conformity Guidance for 2006 PM2.5 NAAQS Nonattainment areas, if a 2006 PM2.5 area has adequate or approved SIP budgets that address the 1997 standards, it must use the budget test until new 2006 PM2.5 standard budgets are found adequate or approved. EPA has not approved nor found adequate 2006 PM2.5 standard SIP budgets for the San Joaquin Valley. For this Conformity Analysis, the SJV will continue to conduct determinations for subarea emission budgets as established in the 2008 PM2.5 (1997 Standard) Plan (as revised in 2011).

In accordance with Section 93.109(i)(3) of the conformity rule, if a 2012 PM2.5 nonattainment area has adequate or approved SIP budgets that address the annual 1997 PM2.5 standards, it must use the budget test until new 2012 PM2.5 standard budgets are found adequate or approved. For this Conformity Analysis, the SJV will continue to conduct determinations for subarea emission budgets as established in the 2008 PM2.5 (1997 Standard) Plan (as revised in 2011).

In addition, the *Proposed Rule for Implementing National Ambient Air Quality Standards for Fine Particles* proposes three options, one of which could revoke the primary 1997 annual PM2.5 standard, while maintaining the secondary 1997 annual PM2.5 standard. The proposed implementation rule has not been finalized and the standard has not been revoked. In the San Joaquin Valley, the 1997 standards (both 24-hour and annual) continue to apply.

Table 1-4:
On-Road Motor Vehicle PM_{2.5} Emissions Budgets
(tons per average annual day)

	2012		2014	
County	PM_{2.5}	NO_x	PM_{2.5}	NO_x
Fresno	1.5	35.7	1.1	31.4
Kern (SJV)	1.9	48.9	1.2	43.8
Kings	0.4	10.5	0.3	9.3
Madera	0.4	9.2	0.3	8.1
Merced	0.8	19.7	0.6	17.4
San Joaquin	1.1	24.5	0.9	21.6
Stanislaus	0.7	16.7	0.6	14.6
Tulare	0.7	15.7	0.5	13.8

The 2008 PM_{2.5} SIP included a trading mechanism that allows trading from the motor vehicle emissions budget for the PM-2.5 precursor NO_x to the motor vehicle emissions budget for primary PM-2.5 using a 9 to 1 ratio. The trading mechanism allows the agencies responsible for demonstrating transportation conformity in the San Joaquin Valley to supplement the 2014 budget for PM-2.5 with a portion of the 2014 budget for NO_x, and use these adjusted motor vehicle emissions budgets for PM-2.5 and NO_x to demonstrate transportation conformity with the PM-2.5 SIP for analysis years after 2014. As noted above, EPA approved the 2008 PM_{2.5} Plan (as revised in 2011) on November 9, 2011, which includes continued approval of the trading mechanism.

The trading mechanism will be used only for conformity analyses for analysis years after 2014. To ensure that the trading mechanism does not impact the ability to meet the NO_x budget, the NO_x emission reductions available to supplement the PM-2.5 budget shall only be those remaining after the NO_x budget has been met.

As noted above, in accordance with the EPA Transportation Conformity Rule Restructuring Amendments Nonattainment areas allows 2006 and 2012 PM_{2.5} areas with adequate or approved 1997 PM_{2.5} budgets to determine conformity for all three NAAQS at the same time, using the budget test.

E. ANALYSIS YEARS

The conformity regulation (Section 93.118[b] and [d]) requires documentation of the years for which consistency with motor vehicle emission budgets must be shown. In addition, any interpolation performed to meet tests for years in which specific analysis is not required need to be documented.

For the selection of the horizon years, the conformity regulation requires: (1) that if the attainment year is in the time span of the transportation plan, it must be modeled; (2) the last year forecast in the transportation plan must be a horizon year; and (3) horizon years may not be more than ten years apart. In addition, the conformity regulation requires that conformity must be demonstrated for each year for which the applicable implementation plan specifically establishes motor vehicle emission budgets.

Section 93.118(b)(2) clarifies that when a maintenance plan has been submitted, conformity must be demonstrated for the last year of the maintenance plan and any other years for which the maintenance plan establishes budgets in the time frame of the transportation plan. Section 93.118(d)(2) indicates that a regional emissions analysis may be performed for any years, the attainment year, and the last year of the plan's forecast. Other years may be determined by interpolating between the years for which the regional emissions analysis is performed.

**Table 1-5:
San Joaquin Valley Conformity Analysis Years**

Pollutant	Budget Years¹	Attainment/ Maintenance Year	Intermediate Years	RTP Horizon Year
CO	NA	2018	2017/2025/2035	2040
Ozone	2014/2017/2020/2023	2031	NA	2040
PM-10	NA	2020	2025/2035	2040
PM2.5	NA	2014/2021 ²	2017/2025/2035	2040

¹ Budget years that are not in the time frame of the transportation plan/conformity analysis are not included as analysis years (e.g., 2014), although they may be used to demonstrate conformity.

². Note: 2014 is the attainment year for the 1997 and 2006 PM2.5 standards. 2021 is the attainment year for the 2021 PM2.5 standards.

Section 93.118(d)(2) indicates that the regional emissions analysis may be performed for any years in the time frame of the transportation plan provided they are not more than ten years apart and provided the analysis is performed for the attainment year (if it is in the time frame of the transportation plan) and the last year of the plan's forecast period. Emissions in years for which consistency with motor vehicle emissions budgets must be demonstrated, as required in paragraph (b) of this section (i.e., each budget year), may be determined by interpolating between the years for which the regional emissions analysis is performed. For CO, the analysis year 2018 will be interpolated from 2017 and 2025.

For the 2008 Ozone Standard, the San Joaquin Valley has been classified as an Extreme nonattainment area with an attainment date of July 20, 2032. In accordance with the March 2015 *Implementation of the 2008 National Ambient Air Quality Standards for Ozone: State Implementation Plan Requirements* final rule, the 2032 analysis year will be updated to 2031. When using the budget test, the attainment year of the 2008 Ozone standard must be analyzed

(e.g. 2031). In addition, in areas that have approved or adequate budgets for the 1997 ozone standard, consistency with those budgets must also be determined. The attainment year of 2031 must be modeled.

The Clean Air Act requires all states to attain the 1997 PM_{2.5} standards as expeditiously as practicable beginning in 2010, but by no later than April 5, 2015. States must identify their attainment dates based on the rate of reductions from their control strategies and the severity of the PM_{2.5} problem. On March 27, 2015 EPA proposed reclassification of the San Joaquin Valley to Serious nonattainment of the 1997 PM_{2.5} standard. The San Joaquin Valley 2015 PM_{2.5} Plan (1997 standard) was adopted by ARB on May 21, 2015 and subsequently submitted to EPA on June 25, 2015. The Plan requests reclassification of the San Joaquin Valley nonattainment area to Serious, proposes new conformity budgets, and lays out a strategy to attain the 1997 24-hour PM_{2.5} standards. No final EPA action has been taken on the plan. As a result, the proposed SIP budgets are assumed to be unavailable for use and the 2008 PM_{2.5} Plan conformity budgets are the only budgets applicable at this time.

On January 13, 2015, EPA released its proposed *Approval of San Joaquin Valley Plan and Supplement for the 2006 PM_{2.5} Standard and Proposed Reclassification to Serious for the 2006 PM_{2.5} Standard*. In addition, new transportation conformity budgets for the 2006 primary and secondary 24-hour PM_{2.5} standards are proposed to be approved. At this time, EPA has not finalized the proposed approval of the Plan (including SIP budgets) and reclassification.

On April 15, 2015, EPA classified the San Joaquin Valley as Moderate nonattainment for the 2012 PM_{2.5} Standards. In accordance with Section 93.109(i)(3) of the conformity rule, if a 2012 PM_{2.5} nonattainment area has adequate or approved SIP budgets that address the annual 1997 PM_{2.5} standards, it must use the budget test until new 2012 PM_{2.5} standard budgets are found adequate or approved. When using the budget test, the attainment year must be analyzed (e.g. 2021). In addition, in areas that have approved or adequate budgets for the 1997 annual PM_{2.5} standards, consistency with those budgets must also be determined. The attainment year of 2021 must be modeled.

CHAPTER 2: LATEST PLANNING ASSUMPTIONS AND TRANSPORTATION MODELING

The Clean Air Act states that “the determination of conformity shall be based on the most recent estimates of emissions, and such estimates shall be determined from the most recent population, employment, travel, and congestion estimates as determined by the MPO or other agency authorized to make such estimates.” On January 18, 2001, the USDOT issued guidance developed jointly with EPA to provide additional clarification concerning the use of latest planning assumptions in conformity determinations (USDOT, 2001).

According to the conformity regulation, the time the conformity analysis begins is “the point at which the MPO or other designated agency begins to model the impact of the proposed transportation plan or TIP on travel and/or emissions.” The conformity analysis and initial modeling began in August 2013. A summary of transportation model updates and latest planning assumptions was transmitted to the San Joaquin Valley Interagency Consultation (IAC) for review and comments or concurrence on August 18, 2013. The summary was discussed on the September 17, 2013 IAC conference call. Both EPA and FHWA indicated that there were no comments or concerns regarding the summary.

Key elements of the latest planning assumption guidance include:

- Areas are strongly encouraged to review and strive towards regular five-year updates of planning assumptions, especially population, employment and vehicle registration assumptions.
- The latest planning assumptions must be derived from the population, employment, travel and congestion estimates that have been most recently developed by the MPO (or other agency authorized to make such estimates) and approved by the MPO.
- Conformity determinations that are based on information that is older than five years should include written justification for not using more recent information. For areas where updates are appropriate, the conformity determination should include an anticipated schedule for updating assumptions.
- The conformity determination must use the latest existing information regarding the effectiveness of the transportation control measures (TCMs) and other implementation plan measures that have already been implemented.

Fresno COG uses the Citilabs Cube transportation model. The model was validated in 2013 for the 2008 base year. The latest planning assumptions used in the transportation model validation and Conformity Analysis is summarized in Table 2-1.

Table 2-1
Summary of Latest Planning Assumptions for the Fresno COG Conformity Analysis

Assumption	Year and Source of Data (MPO action)	Modeling	Next Scheduled Update
Population	Base Year: Population is based on the 2008 California Department of Finance data. Projections: Population based on "San Joaquin Valley Demographic Forecasts 2010 to 2050," released by The Planning Center in March 2012.	This data was disaggregated to the TAZ level and used in the Cube model for the base year validation and future year projections.	Population and Employment projections will be reviewed and updated periodically with possible update in 2016.
Employment	Base Year: Employment data is based on 2008 State of California Employment Development Department data. Projections: Population based on "San Joaquin Valley Demographic Forecasts 2010 to 2050," released by The Planning Center in March 2012.	This data was disaggregated to the TAZ level and used in the Cube model for the base year validation and future year projections.	Population and Employment projections will be reviewed and updated periodically with possible update in 2016.
Traffic Counts	The transportation model was validated in 2013 to the 2008 base year using daily and peak hour traffic counts. More than 450 traffic counts were obtained from the City of Fresno, Clovis, the County of Fresno and Caltrans. The majority of the traffic count database is from 2008. However, traffic counts from 2007 through 2010 were used, adjusted to 2008 levels based on annual growth rates.	Cube was validated using these traffic counts.	Fresno COG maintains a Regional Traffic Monitoring Program that collects thousands of traffic counts annually. New counts for 2008 base year were compiled for the MIP validation.

Vehicle Miles of Travel	The Fresno COG Policy Board accepted the 2013 transportation model validation for the 2008 base year on March 20, 2014. The Fresno model is validated to within 1% of HPMS.	Cube is the transportation model used to estimate VMT in Fresno County.	VMT is an output of the transportation model; VMT is affected by the TIP/RTP project updates and is included in each new conformity analysis.
Speeds	Free flow speed data from a 2005 comprehensive speed study was incorporated in to our 2013 model update. Speed distributions were updated in EMFAC2011, using methodology approved by ARB and with information from the transportation model.	The Cube transportation model includes a feedback loop that assures congested speeds are consistent with travel speeds used throughout the traffic modeling process. EMFAC2011	Traffic speeds are continuously monitored by our local jurisdictions. The information is then provided to Fresno COG for use in our traffic modeling process.
Vehicle Registrations	EMFAC2011 is the most recent model for use in California conformity analyses. Vehicle registration data is included by ARB in the model and cannot be updated by the user.	EMFAC2011	EMFAC2011
State Implementation Plan Measures	Latest implementation status of commitments in prior SIPs.	Emission reduction credits consistent with the SIPs are post-processed via spreadsheets as documented in Ch. 4.	Updated for every conformity analysis.

A. SOCIOECONOMIC DATA

POPULATION, EMPLOYMENT, AND LAND USE

The conformity regulation requires documentation of base case and projected population, employment, and land use used in the transportation modeling. USDOT/EPA guidance indicates that if the data is more than five years old, written justification for the use of older data must be provided. In addition, documentation is required for how land use development scenarios are consistent with future transportation system alternatives, and the reasonable distribution of employment and residences for each alternative.

Supporting Documentation:

POPULATION FORECAST

The forecasts used for the Fresno COG Regional Transportation Plan/Sustainable Communities Strategy were from the *San Joaquin Valley Demographic Forecasts: 2010 to 2050* prepared by The Planning Center, March 2012. The forecast was part of a San Joaquin Valley demographic study commissioned by the eight metropolitan planning organizations (MPOs) of the valley, in an effort to obtain recently-prepared projections. The latest State of California Department of Finance (DOF) projection at the time was released in July 2007 and did not take into account the 2007-2008 recession and the subsequent slow economic recovery, thus prompting the need for an updated forecast. In January 2013, the Department of Finance released their latest projection for Fresno County, which differed from The Planning Center forecasts by less than two percent for every year between now and the forecast horizon year of 2050, which helped confirm the validity of the Planning Center forecast for use in the RTP/SCS.

This study includes three primary forecasts of population, households and housing units. Other projections developed by The Planning Center, e.g., age distribution, average household size, household income, household type, race/ethnicity, are derived from the three primary forecasts. The Planning Center forecasts are based on several different projections including household trend, total housing unit trend, housing construction trend, employment trend, cohort-component model, population trend, average household size trend, and household income trend. The least-squares linear curve forms the basis for all projections because the forecasts are long-term and curve-fitting techniques (e.g., parabolic curve, logistic curve) do not provide reasonable long-term results. Three measures evaluate the adequacy of each projection: mean absolute percentage error (MAPE), F-test, and t-test.

The population forecast is included in Table 2-2.

EMPLOYMENT FORECAST

Employment was forecast by The Planning Center using the at-place employment data by sector from the State of California Employment Development Department. The model constructs a least-squares line for each economic sector and sums the results to generate a projection for total employment in the County. The least-squares line for total employment in Fresno County produces a MAPE of 2.21% and a standard error of .85%.

The resulting employment forecast is included in Table 2-2.

HOUSEHOLD FORECAST

The household forecast was dependent on the expected increase in household size. According to the *San Joaquin Valley Demographic Forecasts: 2010 to 2050* prepared by The Planning Center, household sizes in Fresno County are projected to increase steadily—from approx. 3.1298 persons per household in 2008 to approx. 3.3515 in 2035. Thus, some of the expected total

growth in household population for Fresno County will manifest not in new development but rather in existing housing units, as each household on average will contain more people.

To calculate the household population growth due to household size increase, Fresno COG used the following formula:

$$HH_{2008}(HHsize_N - HHsize_{2008})$$

Where

HH_{2008} = number of total households in Fresno County in 2008 (the base year) = 308,047

$HHsize_N$ = projected average countywide household size for target year N

$HHsize_{2008}$ = average countywide household size in 2008 (the base year) = 3.1298

Therefore, by this formula, the projected household population growth from 2008 to 2035 due to household size increase is 308,047 (3.3515 – 3.1298) = 68,289 *persons*. Subtracting this value from the total projected growth in household population for the County represents the household population growth due to new development: 309,851 *persons* by 2035.

Projected household growth was allocated to jurisdictions based on the historic shares of housing growth. The growth was further distributed within jurisdictions using the latest adopted or proposed land use maps and in consultation with staff from each jurisdiction.

B. TRANSPORTATION MODELING

The San Joaquin Valley Metropolitan Planning Organizations (MPOs) utilize the Citilabs Cube traffic modeling software. The Valley TPA regional traffic models consist of traditional four-step traffic forecasting models. They use land use, socioeconomic, and road network data to estimate facility-specific roadway traffic volumes. Each TPA model covers the appropriate county area, which is then divided into hundreds or thousands of individual traffic analysis zones (TAZs). In addition the model roadway networks include thousands of nodes and links. Link types include freeway, freeway ramp, other State route, expressway, arterial, collector, and local collector. Current and future-year road networks were developed considering local agency circulation elements of their general plans, traffic impact studies, capital improvement programs, and the State Transportation Improvement Program. The models use equilibrium, a capacity sensitive assignment methodology, and the data from the model for the emission estimates differentiates between peak and off-peak volumes and speeds. In addition, the model is reasonably sensitive to changes in time and other factors affecting travel choices. The results from model validation/calibration were analyzed for reasonableness and compared to historical trends.

Specific transportation modeling requirements in the conformity regulation are summarized below, followed by a description of how the Fresno COG transportation modeling methodology meets those requirements.

Fresno COG completed the update of our traffic model to Citilabs Cube modeling software and revalidation to a new base year of 2008 in December 2013. The Fresno COG regional traffic model is a four-step mode choice traffic model. It uses land use, socioeconomic, and road network data to estimate facility-specific roadway traffic volumes. The study area for the Fresno COG model covers all of Fresno County including the cities of Clovis, Coalinga, Firebaugh,

Fowler, Fresno, Huron, Kerman, Kingsburg, Mendota, Orange Cove, Parlier, Reedley, San Joaquin, Sanger, and Selma. The county is divided up into approximately 2,900 traffic analysis zones. The model roadway network includes over 6,800 nodes and over 17,000 links. Link types include freeway, freeway ramp, other state route, expressway, arterial, collector, and local collector. Current and future-year road networks were developed considering local agency circulation elements of their general plans, traffic impact studies, capital improvement programs, and the State Transportation Improvement Program.

The Fresno COG model has been set up to estimate travel demand during six periods:

- AM peak three-hour period
- PM peak three-hour period
- Off-peak eleven hours
- AM peak hour
- PM peak hour
- Mid-Day seven hours

The traffic volumes projected for the three-hour peak periods, mid-day seven hours, off-peak eleven hours, and remaining hours are added together to create daily traffic projections.

The Fresno County Model Steering Committee oversees the improvements and updates to the model. The Model Steering Committee is a sub-committee of the Fresno COG Transportation Technical Committee and meets quarterly and when needed. The model and its assumptions are constantly being updated based upon the latest planning information.

TRAFFIC COUNTS

The conformity regulation requires documentation that a network-based travel model is in use that is validated against observed counts for a base year no more than 10 years before the date of the conformity determination. Document that the model results have been analyzed for reasonableness and compared to historical trends and explain any significant differences between past trends and forecasts (for per capita vehicle-trips, VMT, trip lengths mode shares, time of day, etc.).

Supporting Documentation:

Fresno COG completed the update of the traffic model to Citilabs Cube modeling software and revalidation to a new base year of 2008 in 2013. The model was validated by comparing its estimates of 2008 traffic conditions with more than 2,000 peak and off peak traffic counts. The 2013 validation meets standard criteria for replicating total traffic volumes on various road types and for percent error on links. The 2013 validation also meets standard criteria for percent error relative to traffic counts on 80% of the analyzed screenlines throughout Fresno County.

Fresno COG maintains a Regional Traffic Monitoring Program that collects thousands of traffic counts across the county annually. The City of Fresno, City of Clovis and Fresno County are the 3 agencies that participate in this program.

SPEEDS

The conformity regulation requires documentation of the use of capacity sensitive assignment methodology and emissions estimates based on a methodology that differentiates between peak and off-peak volumes and speeds, and bases speeds on final assigned volumes. In addition, documentation of the use of zone-to-zone travel impedances to distribute trips in reasonable agreement with the travel times estimated from final assigned traffic volumes. Where transit is a significant factor, document that zone-to-zone travel impedances used to distribute trips are used to model mode split. Finally, document that reasonable methods were used to estimate traffic speeds and delays in a manner sensitive to the estimated volume of travel on each roadway segment represented in the travel model.

Supporting Documentation:

Due to speed's impact on pollution emission from automobiles, and because congestion speeds are used as input to air pollution emission models, it is vital that congested speeds from the travel model reasonably replicate characteristics of traffic on the streets. Good free-flow speed data in the travel model is the first step towards achieving this goal.

A comprehensive review of free flow speed data (including floating car speed studies) was conducted in 2005 and incorporated into our 2013 model update. In addition Fresno COG member agencies regularly conduct free flow speed surveys for various purposes. Such speed data was requested by Fresno COG during the latest model update and also incorporated in the model as input during the 2013 model validation.

FEEDBACK MECHANISMS

The Fresno COG Model includes a feedback loop that uses congested travel times as an input to the trip distribution step. The feedback loop is intended to ensure that the congested travel impedances (times) used for final traffic assignment and as input to the air quality analysis are consistent with the travel impedances used throughout the model process.

For the Fresno COG Model, the feedback loop is considered to converge when the travel times that result from the congested travel speeds after traffic assignment compare closely with the travel times used as input to the trip distribution process.

In an effort to meet all Transportation Conformity Rule modeling requirements, a full feedback loop process was implemented as of 2001 that iterates until it reaches a set of convergence criteria. The convergence criteria are consistent with Transportation Conformity Rule Section 93.122 (b)(1)(v).

TRANSIT

The conformity regulation requires documentation of any changes in transit operating policies and assumed ridership levels since the previous conformity determination. Document the use of the latest transit fares and road and bridge tolls.

Supporting Documentation:

Fresno COG has been running a mode choice model since 2003. The model replicates major transit services in Fresno County, including Fresno Area Express (FAX), Clovis Transit Stageline and Fresno County Rural Transit Agency. Please refer to Urban Mass Transportation and Rural Area Public Transportation and Social Service Transportation in the 2014 RTP for further information regarding the services, their accomplishments and proposed actions.

The mode choice model uses a multinomial logit formulation, which assigns the probability of using a particular travel mode based on attractiveness measure for that mode in relation to the sum of the attractiveness of the other mode. The model predicts the following seven modes:

1. Drive Alone
2. 2-Person vehicle
3. 3+-Person vehicle
4. Walk to Transit
5. Drive to Transit
6. Walk
7. Bike

Daily transit trips are assigned to the transit network. Transit trips are assigned to the single best path based on in-vehicle time plus weighted out-of- vehicle times. The transit trips are assigned in four groups:

1. Peak period (A.M. plus P.M.), walk access
2. Peak period (A.M. plus P.M.), drive access
3. Off-peak, walk access
4. Off-peak, drive access

The peak period transit trips represent trips occurring during the A.M. three- hour peak period plus the P.M. three hour peak period. Peak period transit trips are assigned to the peak transit service (peak period headways) with travel times based on the congested speeds from the A.M. peak period traffic assignment. Off-peak transit trips represent trips during the remaining 18 hours and are assigned to the off-peak transit service (off-peak headways) with travel times based on the congested road speeds from the off-peak traffic assignment.

Transit trips are all assigned as production to attraction rather than origin to destination. For example, a person who uses transit for work will be assigned as two trips from the home TAZ to the work TAZ rather than one trip in each direction. This is done so that the model can keep track

of which end of the trip can use drive access. In order to convert to actual directional boardings, the assigned transit trips in each direction must be added together and then divided by two.

The transit vehicle times and drive access times are affected by congestion on the road network.

VALIDATION/CALIBRATION

The conformity regulation requires documentation that the model results have been analyzed for reasonableness and compared to historical trends and explain any significant differences between past trends and forecasts (for per capita vehicle-trips, VMT, trip lengths mode shares, time of day, etc.). In addition, documentation of how travel models are reasonably sensitive to changes in time, cost, and other factors affecting travel choices is required. The use of HPMS, or a locally developed count-based program or procedures that have been chosen to reconcile and calibrate the network-based travel model estimates of VMT must be documented.

Supporting Documentation:

The model was validated in 2013 by comparing its estimates of 2008 traffic conditions with 2008 traffic counts. The 2013 validation meets standard criteria for replicating total traffic volumes on various road types and for percent error on links. The 2013 validation also meets standard criteria for percent error relative to traffic counts on 80% of the screenlines throughout Fresno County.

For Serious and above nonattainment areas, transportation conformity guidance, Section 93.122(b)(3), as amended August 15, 1997, states:

Highway Performance Monitoring System (HPMS) estimates of vehicle miles traveled (VMT) shall be considered the primary measure of VMT within the portion of the nonattainment or maintenance area and for the functional classes of roadways included in HPMS, for urban areas which are sampled on a separate urban area basis. For areas with network-based travel models, a factor (or factors) may be developed to reconcile and calibrate the network-based travel model estimates of VMT in the base year of its validation to the HPMS estimates for the same period. These factors may then be applied to model estimates of future VMT. In this factoring process, consideration will be given to differences between HPMS and network-based travel models, such as differences in the facility coverage of the HPMS and the modeling network description.

TRAFFIC VALIDATION

The Fresno COG Model traffic validation is based on several criteria, including vehicle-miles of travel, total volume by road type, screenlines, gateways and percent of links within acceptable limits.

Vehicle Miles of Travel

Vehicle miles of travel (VMT) were estimated from the travel demand model by multiplying link volumes by link distances. The model estimates intrazonal trips (trips remaining within a TAZ) but does not assign these trips to the model road network. The intrazonal trips were multiplied by the estimated intrazonal distances to calculate intrazonal VMT.

The Caltrans HPMS 2008 estimate of VMT in Fresno County was 22,376,000. The 2008 model base year estimated 22,077,974 VMT on the roadway links and 71,001 in intrazonal VMT for a total of 22,148,975 VMT. The 2008 model estimate is 1% lower than the Caltrans 2008 HPMS VMT target.

FUTURE NETWORKS

The conformity regulation requires that a listing of regionally significant projects and federally-funded non-regionally significant projects assumed in the regional emissions analysis be provided in the conformity documentation. In addition, all projects that are exempt must also be documented.

§93.106(a)(2)ii and §93.122(a)(1) requires that regionally significant additions or modifications to the existing transportation network that are expected to be open to traffic in each analysis year be documented for both Federally funded and non-federally funded projects (see Appendix B).

§93.122(a)(1) requires that VMT for non-regionally significant Federal projects is accounted for in the regional emissions analysis. It is assumed that all SJV MPOs include these projects in the transportation network (see Appendix B).

§93.126, §93.127, §93.128 require that all projects in the TIP/RTP that are exempt from conformity requirements or exempt from the regional emissions analysis be documented. In addition, the reason for the exemption (Table 2, Table 3, traffic signal synchronization) must also be documented (see Appendix B). It is important to note that the CTIPs exemption code is provided in response to FHWA direction.

Supporting Documentation:

The build highway networks include qualifying projects based on the 2015 FTIP and 2014 RTP. Not all of the street and freeway projects included in the TIP/RTP qualify for inclusion in the highway network. Projects that call for study, design, right-of-way acquisition, or non-capacity improvements are not included in the networks. When these projects result in actual facility construction projects, the associated capacity changes are coded into the network as appropriate. Since the networks define capacity in terms of number of through traffic lanes, only construction projects that increase the lane-miles of through traffic are included.

Generally, Valley TPA highway networks include all roadways included in the county or cities classified system. These links typically include all freeways plus expressways, arterials, collectors and local collectors. Highway networks also include regionally significant planned local improvements from Transportation Impact Fee Programs and developer funded improvements required to mitigate the impact of a new development.

Small-scale local street improvements contained in the TIP/RTP are not coded on the highway network. Although not explicitly coded, traffic on collector and local streets is simulated in the models by use of abstract links called “centroid connectors”. These represent local streets and driveways which connect a neighborhood to a regionally-significant roadway. Model estimates

of centroid connector travel are reconciled against HPMS estimates of collector and local street travel.

C. TRAFFIC ESTIMATES

A summary of the population, employment, and travel characteristics for the FRESNO COUNCIL OF GOVERNMENTS transportation modeling area for each scenario in the Conformity Analysis is presented in Table 2-2.

**Table 2-2:
Traffic Network Comparison for Horizon Years Evaluated in Conformity Analysis**

Horizon Year	Total Population	Employment	Average Weekday VMT	Total Lane Miles
2017	1,038,887	350,751	25,339,030	6,579
2020	1,082,097	363,581	26,218,038	6,698
2021	1,096,626	367,857	26,885,230	6,698
2023	1,125,684	376,410	27,522,088	6,720
2025	1,154,741	384,963	28,239,998	6,836
2031	1,242,239	410,622	30,576,278	6,953
2035	1,300,597	427,728	31,205,602	7,014
2040	1,373,679	449,111	32,798,787	7,014

D. VEHICLE REGISTRATIONS

FRESNO COUNCIL OF GOVERNMENTS does not estimate vehicle registrations, age distributions or fleet mix. Rather, current forecasted estimates for these data are developed by CARB and included in the EMFAC2011 model (http://www.arb.ca.gov/msei/onroad/latest_version.htm). EMFAC2011 is the most recent model for use in California conformity analyses. Vehicle registrations, age distribution and fleet mix are developed and included in the model by CARB and cannot be updated by the user. EPA issued a federal register notice on March 6, 2013 formally approving EMFAC2011 for conformity.

E. STATE IMPLEMENTATION PLAN MEASURES

The air quality modeling procedures and associated spreadsheets contained in Chapter 3 Air Quality Modeling assume emission reductions consistent with the applicable air quality plans.

The emission reductions assumed for these committed measures reflect the latest implementation status of these measures. Committed control measures in the applicable air quality plans that reduce mobile source emissions and are used in conformity, are summarized below.

CARBON MONOXIDE

No committed control measures are included in the conformity demonstration.

OZONE

Committed control measures in the 2007 8-hour Ozone Plan (as revised in 2011) that reduce mobile source emissions and are included in the conformity demonstration are shown in Table 2-3.

**Table 2-3:
2007 Ozone Plan Measures Assumed in the Conformity Analysis**

Measure Description	Pollutants
Existing Local Reductions: Rule 9310 (School Bus Fleets)	Summer NOx
Existing State Reductions: Carl Moyer Program & AB 1493 GHG Standards	Summer ROG Summer NOx
New/Proposed Local Reductions: Rule 9410 (Employer Based Trip Reduction)	Summer ROG Summer NOx
New/Proposed State Reductions: Smog Check & Reformulated Gas (RFG)	Summer ROG Summer NOx

NOTE: This table is consistent with the 2007 8-Hour Ozone Plan (as revised in 2011) which was approved by EPA on March 1, 2012 (effective April 30, 2012). In addition, the ARB "Truck Rule" has been included in EMFAC2011.

PM-10

Committed control measures in the EPA approved 2007 PM-10 Maintenance Plan that reduce mobile source emissions and are included in the conformity demonstration are shown in Table 2-4.

**Table 2-4:
2007 PM-10 Maintenance Plan Measures Assumed in the Conformity Analysis**

Measure Description	Pollutants
ARB existing Reflash, Idling, and Moyer	PM-10 annual exhaust NOx annual exhaust
District Rule 8061: Paved and Unpaved Roads	PM-10 paved road dust PM-10 unpaved road dust
District Rule 8021 Controls: Construction, Demolition, Excavation, Extraction, and Other Earth Moving Activities	PM-10 road construction dust

PM2.5

Committed control measures in the 2008 PM2.5 Plan (as revised in 2011) that reduce mobile source emissions and are included in the conformity demonstration are shown in Table 2-5.

**Table 2-5:
2008 PM2.5 Plan Measures Assumed in the Conformity Analysis**

Measure Description	Pollutants
Existing Local Reductions: Rule 9310 (School Bus Fleets)	Annual PM2.5 Annual NOx
Existing State Reductions: Carl Moyer Program & AB 1493 GHG Standards	Annual PM2.5 Annual NOx
New/Proposed Local Reductions: Rule 9410 (Employer Based Trip Reduction)	Annual PM2.5 Annual NOx
New/Proposed State Reductions: Smog Check	Annual PM2.5 Annual NOx

NOTE: This table is consistent with the 2008 PM2.5 Plan (as revised in 2011) as approved by EPA on November 9, 2011 (effective January 9, 2012). In addition, the ARB "Truck Rule" has been included in EMFAC2011.

CHAPTER 3: AIR QUALITY MODELING

The model used to estimate vehicle exhaust emissions for carbon monoxide, ozone precursors, and particulate matter is EMFAC2011. CARB emission factors for PM-10 have been used to calculate re-entrained paved and unpaved road dust, and fugitive dust associated with road construction. For the Conformity Analysis, model inputs not dependent on the TIP or RTP are consistent with the applicable SIP, which include:

- The 2004 Revision to the California State Implementation Plan for Carbon Monoxide was approved by EPA on November 30, 2005 (effective January 30, 2006).
- The 2007 Ozone Plan (as revised in 2011) was approved by EPA on March 1, 2012 (effective April 30, 2012)
- The 2007 PM-10 Maintenance Plan, which included revisions to the attainment plan, was approved (with minor technical corrections to the conformity budgets) by EPA on November 12, 2008.
- The 2008 PM2.5 Plan (as revised in 2011) was approved by EPA on November 9, 2011 (effective January 9, 2012).

The conformity regulation requirements for the selection of the horizon years are summarized in Chapter 1; regional emissions have been estimated for the horizon years summarized in Table 1-5.

A. EMFAC2011

The EMFAC model (short for EMission FACTor) is a computer model that can estimate emission rates for motor vehicles for calendar years from 1990 to 2035 operating in California. Pollutant emissions for hydrocarbons, carbon monoxide, nitrogen oxides, particulate matter, lead, sulfur oxides, and carbon dioxide are output from the model. Emissions are calculated for passenger cars, light, heavy, and medium-duty trucks, motorcycles, urban and school buses and motor homes.

EMFAC is used to calculate current and future inventories of motor vehicle emissions at the state, county, air district, air basin, or county within air basin level. EMFAC contains default vehicle activity data that can be used to estimate a motor vehicle emission inventory in tons/day for a specific day, month, or season, and as a function of ambient temperature, relative humidity, vehicle population, mileage accrual, miles of travel and speeds.

Section 93.111 of the conformity regulation requires the use of the latest emission estimation model in the development of conformity determinations. EMFAC2011 is the latest update to the EMFAC model for use by California State and local governments to meet Clean Air Act (CAA, 1990) requirements. On March 6, 2013 EPA announced the availability of this latest version of

the California EMFAC model for use in SIP development in California. EMFAC 2011 will be required for conformity analysis begun on or after September 6, 2013. In accordance with Section 93.111 the latest emission estimation model (EMFAC 2011) will be used in the 2014 RTP Conformity Demonstration.

In addition, EPA approved the CARB EMFAC2011 methodology for the San Joaquin Valley Heavy Duty Diesel Vehicle-Vehicle Miles Traveled (VMT) Recession Adjustment January 14, 2014. The methodology explains how VMT should be updated in EMFAC2011 – SG. EPA and FHWA also provided concurrence on the *EMFAC2011 – SG Conformity Analysis and SB 375 Analysis Instructions for the San Joaquin Valley MPOs*.

A transportation data template has been prepared to summarize the transportation model output for use in EMFAC 2011. The template includes allocating VMT by speed bin by modeling period, as well as allocating VMT by vehicle classification to reflect the San Joaquin Valley Heavy Duty Diesel VMT Recession Adjustment Methodology for input into EMFAC 2011.

EMFAC was used to estimate exhaust emissions for CO, ozone, PM-10, and PM2.5 conformity demonstrations consistent with the applicable air quality plan. These estimates are further reduced by SIP measures as documented in Chapter 2.

B. ADDITIONAL PM-10 ESTIMATES

PM-10 emissions for re-entrained dust from travel on paved and unpaved roads will be calculated separately from roadway construction emissions. It is important to note that with the final approval of the 2007 PM-10 Maintenance Plan, EPA approved a methodology to calculate PM-10 emissions from paved and unpaved roads in future San Joaquin Valley conformity determinations. The Conformity Analysis uses these methodologies and estimates construction-related PM-10 emissions consistent with the 2007 PM-10 Maintenance Plan. The National Ambient Air Quality Standards for PM-10 consists of a 24-hour standard, which is represented by the motor vehicle emissions budgets established in the 2007 PM-10 Maintenance Plan. It is important to note that EPA revoked the annual PM-10 Standard on October 17, 2006. The PM-10 emissions calculated for the conformity analysis represent emissions on an annual average day and are used to satisfy the budget test.

CALCULATION OF REENTRAINED DUST FROM PAVED ROAD TRAVEL

On January 13, 2011 EPA released a new method for estimating re-entrained road dust emissions from cars, trucks, buses, and motorcycles on paved roads. On February 4, 2011, EPA published the *Official Release of the January 2011 AP-42 Method for Estimating Re-Entrained Road Dust from Paved Roads* approving the January 2011 method for use in regional emissions analysis and beginning a two year conformity grace period, after which use of the January 2011 AP-42 method is required (e.g. February 4, 2013) in regional conformity analyses.

The road dust calculations have been updated to reflect this new methodology. More specifically, the emission factor equation and k value (particle size multiplier) have been updated accordingly. CARB default assumptions for roadway silt loading by roadway class, average vehicle weight,

and rainfall correction factor remain unchanged. Emissions are estimated for five roadway classes including freeways, arterials, collectors, local roads, and rural roads. Countywide VMT information is used for each road class to prepare the emission estimates.

CALCULATION OF REENTRAINED DUST FROM UNPAVED ROAD TRAVEL

The base methodology for estimating unpaved road dust emissions is based on a CARB methodology in which the miles of unpaved road are multiplied by the assumed VMT and an emission factor. In the 2007 PM-10 Maintenance Plan, it is assumed that all non-agricultural unpaved roads within the San Joaquin Valley receive 10 vehicle passes per day. An emission factor of 2.0 lbs PM-10/VMT is used for the unpaved road dust emission estimates. Emissions are estimated for city/county maintained roads.

CALCULATION OF PM-10 FROM ROADWAY CONSTRUCTION

Section 93.122(e) of the Transportation Conformity regulation requires that PM-10 from construction-related fugitive dust be included in the regional PM-10 emissions analysis, if it is identified as a contributor to the nonattainment problem in the PM-10 implementation plan. The emission estimates are based on a CARB methodology in which the miles of new road built are converted to acres disturbed, which is then multiplied by a generic project duration (i.e., 18 months) and an emission rate. Emission factors are unchanged from the previous estimates at 0.11 tons PM-10/acre-month of activity. The emission factor includes the effects of typical control measures, such as watering, which is assumed to reduce emissions by about 50%. Updated activity data (i.e., new lane miles of roadway built) is estimated based on the highway and transit construction projects in the TIP/RTP.

PM-10 TRADING MECHANISM

The PM-10 SIP allows trading from the motor vehicle emissions budget for the PM-10 precursor NO_x to the motor vehicle emissions budget for primary PM-10 using a 1.5 to 1 ratio. The trading mechanism will be used only for conformity analyses for analysis years after 2005.

C. PM_{2.5} APPROACH

EPA and FHWA have indicated that areas violating both the annual and 24-hour standards for PM_{2.5} must address all standards in the conformity determination. The San Joaquin Valley currently violates both the 1997 and 2012 annual PM_{2.5} standards and the 2006 24-hour PM_{2.5} standards; thus the conformity determination includes all three analyses.

The following PM_{2.5} approach addresses the 1997 annual, the 2012 annual, and the 2006 24-hour standards:

EMFAC2011 incorporates data for temperature, relative humidity, and characteristics for gasoline fuel sold that vary by geographic area, calendar year, and month and season. The annual average represents an average of all the monthly inventories. As a result, EMFAC will be run to estimate direct PM_{2.5} and NO_x emissions from motor vehicles for an annual average day.

EPA guidance indicates that State and local agencies need to consider whether VMT varies during the year enough to affect PM_{2.5} annual emission estimates. The availability of seasonal or monthly VMT data and the corresponding variability of that data need to be evaluated.

PM_{2.5} areas that are currently using network based travel models must continue to use them when calculating annual emission inventories. The guidance indicates that the interagency consultation process should be used to determine the appropriate approach to produce accurate annual inventories for a given nonattainment area. Whichever approach is chosen, that approach should be used consistently throughout the analysis for a given pollutant or precursor. The interagency consultation process should also be used to determine whether significant seasonal variations in the output of network based travel models are expected and whether these variations would have a significant impact on PM_{2.5} emission estimates.

The SJV MPOs all use network based travel models. However, the models only estimate average weekday VMT. The SJV MPOs do not have the data or ability to estimate seasonal variation at this time. Data collection and analysis for some studies are in the preliminary phases and cannot be relied upon for other analyses. Some statewide data for the seasonal variation of VMT on freeways does exist. However, traffic patterns on freeways do not necessarily represent the typical traffic pattern for local streets and arterials.

In many cases, traffic counts are sponsored by the MPOs and conducted by local jurisdictions. While some local jurisdictions may collect weekend or seasonal data, typical urban traffic counts occur on weekdays (Tuesday through Thursday). Data collection must be more consistent in order to begin estimation of daily or seasonal variation.

The SJV MPOs believe that the average annual day calculated from the current traffic models and EMFAC2011 represent the most accurate VMT data available. The MPOs will continue to discuss and research options that look at how VMT varies by month and season according to the local traffic models.

It is important to note that the guidance indicates that EPA expects the most thorough analysis for developing annual inventories will occur during the development of the SIP, taking into account the needs and capabilities of air quality modeling tools and the limitations of available data. Prior to the development of the SIP, State and local air quality and transportation agencies may decide to use simplified methods for regional conformity analyses.

It is important to note that the San Joaquin Valley 2008 PM_{2.5} Plan (as revised in 2011) was approved by EPA on November 9, 2011 (effective January 9, 2012). The annual inventory methodology contained in the plan and used to establish emissions budgets is consistent with the methodology used herein. The regional emissions analyses in PM_{2.5} nonattainment areas must consider directly emitted PM_{2.5} motor vehicle emissions from tailpipe, brake wear, and tire wear. In California, areas will use EMFAC2011. As indicated under the Conformity Test Requirements, re-entrained road dust and construction-related fugitive dust from highway or

transit projects is not included at this time. In addition, NOx emissions are included; however, VOC, SOx, and ammonia emissions are not.

1997 Standard – The 2008 PM2.5 Plan contains motor vehicle emission budgets for PM2.5 and NOx established based on average annual daily emissions. The motor vehicle emissions budget for PM2.5 includes directly emitted PM2.5 motor vehicle emissions from tailpipe, brake wear and tire wear. VOC, SOx, ammonia, and dust (from paved roads, unpaved roads, and road construction) were found to be insignificant and not included in the motor vehicle emission budgets for conformity purposes.

2006 Standard – EPA published 2006 24-hour PM2.5 standard Nonattainment area designations on November 13, 2009 with an effective date of December 14, 2009. Conformity to the 2006 24-hour PM2.5 standard began to apply on December 14, 2010. In accordance with Transportation Conformity Rule PM2.5 and PM10 Amendments published on March 24, 2010 (effective April 23, 2010) for 2006 PM2.5 NAAQS Nonattainment areas, if a 2006 PM2.5 area has adequate or approved SIP budgets that address the 1997 standards, it must use the budget test to determine conformity for both of the NAAQS at the same time. It is important to note that the 2006 24-hour PM2.5 nonattainment area boundary for the San Joaquin Valley is exactly the same as the nonattainment area boundary for the 1997 annual standard.

2012 Standard – EPA's nonattainment area designations for the 2012 PM2.5 standard became effective on April 15, 2015. Conformity applies one year after the effective date (April 15, 2016). In accordance with Section 93.109(i)(3) of the federal transportation conformity rule, if a 2012 PM2.5 area has adequate or approved SIP budgets that address the annual 1997 standards, it must use the budget test until new 2012 PM2.5 standard budgets are found adequate or approved. It is important to note that the 2012 annual PM2.5 nonattainment area boundary for the San Joaquin Valley is exactly the same as the nonattainment area boundary for the 1997 and 2006 standards.

PM2.5 TRADING MECHANISM

The PM2.5 SIP (as revised in 2011) allows trading from the motor vehicle emissions budget for the PM2.5 precursor NOx to the motor vehicle emissions budget for primary PM2.5 using a 9 to 1 ratio. The trading mechanism will be used only for conformity analyses for analysis years after 2014.

D. SUMMARY OF PROCEDURES FOR REGIONAL EMISSIONS ESTIMATES

New step-by-step air quality modeling instructions were developed for SJV MPO use with EMFAC2011-SG including the San Joaquin Valley Heavy Duty Diesel VMT Recession Adjustment Methodology; approved by EPA January 14, 2014. These instructions were provided for interagency consultation in August 2013. EPA, FHWA, and ARB concurred. Documentation of the conformity analysis is provided in Appendix C, including:

- 2015 Conformity EMFAC Spreadsheet
- 2015 Conformity Paved Road Spreadsheet
- 2015 Conformity Unpaved Road Dust Spreadsheet
- 2015 Conformity Construction Spreadsheet
- 2015 Conformity Trading Spreadsheets (PM-10 and PM2.5)
- 2015 Conformity Totals Spreadsheet

CHAPTER 4: TRANSPORTATION CONTROL MEASURES

This chapter provides an update of the current status of transportation control measures identified in applicable implementation plans. Requirements of the Transportation Conformity regulation relating to transportation control measures (TCMs) are presented first, followed by a review of the applicable air quality implementation plans and TCM findings for the TIP/RTP.

A. TRANSPORTATION CONFORMITY REGULATION REQUIREMENTS FOR TCMs

The Transportation Conformity regulation requires that the TIP/RTP “must provide for the timely implementation of TCMs in the applicable implementation plan.” The Federal definition for the term “transportation control measure” is provided in 40 CFR 93.101:

“any measure that is specifically identified and committed to in the applicable implementation plan that is either one of the types listed in Section 108 of the CAA [Clean Air Act], or any other measure for the purpose of reducing emissions or concentrations of air pollutants from transportation sources by reducing vehicle use or changing traffic flow or congestion conditions. Notwithstanding the first sentence of this definition, vehicle technology based, fuel-based, and maintenance-based measures which control the emissions from vehicles under fixed traffic conditions are not TCMs for the purposes of this subpart.”

In the Transportation Conformity regulation, the definition provided for the term “applicable implementation plan” is:

“Applicable implementation plan is defined in section 302(q) of the CAA and means the portion (or portions) of the implementation plan, or most recent revision thereof, which has been approved under section 110, or promulgated under section 110(c), or promulgated or approved pursuant to regulations promulgated under section 301(d) and which implements the relevant requirements of the CAA.”

Section 108(f)(1) of the Clean Air Act as amended in 1990 lists the following transportation control measures and technology-based measures:

- (i) programs for improved public transit;
- (ii) restriction of certain roads or lanes to, or construction of such roads or lanes for use by, passenger buses or high occupancy vehicles;
- (iii) employer-based transportation management plans, including incentives;
- (iv) trip-reduction ordinances;

- (v) traffic flow improvement programs that achieve emission reductions;
- (vi) fringe and transportation corridor parking facilities serving multiple occupancy vehicle programs or transit service;
- (vii) programs to limit or restrict vehicle use in downtown areas or other areas of emission concentration particularly during periods of peak use;
- (viii) programs for the provision of all forms of high-occupancy, shared-ride services;
- (ix) programs to limit portions of road surfaces or certain sections of the metropolitan area to the use of non-motorized vehicles or pedestrian use, both as to time and place;
- (x) programs for secure bicycle storage facilities and other facilities, including bicycle lanes, for the convenience and protection of bicyclists, in both public and private areas;
- (xi) programs to control extended idling of vehicles;
- (xii) programs to reduce motor vehicle emissions, consistent with title II, which are caused by extreme cold start conditions;
- (xiii) employer-sponsored programs to permit flexible work schedules;
- (xiv) programs and ordinances to facilitate non-automobile travel, provision and utilization of mass transit, and to generally reduce the need for single occupant vehicle travel, as part of transportation planning and development efforts of a locality, including programs and ordinances applicable to new shopping centers, special events, and other centers of vehicle activity;
- (xv) programs for new construction and major reconstructions of paths, tracks or areas solely for the use by pedestrian or other non-motorized means of transportation when economically feasible and in the public interest. For purposes of this clause, the Administrator shall also consult with the Secretary of the Interior; and
- (xvi) program to encourage the voluntary removal from use and the marketplace of pre-1980 model year light duty vehicles and pre-1980 model light duty trucks.

TCM REQUIREMENTS FOR A TRANSPORTATION PLAN

The EPA regulations in 40 CFR 93.113(b) indicate that transportation control measure requirements for transportation plans are satisfied if two criteria are met:

“(1) The transportation plan, in describing the envisioned future transportation system, provides for the timely completion or implementation of all TCMs in the applicable implementation plan which are eligible for funding under Title 23 U.S.C. or the Federal Transit Laws, consistent with schedules included in the applicable implementation plan.

(2) Nothing in the transportation plan interferes with the implementation of any TCM in the applicable implementation plan.”

TCM REQUIREMENTS FOR A TRANSPORTATION IMPROVEMENT PROGRAM

Similarly, in 40 CFR Section 93.113(c), EPA specifies three TCM criteria applicable to a transportation improvement program:

“(1) An examination of the specific steps and funding source(s) needed to fully implement each TCM indicates that TCMs which are eligible for funding under title 23 U.S.C. or the Federal Transit Laws are on or ahead of the schedule established in the applicable implementation plan, or, if such TCMs are behind the schedule established in the applicable implementation plan, the MPO and DOT have determined that past obstacles to implementation of the TCMs have been identified and have been or are being overcome, and that all State and local agencies with influence over approvals or funding for TCMs are giving maximum priority to approval or funding of TCMs over other projects within their control, including projects in locations outside the nonattainment or maintenance area;

(2) If TCMs in the applicable implementation plan have previously been programmed for Federal funding but the funds have not been obligated and the TCMs are behind the schedule in the implementation plan, then the TIP cannot be found to conform:

- if the funds intended for those TCMs are reallocated to projects in the TIP other than TCMs, or
- if there are no other TCMs in the TIP, if the funds are reallocated to projects in the TIP other than projects which are eligible for Federal funding intended for air quality improvement projects, e.g., the Congestion Mitigation and Air Quality Improvement Program;

(3) Nothing in the TIP may interfere with the implementation of any TCM in the applicable implementation plan.”

B. APPLICABLE AIR QUALITY IMPLEMENTATION PLANS

Only transportation control measures from applicable implementation plans for the San Joaquin Valley region are required to be updated for this analysis. For the Conformity Analysis, the applicable implementation plans, according to the definition provided at the start of this chapter, are summarized below.

APPLICABLE IMPLEMENTATION PLAN FOR CARBON MONOXIDE

The 2004 Revision to the California State Implementation Plan for Carbon Monoxide was approved by EPA on November 30, 2005 (effective January 30, 2006). However, the Plan does not include TCMs for the San Joaquin Valley.

APPLICABLE IMPLEMENTATION PLAN FOR OZONE

The 2007 Ozone Plan (as revised in 2011) was approved by EPA on March 1, 2012 (effective April 30, 2012). However, the Plan does not include TCMs for the San Joaquin Valley.

APPLICABLE IMPLEMENTATION PLAN FOR PM-10

The 2007 PM-10 Maintenance Plan was approved by EPA on November 12, 2008. No new local agency control measures were included in the Plan.

The Amended 2003 PM-10 Plan was approved by EPA on May 26, 2004 (effective June 25, 2004). A local government control measure assessment was completed for this plan. The analysis focused on transportation-related fugitive dust emissions, which are not TCMs by definition. The local government commitments are included in the *Regional Transportation Planning Agency Commitments for Implementation Document, April 2003*.

However, the *Amended 2002 and 2005 Ozone Rate of Progress Plan* contains commitments that reduce ozone related emissions; these measures are documented in the *Regional Transportation Planning Agency Commitments for Implementation Document, April 2002*. These commitments are included by reference in the Amended 2003 PM-10 Plan to provide emission reductions for precursor gases and help to address the secondary particulate problem. Since these commitments are included in the Plan by reference, the commitments were approved by EPA as TCMs.

APPLICABLE IMPLEMENTATION PLAN FOR PM2.5

The 2008 PM2.5 Plan (as revised in 2011) was approved by EPA on November 9, 2011 (effective January 9, 2012). However, the Plan does not include TCMs for the San Joaquin Valley.

C. IDENTIFICATION OF 2002 RACM THAT REQUIRE TIMELY IMPLEMENTATION DOCUMENTATION

As part of the 2004 Conformity Determination, FHWA requested that each SIP (Reasonably Available Control Measure - RACM) commitment containing Federal transportation funding and a transportation project and schedule be addressed more specifically. FHWA verbally requested documentation that the funds were obligated and the project was implemented as committed to in the SIP.

The RTPA Commitment Documents, Volumes One and Two, dated April 2002 (Ozone RACM) were reviewed, using a “Summary of Commitments” table. Commitments that contain specific Federal funding/transportation projects/schedules were identified for further documentation. In some cases, local jurisdictions used the same Federal funding/transportation projects/schedules for various measures; these were identified as combined with (“comb w/”) reference as appropriate. A not applicable (“NA”) was noted where federally-funded project is vehicle technology based, fuel based, and maintenance based measures (e.g., LEV program, retrofit programs, clean fuels - CNG buses, etc.).

In addition, the RTPA Commitment Document, Volume Three, dated April 2003 (PM-10 BACM) was reviewed, using the Summary of Commitments table. Commitments that contain specific Congestion Mitigation and Air Quality (CMAQ) funding for the purchase and/or operation of street sweeping equipment have been identified. Only one commitment (Fresno - City of Reedley) was identified.

The Project TID Table was developed to provide implementation documentation necessary for the measures identified. Detailed information is summarized in the first five columns, including the commitment number, agency, description, funding and schedule (if applicable).

For each project listed, the TIP in which the project was programmed, as well as the project ID and description have been provided. In addition, the current implementation status of the project has been included (e.g., complete, under construction, etc). MPO staff determined this information in consultation with the appropriate local jurisdiction. Any projects not implemented according to schedule or project changes are explained in the project status column. These explanations are consistent with the guidance and regulations provided in the Transportation Conformity regulation.

Supplemental documentation was provided to FHWA in August and September 2004 in response to requests for information on timely implementation of TCMs in the San Joaquin Valley. The supplemental documentation included the approach, summary of interagency consultation correspondence, and three tables completed by each of the eight MPOs. The Supplemental Documentation was subsequently approved by FHWA as part of the 2004 Conformity Determination.

The Project TID table that was prepared at the request of FHWA for the 2004 Conformity Analysis, has been updated in each subsequent conformity analysis including the 2015 FTIP and 2014 RTP as amended. This documentation has been updated as part of this Conformity Analysis. A summary of this information is provided in Appendix D.

In March 2005, the SJV MPOs began interagency consultation with FHWA and EPA to address outstanding RACM/TCM issues. In general, criteria were developed to identify commitments that require timely implementation documentation. The criteria were applied to the 2002 RACM Commitments approved by reference as part of the Amended 2003 PM-10 Plan. In April 2006, EPA transmitted final tables that identified the approved RACM commitments that require timely implementation documentation for the Conformity Analysis. Subsequently, an approach to provide timely implementation documentation was developed in consultation with FHWA.

A new 2002 RACM TID Table was prepared in 2006 to address the more general RACM commitments that require additional timely implementation documentation per EPA. A brief summary of the commitment, including finite end dates if applicable, is included for each measure. The MPOs provided a status update regarding implementation in consultation with their member jurisdictions. If a specific project has been implemented, it is included in the Project TID Table under “Additional Projects Identified”. This documentation was included in the Conformity Analysis for the 2007 TIP and 2004 RTP (as amended) that was approved by FHWA in October 2006 as well as the 2013 TIP and 2011 RTP as amended. The 2002 RACM TID Table has been updated as part of this Conformity Analysis. A summary of this information is provided in Appendix D.

D. TCM FINDINGS FOR THE TIP AND REGIONAL TRANSPORTATION PLAN

Based on a review of the transportation control measures contained in the applicable air quality plans, as documented in the two tables contained in Appendix D, the required TCM conformity findings are made below:

The TIP/RTP provide for the timely completion or implementation of the TCMs in the applicable air quality plans. In addition, nothing in the TIP or RTP interferes with the implementation of any TCM in the applicable implementation plan, and priority is given to TCMs.

E. RTP CONTROL MEASURE ANALYSIS IN SUPPORT OF 2003 PM-10 PLAN

In May 2003, the San Joaquin Valley MPO Executive Directors committed to conduct feasibility analyses as part of each new RTP in support of the 2003 PM-10 Plan. This commitment was retained in the 2007 PM-10 Maintenance Plan. In accordance with this commitment, FRESNO COUNCIL OF GOVERNMENTS undertook a process to identify and evaluate potential control measures that could be included in the 2014 RTP. The analysis of additional measures included verification of the feasibility of the measures in the PM-10 Plan BACM analysis, as well as an analysis of new PM-10 commitments from other PM-10 nonattainment areas.

A summary of the process to identify potential long-range control measures analysis and results to be evaluated as part of the RTP development was transmitted to the Interagency Consultation (IAC) partners for review. FHWA and EPA concurred with the summary of the long-range control measure approach in September 2009.

The Local Government Control Measures considered in the PM-10 Plan BACM analysis that were considered for inclusion in the 2014 RTP included:

- Paving or Stabilizing Unpaved Roads and Alleys
- Curbing, Paving, or Stabilizing Shoulders on Paved Roads
- Frequent Routine Sweeping or Cleaning of Paved Roads (i.e., funding allocation for the purchase of PM-10 efficient street sweepers for member jurisdictions)

- Repave or Overlay Paved Roads with Rubberized Asphalt

It is important to note that the first three measures considered in the PM-10 Plan BACM analysis (i.e., access points, street cleaning requirements, and erosion clean up) are not applicable for inclusion in the RTP.

With the adoption of each new RTP, the MPOs will consider the feasibility of these measures, as well as identify any other new PM-10 measures that would be relevant to the San Joaquin Valley. FRESNO COUNCIL OF GOVERNMENTS also considered PM-10 commitments from other PM-10 nonattainment areas that had been developed since the previous RTP was approved. Federal websites were reviewed for any PM-10 plans that have been adopted since 2009. New PM-10 plans that have been reviewed include:

- a. Puerto Rico, Municipality of Guaynabo, PM-10 Limited Maintenance Plan, submitted March 2009 (EPA adequacy issued 8/25/09). On-road fugitive dust controls include paving, street sweeping and stabilization controls.
- b. Nogales, AZ PM-10 Attainment Demonstration, EPA approval notice signed 8/24/12. On-road fugitive dust controls include paving projects and capital improvement projects @ the Ports of Entry.
- c. Coso Junction, CA PM-10 Maintenance Plan, dated May 17, 2010 (EPA adequacy issued 9/3/10). No transportation control measures; transportation projects "exempt".
- d. Sacramento, CA PM-10 Implementation / Maintenance Plan, dated October 28, 2010. No new control measures included; no existing on-road controls either.
- e. Truckee Meadows, NV PM-10 Maintenance Plan, adopted May 2009 (EPA adequacy issued 6/2/10). On-road fugitive dust controls include sweeping and sanding; contingency measures have already been considered in SJV analysis.
- f. Eagle River, AK PM-10 Maintenance Plan, adopted August 2010 (EPA adequacy issued 5/14/12). On-road fugitive dust controls includes paving, winter traction sand; contingency measures include sweeping.

Based on review of commitments from other PM-10 nonattainment areas that have been developed since the previous RTP, no additional on-road fugitive dust controls measures are available for consideration.

Based on consultation with CARB and the Air District, FRESNO COUNCIL OF GOVERNMENTS considered priority funding allocations in the 2014 RTPs for PM-10 and NO_x emission reduction projects in the post-attainment year timeframe that go beyond the emission reduction commitments made for the attainment year 2010 for the following four measures:

- (1) Paving or Stabilizing Unpaved Roads and Alleys
- (2) Curbing, Paving, or Stabilizing Shoulders on Paved Roads
- (3) Frequent Routine Sweeping or Cleaning of Paved Roads (i.e., funding allocation for the purchase of PM-10 efficient street sweepers for member jurisdictions); and
- (4) Repave or Overlay Paved Roads with Rubberized Asphalt

Fresno COG continues to actively include the reduction of PM10 emissions (typical projects above list #1 through #3) in the Congestion Mitigation and Air Quality (CMAQ) Improvement Program. PM10 is included in the “Project Category Goals”. PM10 is evaluated and prioritized in the CMAQ Scoring Criteria under the “Air Pollutant Emission Reduction” Category (20 points possible out of 100) as well as receiving consideration in the “Subjective Evaluation” (20 points possible out of 100). PM10 projects also are given priority if they meet the criteria of being cost-effective (30 points out of 100) Information regarding Fresno COG’s CMAQ Program can be found at: <http://www.fresnocog.org/>.

Fresno COG has explored the feasibility of incorporating the use of rubberized asphalt in repave or overlay projects. Currently, California Department of Transportation (Caltrans) incorporates rubberized asphalt as general policy to meet recycled content requirements on high volume state highway facilities. Caltrans is required by AB 338 (Levine) to incrementally phase in increased use of rubberized-asphalt concrete (RAC) not less than 25% by ton after January 1, 2010 and not less than 35% by ton after January 1, 2013. Caltrans (District 6) found that rubberized asphalt is problematic when used where traffic stops and starts (i.e., signalized local streets). The material has been found to break down prematurely and tends to “shove and tear” in stop-and-go traffic applications. Rubberized asphalt has been found to have useful application for noise reduction purposes. There is work currently in process to develop commercial viability of low-greenhouse gas Portland Cement Concrete which may be preferable to rubberized asphalt for greenhouse gas reduction.

The application of rubberized asphalt technology can reduce tire wear dust (PM10). The cost effectiveness for roads with annual daily traffic of 2,500 vehicles per lane mile per day is estimated at \$4,290,000 per ton. (*Analysis of Particulate Control Measures Effectiveness Interim Report #2, Sierra Research, February 15, 2007; Maricopa, Arizona, Association of Governments*). The limitations imposed by the high cost and limited applicability to free flowing high volume highway use prove to make this of limited application on local streets in the Fresno region.

Rubberized asphalt is incorporated in transportation projects where it is feasible. Fresno COG will continue to explore the feasibility of new technology in the reduction of transportation sources of air pollutant emissions.

CHAPTER 5: INTERAGENCY CONSULTATION

The requirements for consultation procedures are listed in the Transportation Conformity Regulations under section 93.105. Consultation is necessary to ensure communication and coordination among air and transportation agencies at the local, State and Federal levels on issues that would affect the conformity analysis such as the underlying assumptions and methodologies used to prepare the analysis. Section 93.105 of the conformity regulation notes that there is a requirement to develop a conformity SIP that includes procedures for interagency consultation, resolution of conflicts, and public consultation as described in paragraphs (a) through (e). Section 93.105(a)(2) states that prior to EPA approval of the conformity SIP, “MPOs and State departments of transportation must provide reasonable opportunity for consultation with State air agencies, local air quality and transportation agencies, DOT and EPA, including consultation on the issues described in paragraph (c)(1) of this section, before making conformity determinations.” The Air District adopted Rule 9120 Transportation Conformity on January 19, 1995 in response to requirements in Section 176(c)(4)(c) of the Clean Air Act as amended in 1990. Since EPA has not approved Rule 9120 (the conformity SIP), the conformity regulation requires compliance with 40 CFR 93.105 (a)(2) and (e) and 23 CFR 450.

Section 93.112 of the conformity regulation requires documentation of the interagency and public consultation requirements according to Section 93.105. A summary of the interagency consultation and public consultation conducted to comply with these requirements is provided below. Appendix E includes the public meeting process documentation. The responses to comments received as part of the public comment process are included in Appendix F.

A. INTERAGENCY CONSULTATION

Consultation is generally conducted through the San Joaquin Valley Interagency Consultation Group (combination of previous Model Coordinating Committee and Programming Coordinating Group). The San Joaquin Valley Interagency Consultation (IAC) Group has been established by the Valley Transportation Planning Agency's Director's Association to provide a coordinated approach to valley transportation planning and programming (Transportation Improvement Program, Regional Transportation Plan, and Amendments), transportation conformity, climate change, and air quality (State Implementation Plan and Rules). The purpose of the group is to ensure Valley wide coordination, communication and compliance with Federal and California Transportation Planning and Clean Air Act requirements. Each of the eight Valley MPOs and the Air District are represented. In addition, the Federal Highway Administration, Federal Transit Administration, the Environmental Protection Agency, the California Air Resources Board and Caltrans (Headquarters, District 6, and District 10) are all represented. The IAC Group meets approximately quarterly.

On July 15, 2015, a memo describing the approach for the 2015 Conformity Demonstration addressing the 2008 Ozone and 2012 PM_{2.5} standards was distributed to the IAC for review and

comment. This memo included as summary of the requirements and documentation on the proposed approach including the following: latest planning assumptions and transportation modeling, air quality modeling, transportation control measures, and conformity documentation. No comments were received; concurrence was received from EPA and FHWA on July 22, 2015.

The boilerplate conformity document was distributed for interagency consultation in August 2015. Comments received have been addressed in the response to comments contained in Appendix G and/or in this document as appropriate.

Interagency consultation also included the local transportation providers in the MPO region. Fresno COG has a Memorandum of Understanding (MOU) with Fresno Area Express (FAX), Fresno County Rural Transit Agency (FCRTA) and Clovis Stageline Transit Services (Clovis Transit) regarding transit planning in Fresno County. The 2015 FTIP Amendment #8 and 2014 RTP Amendment #1 were developed in consultation with these transit agencies, as well as the 15 incorporated cities and the County of Fresno. The Fresno Council of Governments worked with these providers through the Fresno COG Transportation Technical Committee, the Policy Advisory Committee and the Fresno COG Policy Board to develop and approve the FTIP/RTP, and the corresponding conformity analysis. In addition to the cities and the county, many of these committees include representatives from Caltrans District 6. The draft 2015 FTIP Amendment #8 and the draft 2014 RTP Amendment #1 were included as agenda items for the monthly committee meetings in September 2015. In addition Fresno COG publishes two electronic newsletters: the monthly “COG Board Actions Newsletter” and the weekly “Coming Up...At Fresno COG” which are widely distributed to all interested individuals and stakeholders.

The draft 2015 FTIP Amendment #8, draft 2014 RTP Amendment #1 and the corresponding Conformity Analysis was released on August 18, 2015 for a 30-day public comment period, followed by Board adoption in October 2015. Federal approval of the 2 is anticipated in December 2015.

B. PUBLIC CONSULTATION

In general, agencies making conformity determinations shall establish a proactive public involvement process that provides opportunity for public review and comment on a conformity determination for FTIPs/RTPs. In addition, all public comments must be addressed in writing.

All MPOs in the San Joaquin Valley have standard public involvement procedures. The Fresno COG adopted consultation process and policy for conformity analysis includes a 30-day comment period followed by a public hearing. A public hearing is also conducted prior to adoption and all public comments are responded to in writing. The Appendices contain corresponding documentation supporting the public involvement procedures.

CHAPTER 6: TIP AND RTP CONFORMITY

The principal requirements of the transportation conformity regulation for TIP/RTP assessments are: (1) the TIP and RTP must pass an emissions budget test with a budget that has been found to be adequate by EPA for transportation conformity purposes, or an interim emission test; (2) the latest planning assumptions and emission models must be employed; (3) the TIP and RTP must provide for the timely implementation of transportation control measures (TCMs) specified in the applicable air quality implementation plans; and (4) consultation. The final determination of conformity for the TIP/RTP is the responsibility of the Federal Highway Administration and the Federal Transit Administration.

The previous chapters and the appendices present the documentation for all of the requirements listed above for conformity determinations except for the conformity test results. Prior chapters have also addressed the updated documentation required under the transportation conformity regulation for the latest planning assumptions and the implementation of transportation control measures specified in the applicable air quality implementation plans.

This chapter presents the results of the conformity tests, satisfying the remaining requirement of the transportation conformity regulation. Separate tests were conducted for carbon monoxide (CO), 8-hour ozone (ROG and NO_x), PM-10 and PM2.5. The applicable conformity tests were reviewed in Chapter 1. For each test, the required emissions estimates were developed using the transportation and emission modeling approaches required under the transportation conformity regulation and summarized in Chapters 2 and 3. The results are summarized below, followed by a more detailed discussion of the findings for each pollutant. Table 6-1 presents results for CO, ozone (ROG/NO_x), PM-10 (PM-10/NO_x), and PM2.5 (PM2.5/NO_x) respectively, in tons per day for each of the horizon years tested.

For carbon monoxide, the applicable conformity test is the emissions budget test, using the budgets established in the 2004 Revision to the California State Implementation Plan for Carbon Monoxide. The carbon monoxide budgets were approved by EPA for conformity purposes, effective January 30, 2006. The modeling results indicated that the on-road vehicle CO emissions predicted for the “Build” scenario for 2017 are less than the 2010 emissions budgets and 2018, 2025, 2035 and 2040 are less than the 2018 emissions budget. The TIP/RTP therefore satisfy the conformity emissions test for carbon monoxide.

For ozone, the applicable conformity test is the emissions budget test, using the 2007 Ozone Plan (as revised in 2011) budgets established for ROG and NO_x for an average summer (ozone) season day. EPA approved the Plan and conformity budgets (as revised in 2011) on March 1, 2012, effective April 30, 2012. The modeling results for all analysis years indicate that the on-road vehicle ROG and NO_x emissions predicted for each of the “Build” scenarios are less than the emissions budgets. The TIP/RTP therefore satisfy the conformity emissions test for volatile organic compounds and nitrogen oxides.

For PM-10, the applicable conformity test is the emissions budget test, using the 2007 PM-10 Maintenance Plan budgets for PM-10 and NOx. This Plan was approved (with minor technical corrections to the conformity budgets) by EPA on November 12, 2008. The modeling results for all analysis years indicate that the PM-10 emissions predicted for the “Build” scenarios are less than the emissions budget for 2020. The TIP/RTP therefore satisfy the conformity emissions tests for PM-10.

1997 Standards: For 1997 PM2.5 Standards, the applicable conformity test is the emission budget test, using budgets established in the 2008 PM2.5 Plan. EPA approved the 2008 PM2.5 Plan (as revised in 2011) November 9, 2011 (effective January 9, 2012). The modeling results for all analysis years indicate that the on-road vehicle PM2.5 and NOx emissions predicted for the “Build” scenarios are less than the emissions budget. The TIP/RTP therefore satisfy the conformity emissions test for PM2.5 and nitrogen oxides.

2006 Standard: In accordance with Transportation Conformity Rule PM2.5 and PM10 Amendments published on March 24, 2010 (effective April 23, 2010) for 2006 PM2.5 NAAQS Nonattainment areas, if a 2006 PM2.5 area has adequate or approved SIP budgets that address the 1997 standards, it must use the budget test. For the 2006 PM2.5 standards, the applicable conformity test is the emission budget test, using budgets established in the 2008 PM2.5 Plan (as revised in 2011). EPA approved the 2008 PM2.5 Plan (as revised in 2011) November 9, 2011 (effective January 9, 2012). The modeling results for all analysis years indicate that the on-road vehicle PM2.5 and NOx emissions predicted for the “Build” scenarios are less than the emissions budget. The TIP/RTP therefore satisfy the conformity emissions test for PM2.5 and nitrogen oxides.

2012 Standard: In accordance with Section 93.109(i)(3), areas designated nonattainment for the 2012 PM2.5 standards are required to use existing adequate or approved SIP motor vehicle emissions budgets for a prior annual PM2.5 standard until budgets for the 2012 PM2.5 standards are either found adequate or approved. For the 2012 PM2.5 standards, the applicable conformity test is the emissions budget test, using the 2008 PM2.5 Plan (1997 standard) budgets. EPA approved the 2008 PM2.5 Plan (as revised in 2011) November 9, 2011, effective January 9, 2012. The modeling results for all analysis years indicate that the on-road vehicle PM2.5 and NOx emissions predicted for the “Build” scenarios are less than the emissions budget. The TIP/RTP therefore satisfy the conformity emissions test for PM2.5 and nitrogen oxides.

As all requirements of the Transportation Conformity regulation have been satisfied, a finding of conformity for the Draft 2015 Conformity Analysis addressing 2008 Ozone and 2012 PM2.5 Standards for the 2015 FTIP Amendment #8 and the 2014 RTP Amendment #1 is supported.

**Table 6-1:
Conformity Results Summary**

2015 Conformity Results Summary -- FRESNO

Pollutant	Scenario	Emissions Total	DID YOU PASS?
Carbon Monoxide		CO (tons/day)	CO
	2010 Budget	240	
	2017	65	YES
	2018 Budget	240	
	2018	62	YES
	2025	44	YES
	2035	40	YES
	2040	42	YES

APPENDIX A
CONFORMITY CHECKLIST

CONFORMITY ANALYSIS DOCUMENTATION

FHWA Checklist for MPO TIPs/RTPs

June 27, 2005

40 CFR	Criteria	Page	Comments
§93.102	Document the applicable pollutants and precursors for which EPA designates the area as nonattainment or maintenance. Describe the nonattainment or maintenance area and its boundaries.	Ch. 1 p.8	
§93.104 (b, c)	Document the date that the MPO officially adopted, accepted or approved the TIP/RTP and made a conformity determination. Include a copy of the MPO resolution. Include the date of the last prior conformity finding.	E.S. p.1	
§93.104 (e)	If the conformity determination is being made to meet the timelines included in this section, document when the new motor vehicle emissions budget was approved or found adequate.	N/A	
§93.106 (a)(2)ii	Describe the regionally significant additions or modifications to the existing transportation network that are expected to be open to traffic in each analysis year. Document that the design concept and scope of projects allows adequate model representation to determine intersections with regionally significant facilities, route options, travel times, transit ridership and land use.	Ch. 2, p.26 App. B	
§93.108	Document that the TIP/RTP is financially constrained (23 CFR 450).	E.S. p.1	
§93.109 (a, b)	Document that the TIP/RTP complies with any applicable conformity requirements of air quality implementation plans (SIPs) and court orders.	Ch. 1, 2, 3, 4, 5, 6	
§93.109 (c-k)	Provide either a table or text description that details, for each pollutant and precursor, whether the interim emissions tests and/or the budget test apply for conformity. Indicate which emissions budgets have been found adequate by EPA, and which budgets are currently applicable for what analysis years.	Ch. 1 p.7	
§93.110 (a, b)	Document the use of latest planning assumptions (source and year) at the "time the conformity analysis begins," including current and future population, employment, travel and congestion. Document the use of the most recent available vehicle registration data. Document the date upon which the conformity analysis was begun.	Ch. 2 p.18	

40 CFR	Criteria	Page	Comments
USDOT/EP A guidance	Document the use of planning assumptions less than five years old. If unable, include written justification for the use of older data. (1/18/02)	Ch. 2 p.19	
§93.110 (c,d,e,f)	Document any changes in transit operating policies and assumed ridership levels since the previous conformity determination. Document the use of the latest transit fares and road and bridge tolls. Document the use of the latest information on the effectiveness of TCMs and other SIP measures that have been implemented. Document the key assumptions and show that they were agreed to through Interagency and public consultation.	Ch. 2 p.25	
§93.111	Document the use of the latest emissions model approved by EPA.	Ch. 3 p.31	
§93.112	Document fulfillment of the interagency and public consultation requirements outlined in a specific implementation plan according to §51.390 or, if a SIP revision has not been completed, according to §93.105 and 23 CFR 450. Include documentation of consultation on conformity tests and methodologies as well as responses to written comments.	Ch. 5 p.44	
§93.113	Document timely implementation of all TCMs in approved SIPs. Document that implementation is consistent with schedules in the applicable SIP and document whether anything interferes with timely implementation. Document any delayed TCMs in the applicable SIP and describe the measures being taken to overcome obstacles to implementation.	Ch. 4, p.39 App. D	
§93.114	Document that the conformity analyses performed for the TIP is consistent with the analysis performed for the Plan, in accordance with 23 CFR 450.324(f)(2).	Analysis addresses both documents	
§93.118 (a, c, e) ⁱ	<u>For areas with SIP budgets:</u> Document that emissions from the transportation network for each applicable pollutant and precursor, including projects in any associated donut area that are in the Statewide TIP and regionally significant non-Federal projects, are consistent with any adequate or approved motor vehicle emissions budget for all pollutants and precursors in applicable SIPs.	Ch. 6 p.47	
§93.118 (b)	Document for which years consistency with motor vehicle emissions budgets must be shown.	Ch. 1 p.15	
§93.118 (d)	Document the use of the appropriate analysis years in the regional emissions analysis for areas with SIP budgets, and the analysis results for these years. Document any interpolation performed to meet tests for years in which specific analysis is not required.	Ch. 6 p.47	
§93.119 ¹	<u>For areas without applicable SIP budgets:</u> Document that emissions from the transportation network for each applicable pollutant and precursor, including projects in any associated donut area that are in the Statewide TIP and regionally significant non-Federal projects, are consistent with the requirements of the “Action/Baseline”, “Action/1990” and/or “Action/2002” interim emissions tests as applicable.	N/A	

40 CFR	Criteria	Page	Comments
§93.119 (g)	Document the use of the appropriate analysis years in the regional emissions analysis for areas without applicable SIP budgets.	N/A	
§93.119 (h,i)	Document how the baseline and action scenarios are defined for each analysis year.	N/A	
§93.122 (a)(1)	Document that all regionally significant federal and non-Federal projects in the nonattainment/maintenance area are explicitly modeled in the regional emissions analysis. For each project, identify by which analysis it will be open to traffic. Document that VMT for non-regionally significant Federal projects is accounted for in the regional emissions analysis	Ch. 2, p. 22 App B	
§93.122 (a)(2, 3)	Document that only emission reduction credits from TCMs on schedule have been included, or that partial credit has been taken for partially implemented TCMs. Document that the regional emissions analysis only includes emissions credit for projects, programs, or activities that require regulatory action if: the regulatory action has been adopted; the project, program, activity or a written commitment is included in the SIP; EPA has approved an opt-in to the program, EPA has promulgated the program, or the Clean Air Act requires the program (indicate applicable date). Discuss the implementation status of these programs and the associated emissions credit for each analysis year.	Ch. 2 p.27	
§93.122 (a)(4,5,6)	For nonregulatory measures that are not included in the STIP, include written commitments from appropriate agencies. Document that assumptions for measures outside the transportation system (e.g. fuels measures) are the same for baseline and action scenarios. Document that factors such as ambient temperature are consistent with those used in the SIP unless modified through interagency consultation.	N/A	
§93.122 (b)(1)(i) ⁱⁱ	Document that a network-based travel model is in use that is validated against observed counts for a base year no more than 10 years before the date of the conformity determination. Document that the model results have been analyzed for reasonableness and compared to historical trends and explain any significant differences between past trends and forecasts (for per capita vehicle-trips, VMT, trip lengths mode shares, time of day, etc.).	Ch. 2 p. 19,26	
§93.122 (b)(1)(ii) ²	Document the land use, population, employment, and other network-based travel model assumptions.	Ch. 2 p.19	
§93.122 (b)(1)(iii) ²	Document how land use development scenarios are consistent with future transportation system alternatives, and the reasonable distribution of employment and residences for each alternative.	Ch. 2 p.20	
§93.122 (b)(1)(iv) ²	Document use of capacity sensitive assignment methodology and emissions estimates based on a methodology that differentiates between peak and off-peak volumes and speeds, and bases speeds on final assigned volumes.	Ch. 2 p.22,23	

40 CFR	Criteria	Page	Comments
§93.122 (b)(1)(v) ²	Document the use of zone-to-zone travel impedances to distribute trips in reasonable agreement with the travel times estimated from final assigned traffic volumes. Where transit is a significant factor, document that zone-to-zone travel impedances used to distribute trips are used to model mode split.	Ch. 2 p.22	
§93.122 (b)(1)(vi) ²	Document how travel models are reasonably sensitive to changes in time, cost, and other factors affecting travel choices.	Ch. 2 p.23	
§93.122 (b)(2) ²	Document that reasonable methods were used to estimate traffic speeds and delays in a manner sensitive to the estimated volume of travel on each roadway segment represented in the travel model.	Ch. 2 p.24	
§93.122 (b)(3) ²	Document the use of HPMS, or a locally developed count-based program or procedures that have been chosen through the consultation process, to reconcile and calibrate the network-based travel model estimates of VMT.	Ch. 2 p.27	
§93.122 (d)	In areas not subject to §93.122(b), document the continued use of modeling techniques or the use of appropriate alternative techniques to estimate vehicle miles traveled	N/A	
§93.122 (e, f)	Document, in areas where a SIP identifies construction-related PM10 or PM2.5 as significant pollutants, the inclusion of PM10 and/or PM2.5 construction emissions in the conformity analysis.	Ch. 3 p.32 App. C	
§93.122 (g)	If appropriate, document that the conformity determination relies on a previous regional emissions analysis and is consistent with that analysis.	N/A	
§93.126, §93.127, §93.128	Document all projects in the TIP/RTP that are exempt from conformity requirements or exempt from the regional emissions analysis. Indicate the reason for the exemption (Table 2, Table 3, traffic signal synchronization) and that the interagency consultation process found these projects to have no potentially adverse emissions impacts.	Ch. 2 p.26 App B	

ⁱ Note that some areas are required to complete both interim emissions tests.

ⁱⁱ 40 CFR 93.122(b) refers only to serious, severe and extreme ozone areas and serious CO areas above 200,000 population

Disclaimers

This checklist is intended solely as an informational guideline to be used in reviewing Transportation Plans and Transportation Improvement Programs for adequacy of their conformity documentation. It is in no way intended to replace or supersede the Transportation Conformity regulations of 40 CFR Parts 51 and 93, the Statewide and Metropolitan Planning Regulations of 23 CFR Part 450 or any other EPA, FHWA or FTA guidance pertaining to transportation conformity or statewide and metropolitan planning. This checklist is not intended for use in documenting transportation conformity for individual transportation projects in nonattainment or maintenance areas. 40 CFR Parts 51 and 93 contain additional criteria for project-level conformity determinations. **Document #46711**

APPENDIX B
TRANSPORTATION PROJECT LISTING

EPA Air Quality Screening Criteria

- 1.01 Railroad/Highway Crossing
- 1.02 Hazard Elimination Program
- 1.03 Safer non Federal-aid system roads
- 1.04 Shoulder improvements
- 1.05 Increasing sight distance
- 1.06 Safety Improvement Program
- 1.07 Traffic control devices and operating assistance other than signalization projects
- 1.08 Railroad/highway crossing warning devices
- 1.09 Guardrail, median barriers, crash cushions
- 1.10 Pavement resurfacing and/or rehabilitation
- 1.11 Pavement marking demonstration
- 1.12 Emergency Relief (23 U.S.C. 125)
- 1.13 Fencing
- 1.14 Skid treatments
- 1.15 Safety roadside rest areas
- 1.16 Adding medians
- 1.17 Truck climbing lanes outside the urbanized area
- 1.18 Lighting improvements
- 1.19 Widening narrow pavements or reconstructing bridges (no additional travel lanes)
- 1.20 Emergency truck pullovers
- 2.01 Operating assistance to transit agencies
- 2.02 Purchase of support vehicles
- 2.03 Rehabilitation of transit vehicles
- 2.04 Purchase of office, shop, and operating equipment for existing facilities
- 2.05 Purchase of operating equipment for vehicles (e.g. radios, fireboxes, lifts, etc.)
- 2.06 Construction or renovation of power, signal, and communications systems
- 2.07 Construction of small passenger shelters and information kiosks
- 2.08 Reconstruction or renovation of transit buildings and structures
- 2.09 Rehabilitation or reconstruction of track structures, track, and track bed in existing right-of-way
- 2.10 Purchase of new buses and rail cars to replace existing vehicles or for minor expansions of fleet
- 2.11 Construction of new bus, rail storage/maintenance facilities categorically excluded (23 CFR 771)
- 3.01 Continuation of ride-sharing and van-pooling promotion activities at current levels
- 3.02 Bicycle and pedestrian facilities
- 4.01 Specific activities which do not involve or lead directly to construction
- 4.05 Engineering to assess social, economic, and environmental effects of the proposed action or alternatives to that action
- 4.06 Noise attenuation
- 4.07 Emergency or hardship advance land acquisitions [23 CFR 712.204(d)].
- 4.08 Acquisition of scenic easements
- 4.09 Plantings, landscape, etc.
- 4.10 Sign removal
- 4.11 Directional and informational signs
- 4.12 Transportation enhancement activities (excepting rehabilitation and operation of historic buildings, structures, or facilities).
- 4.13 Repair of damage caused by natural disasters, civil unrest, or terrorist acts, except projects involving substantial functional, locational or capacity increase
- 5.01 Intersection channelization projects
- 5.02 Intersection signalization projects at individual intersections
- 5.03 Changes in vertical and horizontal alignment
- 5.04 Interchange reconfiguration projects
- 5.05 Truck size and weight inspection stations
- 5.06 Bus terminals and transfer points
- 5.07 Traffic signal synchronization projects

Exempt Project Listing (In \$1000)

Jurisdiction/Agency	TIP/RTP Project ID	Facility Name/Route	Project Description	Project Limits	Estimated Cost	Exemption Code
Fresno County	LSTMP280	various	Bridge No. 42C0047, N. Russell Over Outside Canal, 3.9 MI North of Nees Ave. Replace deficient 2 lane bridge with new 2 lane bridge	From: various To: various Dist: N/A	\$2,937	1.19
Fresno County	LSTMP408	Various	Various locations throughout Fresno County; Install Striping	From: Various To: Various Dist: N/A	\$1,445	1.06
Fresno County	LSTMP462	Various	Community of Riverdale; adjacent to and/or near Riverdale Elementary, Fipps Primary and Riverdale High School; Install digital radar display on Mt. Whitney, install pedestrian path on Feland Ave., Hazel St., and Stathem Ave, and construct pedestrian bridge at the Burrell Ditch.	From: Various To: Various Dist: N/A	\$503	3.02
Fresno, City of	LSTMP442	Various	BRIDGE NO. PM00116, Bridge Preventive Maintenance Program (BPMP), various bridges in the City of Fresno. See Caltrans Local Assistance HBP web site for backup list of bridges.	From: Various To: Various Dist: N/A	\$1,369	4.01
Fresno, City of	LSTMP458	Various	City of Fresno; Update the 2010 Bicycle/Pedestrian Master Plan to prioritize and fund projects that increases safety for walking, bicycling, developing active transportation programs and filling the gaps of the current network.	From: Various To: Various Dist: N/A	\$250	3.02
Fresno, City of	LSTMP461	Various	City of Fresno; 15 school sites and City Neighborhood and Community Centers located throughout the City; Pedestrian and bicycle safety training including bike rodeos, pre and post pedestrian/bike surveys, and the promotion of biking to school and parks.	From: Various To: Various Dist: N/A	\$255	4.01
Kerman, City of	LSTMP466	Various	City of Kerman; 1) Siskiyou Avenue and E Street; 2) First Street and G Street; 3) F Street and 9th Street; 4) F Street and Pacheco Avenue; construction of curb extensions, or curb bulbouts at each location.	From: Various To: Various Dist: N/A	\$250	3.02
Parlier, City of	FRE130071	Various	Construct asphalt pavement and alley gutters in four unpaved commercial/resident alleys.	From: Various To: Various Dist: N/A	\$259	1.1

Exempt Project Listing (In \$1000)

Jurisdiction/Agency	TIP/RTP Project ID	Facility Name/Route	Project Description	Project Limits	Estimated Cost	Exemption Code
Coalinga, City of	FRE130045	Various Alleys	Coalinga; 6 Alleys from Sunset Street to Coalinga Street and 2 Alleys from Sunset Street to Fresno Street and Alleys 21 through 24 from Joaquin Street to Sunset Street and alleys 25 through 27 from Joaquin Street to California Street; Pave Dirt Alleys	From: Various To: Various Dist: 1.16	\$898	1.1
Fresno, City of	FRE071807	Ventura Ave.	Install and landscape median island, Ventura Ave. between Broadway and SR99.	From: Broadway To: SR99 Dist: N/A	\$275	4.12
Kerman, City of	FRE130001	Vineland Ave	Vineland Avenue from Kearney Boulevard to Sunset Avenue; Widen Roadway, Install Curb and Gutter and Sidewalk	From: Kearney Blvd To: Sunset Ave Dist: .14	\$434	1.19
Fresno, City of	FRE110130	West Ave	West Ave: Herndon Ave to Olive Ave; Install ITS wireless communications, 2070L controllers, cameras; some detection, some vaults & cabinets	From: Herndon Ave To: Olive Ave Dist: N/A	\$565	5.07
Fresno, City of	FRE090109	Willow Ave	ITS installation & signal coordination for Willow Ave. from Ashlan to International. Install conduit, fiber, cabinets, poles, cameras, radars, 2070L controllers.	From: Ashlan To: International Dist: N/A	\$1,630	5.07
Caltrans	LSTMP375		In Fresno, Kings and Madera Counties at structure #'s 42-0134, 42-0215F, 45-0007, 45-0064, and 41-0059E; Bridge seismic restoration.	From: Various To: Various Dist: N/A	\$9,020	1.19
Caltrans	LSTMP396		In Fresno and Madera counties, on various routes at various locations; repair traffic operations systems.	From: N/A To: N/A Dist: N/A	\$8,511	1.12
Caltrans	LSTMP397		In Fresno County on routes 168 and 180 at various locations; repair traffic operation systems.	From: N/A To: N/A Dist: N/A	\$8,511	1.12
Caltrans	LSTMP424		Synchronize advanced Traffic Management System (TMS) traffic signal and install controllers with communication media in Fresno at freeway and arterial crossings on Routes 41, 168 and 180.	From: Various To: Various Dist: N/A	\$397	5.07
Caltrans	LSTMP426		In Fresno, Kings, and Tulare counties on Routes 5, 41, 168, 180 and 198 at various locations. Upgrade highway signs and lighting.	From: Various To: Various Dist: N/A	\$5,322	1.07
Caltrans	LSTMP427		In Fresno County, on Routes 41, 99, 168 and 180. Apply high frictions surface treatment.	From: Various To: Various Dist: N/A	\$2,855	1.14

Exempt Project Listing (In \$1000)

Jurisdiction/Agency	TIP/RTP Project ID	Facility Name/Route	Project Description	Project Limits	Estimated Cost	Exemption Code
Caltrans	LSTMP433		In Fresno, Kern, Madera, and Tulare counties at various intersections; upgrade signalized intersections to include Accessible Pedestrian System (APS) push buttons and countdown pedestrian heads.	From: Various To: Various Dist: N/A	\$1,718	5.02
Caltrans	LSTMP453		In Fresno County on Route 5, 41, 99, 168 and 180. Upgrade irrigation system.	From: Various To: Various Dist: N/A	\$3,912	4.09

APPENDIX E

PUBLIC MEETING PROCESS DOCUMENTATION

**NOTICE OF PUBLIC HEARING ON THE
DRAFT 2015 FEDERAL TRANSPORTATION IMPROVEMENT PROGRAM AMENDMENT
NO. 8, THE DRAFT 2014 REGIONAL TRANSPORTATION PLAN AMENDMENT NO. 1,
AND DRAFT 2015 CONFORMITY ANALYSIS ADDRESSING THE 2008 OZONE AND 2012
PM2.5 STANDARDS**

NOTICE IS HEREBY GIVEN that the Fresno Council of Governments will hold a public hearing on September 1, 2015 @ 5:30 p.m. at the Fresno Council of Governments office, located at 2035 Tulare Street Suite 201 Fresno, California 93721 in the Sequoia Conference Room, regarding the Draft 2015 Federal Transportation Improvement Program Amendment No. 8 (2015 FTIP Amendment No. 8), the Draft 2014 Regional Transportation Plan Amendment No. 1 (2014 RTP Amendment No. 1), and the Draft 2015 Conformity Analysis Addressing the 2008 Ozone and 2012 PM2.5 Standards. The purpose of this public meeting is to receive public comments on these documents.

- The 2015 FTIP is a near-term listing of capital improvement and operational expenditures utilizing federal and state monies for transportation projects in Fresno County during the next four years. Amendment No. 8 is necessary to make funding, open to traffic date, and scope changes to capacity increasing, regionally significant projects. We're also adding and deleting line item projects.
- The 2014 RTP is a long-term strategy to meet Fresno County transportation needs out to the year 2040. Amendment No. 1 is necessary make funding, open to traffic date, and scope changes to capacity increasing, regionally significant projects.
- The 2015 Conformity Analysis contains the documentation to support a finding that the 2015 FTIP Amendment No. 8 and 2014 RTP Amendment No. 1 meet the air quality conformity requirements for carbon monoxide, ozone and particulate matter.

Individuals with disabilities may call Mike Bitner at the Fresno Council of Governments (with a 3-working-day advance notice) to request auxiliary aids necessary to participate in the public hearing. Translation services are available (with a 3-working-day advance notice) to participants speaking any language with available professional translation services.

A 30-day public review and comment period will commence on August 18, 2015 and conclude on September 18, 2015. The draft documents are available for review at the Fresno Council of Governments office, located at 2035 Tulare Street Suite 201 Fresno, California 93721 and on the Fresno Council of Governments website at www.fresnocog.org.

Public comments are welcomed at the meeting, or may be submitted in writing by 4:30 p.m. on September 18, 2015 to Fresno Council of Governments staff as listed below.

After considering the comments, the documents will be considered for adoption, by resolution, by the Fresno Council of Governments at a regularly scheduled meeting to be held on October 22, 2015. The documents will then be submitted to state and federal agencies for approval.

FRESNO COG

**BEFORE THE
FRESNO COUNCIL OF GOVERNMENTS POLICY BOARD
RESOLUTION NO. 2015-41**

In the Matter of:

**RESOLUTION ADOPTING
THE FRESNO COUNCIL OF
GOVERNMENTS 2014 RTP
Amendment No. 1, 2015 FTIP
Amendment No. 8 AND THE
2015 CONFORMITY
ANALYSIS FOR THE 2008
OZONE AND 2012 PM2.5
STANDARDS**

WHEREAS, the Fresno Council of Governments is a Regional Transportation Planning Agency and a Metropolitan Planning Organization, pursuant to State and Federal designation; and

WHEREAS, federal planning regulations require Metropolitan Planning Organizations to prepare and adopt a long range Regional Transportation Plan (RTP) for their region; and

WHEREAS, federal planning regulations require that Metropolitan Planning Organizations prepare and adopt a Federal Transportation Improvement Program (FTIP) for their region; and

WHEREAS, a 2014 Regional Transportation Plan Amendment No. 1 has been prepared in full compliance with federal guidance; and

WHEREAS, a 2014 Regional Transportation Plan Amendment No. 1 has been prepared in accordance with state guidelines adopted by the California Transportation Commission; and

WHEREAS, federal planning regulations require that Metropolitan Planning Organizations prepare and adopt a short range Federal Transportation Improvement Program (FTIP) for their region; and

WHEREAS, the 2015 Federal Transportation Improvement Program Amendment No. 8 (2015 FTIP Amendment No. 8) has been prepared to comply with Federal and State requirements for local projects and through a cooperative process between the Federal Highway Administration (FHWA), the Federal Transit Administration (FTA), the State Department of Transportation (Caltrans), principal elected officials of general purpose local governments and their staffs, and public owner operators of mass transportation services acting through the Fresno Council of Governments forum and general public involvement; and

WHEREAS, the 2015 FTIP Amendment No. 8 program listing is consistent with: 1) the 2014 Regional Transportation Plan Amendment No. 1; 2) the 2014 State Transportation Improvement Program; and 3) the 2015 Conformity Analysis for the 2008 Ozone and 2012 PM2.5 Standards; and

WHEREAS, the 2015 FTIP contains the MPO's certification of the transportation planning process assuring that all federal requirements have been fulfilled; and

WHEREAS, the 2015 FTIP Amendment No. 8 and 2014 RTP Amendment No. 1 meets all applicable transportation planning requirements per 23 CFR Part 450.

WHEREAS, projects submitted in the 2015 FTIP Amendment No. 8 and 2014 RTP Amendment No. 1 must be financially constrained and the financial plan affirms that funding is available; and

WHEREAS, the MPO must demonstrate conformity per 40 CFR Part 93 for the RTP and FTIP; and

WHEREAS, the 2015 Conformity Analysis addressing the 2008 Ozone and 2012 PM2.5 Standards supports a finding that the 2015 FTIP Amendment No. 8 and 2014 RTP Amendment No. 1 meet the air quality conformity requirements for carbon monoxide, ozone and particulate matter; and

WHEREAS, the 2014 RTP Amendment No. 1 and 2015 FTIP Amendment No. 8 do not interfere with the timely implementation of the Transportation Control Measures; and

WHEREAS, the 2014 RTP Amendment No. 1 and 2015 FTIP Amendment No. 8 conforms to the applicable SIPs; and

WHEREAS, the documents have been widely circulated and reviewed by the Fresno Council of Governments advisory committees representing the technical and management staffs of the member agencies; representatives of other governmental agencies, including State and Federal; representatives of special interest groups; representatives of the private business sector; and residents of Fresno County consistent with public participation process adopted by the Fresno Council of Governments; and

WHEREAS, a public hearing was conducted on September 1, 2015 to hear and consider comments on the 2014 RTP Amendment No. 1, 2015 FTIP Amendment No. 8, and 2015 Conformity Analysis addressing the 2008 Ozone and 2012 PM2.5 Standards;

NOW, THEREFORE, BE IT RESOLVED, that the Fresno Council of Governments adopts the 2014 RTP Amendment No. 1, 2015 FTIP Amendment No. 8, and 2015 Conformity Analysis addressing the 2008 Ozone and 2012 PM2.5 Standards Conformity Analysis.

BE IT FURTHER RESOLVED that the Fresno Council of Governments finds that the 2014 RTP Amendment No. 1 and 2015 FTIP Amendment No. 8 are in conformity with the requirements of the Federal Clean Air Act Amendments and applicable State Implementation Plans for air quality.

THE FOREGOING RESOLUTION was passed and adopted by the Fresno Council of Governments this 22nd day of October 2015.

NO. 8, THE DRAFT 2014 REGIONAL TRANSPORTATION PLAN AMENDMENT NO. 1,
AND DRAFT 2015 CONFORMITY ANALYSIS ADDRESSING THE 2008 OZONE AND 2012
PM2.5 STANDARDS**

NOTICE IS HEREBY GIVEN that the Fresno Council of Governments will hold a public hearing on September 1, 2015 @ 5:30 p.m. at the Fresno Council of Governments office, located at 2035 Tulare Street Suite 201 Fresno, California 93721 in the Sequoia conference room, regarding the Draft 2015 Federal Transportation Improvement Program Amendment No. 8 (2015 FTIP Amendment No. 8), the Draft 2014 Regional Transportation Plan Amendment No. 1 (2014 RTP Amendment No. 1), and the Draft 2015 Conformity Analysis Addressing the 2008 Ozone and 2012 PM2.5 Standards. The purpose of this public meeting is to receive public comments on these documents.

- The 2015 FTIP is a near-term listing of capital improvement and operational expenditures utilizing federal and state monies for transportation projects in Fresno County during the next four years. Amendment No. 8 is necessary to make funding, open to traffic date, and scope changes to capacity increasing, regionally significant projects. We're also adding and deleting line item projects.
- The 2014 RTP is a long-term strategy to meet Fresno County transportation needs out to the year 2040. Amendment No. 1 is necessary make funding, open to traffic date, and scope changes to capacity increasing, regionally significant projects.
- The 2015 Conformity Analysis contains the documentation to support a finding that the 2015 FTIP Amendment No. 8 and 2014 RTP Amendment No. 1 meet the air quality conformity requirements for carbon monoxide, ozone and particulate matter.

Individuals with disabilities may call Mike Bitner at the Fresno Council of Governments (with a 3-working-day advance notice) to request auxiliary aids necessary to participate in the public hearing. Translation services are available (with a 3-working-day advance notice) to participants speaking any language with available professional translation services.

A 30-day public review and comment period will commence on August 18, 2015 and conclude on September 18, 2015. The draft documents are available for review at the Fresno Council of Governments office, located at 2035 Tulare Street Suite 201 Fresno, California 93721 and on the Fresno Council of Governments website at www.fresnocog.org.

Public comments are welcomed at the meeting, or may be submitted in writing by 4:30 p.m. on September 18, 2015 to Fresno Council of Governments staff as listed below.

After considering the comments, the documents will be considered for adoption, by resolution, by the Fresno Council of Governments at a regularly scheduled meeting to be held on October 22, 2015. The documents will then be submitted to state and federal agencies for approval.

FRESNO COG

**BEFORE THE
FRESNO COUNCIL OF GOVERNMENTS POLICY BOARD
RESOLUTION NO. 2015-41**

In the Matter of:

**RESOLUTION ADOPTING
THE FRESNO COUNCIL OF
GOVERNMENTS 2014 RTP
Amendment No. 1, 2015 FTIP
Amendment No. 8 AND THE
2015 CONFORMITY
ANALYSIS FOR THE 2008
OZONE AND 2012 PM2.5
STANDARDS**

WHEREAS, the Fresno Council of Governments is a Regional Transportation Planning Agency and a Metropolitan Planning Organization, pursuant to State and Federal designation; and

WHEREAS, federal planning regulations require Metropolitan Planning Organizations to prepare and adopt a long range Regional Transportation Plan (RTP) for their region; and

WHEREAS, federal planning regulations require that Metropolitan Planning Organizations prepare and adopt a Federal Transportation Improvement Program (FTIP) for their region; and

WHEREAS, a 2014 Regional Transportation Plan Amendment No. 1 has been prepared in full compliance with federal guidance; and

WHEREAS, a 2014 Regional Transportation Plan Amendment No. 1 has been prepared in accordance with state guidelines adopted by the California Transportation Commission; and

WHEREAS, federal planning regulations require that Metropolitan Planning Organizations prepare and adopt a short range Federal Transportation Improvement Program (FTIP) for their region; and

WHEREAS, the 2015 Federal Transportation Improvement Program Amendment No. 8 (2015 FTIP Amendment No. 8) has been prepared to comply with Federal and State requirements for local projects and through a cooperative process between the Federal Highway Administration (FHWA), the Federal Transit Administration (FTA), the State Department of Transportation (Caltrans), principal elected officials of general purpose local governments and their staffs, and public owner operators of mass transportation services acting through the Fresno Council of Governments forum and general public involvement; and

WHEREAS, the 2015 FTIP Amendment No. 8 program listing is consistent with: 1) the 2014 Regional Transportation Plan Amendment No. 1; 2) the 2014 State Transportation Improvement Program; and 3) the 2015 Conformity Analysis for the 2008 Ozone and 2012 PM2.5 Standards; and

WHEREAS, the 2015 FTIP contains the MPO's certification of the transportation planning process assuring that all federal requirements have been fulfilled; and

WHEREAS, the 2015 FTIP Amendment No. 8 and 2014 RTP Amendment No. 1 meets all applicable transportation planning requirements per 23 CFR Part 450.

WHEREAS, projects submitted in the 2015 FTIP Amendment No. 8 and 2014 RTP Amendment No. 1 must be financially constrained and the financial plan affirms that funding is available; and

WHEREAS, the MPO must demonstrate conformity per 40 CFR Part 93 for the RTP and FTIP; and

WHEREAS, the 2015 Conformity Analysis addressing the 2008 Ozone and 2012 PM2.5 Standards supports a finding that the 2015 FTIP Amendment No. 8 and 2014 RTP Amendment No. 1 meet the air quality conformity requirements for carbon monoxide, ozone and particulate matter; and

WHEREAS, the 2014 RTP Amendment No. 1 and 2015 FTIP Amendment No. 8 do not interfere with the timely implementation of the Transportation Control Measures; and

WHEREAS, the 2014 RTP Amendment No. 1 and 2015 FTIP Amendment No. 8 conforms to the applicable SIPs; and

WHEREAS, the documents have been widely circulated and reviewed by the Fresno Council of Governments advisory committees representing the technical and management staffs of the member agencies; representatives of other governmental agencies, including State and Federal; representatives of special interest groups; representatives of the private business sector; and residents of Fresno County consistent with public participation process adopted by the Fresno Council of Governments; and

WHEREAS, a public hearing was conducted on September 1, 2015 to hear and consider comments on the 2014 RTP Amendment No. 1, 2015 FTIP Amendment No. 8, and 2015 Conformity Analysis addressing the 2008 Ozone and 2012 PM2.5 Standards;

NOW, THEREFORE, BE IT RESOLVED, that the Fresno Council of Governments adopts the 2014 RTP Amendment No. 1, 2015 FTIP Amendment No. 8, and 2015 Conformity Analysis addressing the 2008 Ozone and 2012 PM2.5 Standards Conformity Analysis.

BE IT FURTHER RESOLVED that the Fresno Council of Governments finds that the 2014 RTP Amendment No. 1 and 2015 FTIP Amendment No. 8 are in conformity with the requirements of the Federal Clean Air Act Amendments and applicable State Implementation Plans for air quality.

THE FOREGOING RESOLUTION was passed and adopted by the Fresno Council of Governments this 22nd day of October 2015.
